their desire to entice Western investment and trade New capital it was foretold would pave the way to political and economic stability and the benefits would trickle down to even the poorest citizens The hyperbole of this neocolonialism however has left many of these countries with nothing but compounded debt and unfulfilled promises The Megarhetorics of Global Development examines rhetorical strategies used by multinational corporations NGOs governments banks and others to further their own economic political or technological agendas These wide ranging case studies employ rhetorical theory globalization scholarship and analysis of cultural and historical dynamics to offer in depth critiques of development practices and their material effects By deconstructing megarhetorics at both the local and global level and following their paths of mobilization and diffusion the concepts of progress and growth can be reevaluated with the end goal of encouraging self sustaining and ethical outcomes *Historical Companion to Postcolonial Literatures in English* Prem Poddar,2019-08-07 This is the first reference guide to the political cultural and economic histories that form the subject matter of postcolonial literatures written in English The focus of the Companion is principally on the histories of postcolonial literatures in the Anglophone world Africa the Middle East South Asia South east Asia Australia and New Zealand the Pacific the Caribbean and Canada There are also long entries discussing the literatures and histories of those further areas that have also claimed the title postcolonial notably Britain East Asia Ireland Latin America and the United States The Companion contains 220 entries written by 150 acknowledged scholars of postcolonial history and literature covers major events ideas movements and figures in postcolonial histories long regional survey essays on historiography and women s histories Each entry provides a summary of the historical event or topic and bibliographies of postcolonial literary works and histories Extensive cross references and indexes enable readers to locate particular literary texts in their relevant historical contexts as well as to discover related literary texts and histories in other regions with ease **Red Internationalism** Salar Mohandesi,2023-02-23 Shows how human rights displaced anti imperialism as the dominant framework for changing the world in the 1960s and 1970s **Encyclopedia of Political Economy** Phillip O'Hara,1999-02-04 This groundbreaking Encyclopedia is the very first fully refereed A Z compendium of the main principles concepts problems institutions schools and policies associated with political economy Based on developments in political economy since the 1960s it is designed to provide a comprehensive introduction to the field as well as being an authori **Empire** D. C. B. Lieven,2002-01-01 Focusing on the Tsarist and Soviet empires of Russia Lieven reveals the nature and meaning of all empires throughout history He examines factors that mold the shape of the empires including geography and culture and compares the Russian empires with other imperial states from ancient China and Rome to the present day United States Illustrations **Foreign Intervention And China's Industrial Development, 1870-1911** Stephen C Thomas,2019-03-04 More than one hundred years ago imperial Chinese leaders tried to industrialize their nation much as China s leaders are attempting today Self strengthening projects in industry and the military were implemented to increase China s wealth and power and to protect

the country from further colonization by the Western powers of the nineteenth century      **Colonialism** Melvin E. Page, 2003-09-16 The most exhaustive reference work available on this critical subject in world history focusing on the politics economy culture and society of both colonizers and colonized The history of the last 500 years is the history of imperialism writes editor Melvin Page In the Americas as a result of imperialist conquest disease famine and war nearly wiped out a population estimated in the tens of millions Africa was devastated by the slave trade an integral part of imperialism from the 1400s to the 1800s In Asia even though native populations survived native political institutions were destroyed Imperialism also forged the two most important ideologies of the last five centuries racialism and modern nationalism In more than 600 essays presented in this three volume encyclopedia Page and other leading scholars historians political scientists economists and sociologists analyze the origins of imperialism the many forms it took and its impact worldwide They also explore imperialism's bitter legacy the gross inequities of global wealth and power that divide the former conquerors primarily Europe the United States and Japan from the people they conquered      **The State of Capitalism** Costas Lapavistas, EReNSEP Writing Collective, 2023-08-29 Thinking beyond pandemic capitalism The health emergency that broke out in 2020 is a landmark event in the development of capitalism confirming the underlying change signalled by the Great Crisis of 2007-9 The pandemic has catapulted the state to the centre of economic activity However a historic impasse is steadily becoming apparent at the core of the world economy Productive accumulation is flaccid as both profitability and labour productivity are weak Financialisation has entered a new phase as shadow banking grew relative to other banks but is entirely dependent on the state The power of the state derives from command over fiat money and can certainly deliver enormous boosts to aggregate demand but that is not enough to tackle the weakness of the productive sector The rise in inflation for the first time in forty years indicates the impasse There is a transparent need for intervention on the supply side directly challenging capitalist property rights There is no evidence however that the ruling blocs in core countries would engage in such policies The pandemic crisis also brought to the fore fresh divisions of core and periphery across the world economy Imperialism has assumed new forms spurred by globally active financial capital and internationalised productive capital A renewed contest for hegemony has emerged as US power declined The economic challenge of China will unfold steadily in the years ahead intensifying political tensions and military rivalries This book is the work of a research collective comprising authors from several parts of the world It analyses these vital issues from the perspective of Marxist political economy and puts forth alternative anticapitalist proposals      **The Political Economy of Imperial Relations** Alex Sutton, 2015-08-27 The Political Economy of Imperial Relations offers a much needed historical and theoretical intervention into the relationship between Britain and Malaya after the Second World War It challenges existing accounts and details a strong continuity in this relationship from 1945 until 1960      **Global Energy Security and American Hegemony** Doug Stokes, Sam Raphael, 2010-06-07 This analysis of the United States and energy security

examines the close relationship between US military supremacy in oil rich regions and America's maintenance of global power. Energy security generally evokes thoughts of American intervention in the Middle East to protect US interests in that region's oil rich fields. Doug Stokes and Sam Raphael move beyond that framework to consider US actions in Latin America, Central Asia and Africa. Drawing on State and Defense Department records and other primary sources and previous scholarship they show how US foreign policy since World War II has sought to maintain a global energy security regime that supports the nation's allies while maintaining American hegemony. Stokes and Raphael explain how US intervention in energy rich states insulates and stabilizes those nations transnationally oriented actors and political economies and why American oil diversification strategy strengthens the country's position against rivals in the global capitalist system. They argue that counterinsurgency aid and other types of coercive US statecraft protect the recipient states from an array of potentially revolutionary armed and unarmed internal social forces thereby securing the energy supplies of nations deemed strategically important to the United States or its allies. Clear and accessible this cutting edge contemporary policy analysis will engage scholars of US foreign policy and international relations as well as policymakers grappling with the importance of energy security in today's world.

**Business, Race, and Politics in British India, c.1850-1960** Maria Misra, 1999-04-29. This is a study of the political and economic activities of an important group of British businessmen in India between 1850 and 1960. Though denounced by Indian nationalists as the economic arm of the British Raj the firms of these Managing Agents seemed unassailable before the First World War. However during the inter war period they rapidly lost their commanding position to both Indian and other foreign competitors. Dr Misra argues that the failure of these firms was in part the consequence of their particular and ultimately self defeating attitudes towards business politics and race. She casts new light on British colonial society in India and makes an important contribution to current debates on the nature of the British Empire and the causes of Britain's relative economic decline.
