Marxist Theories of Imperialism Murray Noonan, 2017-02-28 For Marxists imperialism is the highest stage of capitalism Critical analysis of imperialism has been a feature of Marxist throughout the twentieth century The conceptualising and theorising of imperialism by Marxists has evolved over time in response to developments in the global capitalist economy and in international politics Murray Noonan here provides the first complete analysis of Marxist theories of imperialism in over two decades Presenting three phases of imperialist theories he analyses and compares Classical Neo and Globalisation era Marxist theories of imperialism The book moves chronologically tracking the origins of imperialism theorised by J A Hobson at the beginning of the twentieth century up to the present day He critically identifies and engages with a new Globalisation era phase of Marxist imperialism theory Through a detailed scholarly analysis of the history and evolution of these theories Noonan offers vital new perspectives on imperialist theory and its relevance and application in the twenty first century

Marxist Perspectives on Imperialism Chronis Polychroniou, 1991-04-30 By distinguishing between classical Marxist and neo Marxist approaches to imperialism this volume challenges generally accepted views on the relationship between these two branches of Marxist thought reaffirming the principles and tools of fundamental Marxism as essential for understanding and explaining the internationalization of capitalist economic life Together original source materials and Polychroniou s highly readable analysis present a commentary both outlining and clarifying essential ideas contained in Marxist writings from the late 19th century to the present Marxist Perspectives on Imperialism also identifies current political and economic issues to which authentic Marxist concepts can be applied A review of Marx s views on capitalist production relations and expansion opens the discussion and defines criteria for evaluating analyses which follow Studies by classical Marxists such as Hilferding Bukharin and Lenin are then contrasted to the neo Marxist writings of Baran Frank and Wallerstein among others Polychroniou s defense of orthodox Marxism strengthens as he turns his attention to the practical uses of Marxist ideology to topics of international concern His conclusions clarify a complex topic and provide political economists sociologists and political scientists with a clear explanation of the theoretical and methodological contours of Marxist thought on capitalist imperialism

Blackledge, 2013-07-19 A decade after Francis Fukuyama announced the End of History anti capitalist demonstrators at Seattle and elsewhere have helped reinvigorate the Left with the reply another world is possible More than anyone else it was Marx who showed that slogans such as this were no utopian fantasies and that capitalism was just as much a historical mode of production no more natural and certainly no less contradictory than were the feudal and slave modes which preceded it Paul Blackledge opens this study with a defence of the Marxist approach to the study of history against what he argues as being the naive empiricism of traditional historians and the relativism of the postmodernists He moves on to outline Marx and Engels analyses of concrete historical processes and their critiques of the alternative historiographic methodologies of their contemporaries He then discusses neglected historical works produced by Marxists in the half century or so after Marx and Engels deaths Two central chapters survey recent Marxist debates on first the nature of modes of productions including slave feudal and tributary systems and the revolutionary transitions between them and second the methodological debate over the issue of structure and agency in the movement of history Finally he shows the political relevance of these debates through a concluding survey of competing Marxist attempts to periodise the present postmodern conjuncture This book should be read by historians students of cultural social and political theory and anti capitalist activists

Beyond Realism and Marxism A. Linklater, 1990-02-06 This book discusses the challenge to realism which proponents of international political economy and critical theory have mounted in the last few years and examines the changing relationship between realism and Marxism It is aimed at students of approaches to

international relations *Adventures in Marxist Theory* Douglas Kellner, 2025-08-20 *Adventures in Marxist Theory* provides an introduction and overview of Marxian theory to demonstrate its contemporary relevance to social and political theory and a range of disciplines from philosophy to economics in both the humanities and the social sciences. The text argues that current historical developments and the evolution of economics, politics, society, culture, technology, and everyday life demonstrates the contemporary relevance of Marxism in both theory and politics in the contemporary era. The book presents a twenty-first century Marxism relevant to theorizing contemporary state, capitalist, and technological societies, critically dissecting their major social and political issues and problems while advancing progressive social transformation in the interests of increased democracy and social justice. The volume opens with an Introduction describing a multi-disciplinary and critical approach to Marxism and its application to a wide range of contemporary issues, including the alienation of labor in the workplace, social divisions and injustices such as classism, sexism, racism, and homophobia, and questions of technology, social media, and AI, as well as problems of ecological crisis, autocracy, and state oppression. Specific chapters address the Marxian critique of capitalism and theory of socialism, its concept of ideology and morality, its methodological synthesis of social science, critical theory, and its analyses of globalization, technology, and democracy. Written by a distinguished scholar of Marxism, critical theory, and cultural and political studies, the volume will be a key resource for instructors, students, and readers in historical and contemporary sociology, social and critical theory, political sociology, political and cultural studies, and Marx and Marxist studies.

American Power and International Theory at the Council on Foreign Relations, 1953-54 David M. McCourt, 2020-02-04 Between December 1953 and June 1954, the elite think tank the Council on Foreign Relations (CFR) joined prominent figures in International Relations, including Pennsylvania's Robert Strausz Hup, Yale's Arnold Wolfers, the Rockefeller Foundation's William Thompson, government adviser Dorothy Fosdick, and nuclear strategist William Kaufmann. They spent seven meetings assessing approaches to world politics from the realist theory of Hans Morgenthau to theories of imperialism of Karl Marx and V. I. Lenin to discern basic elements of a theory of international relations. The study group's materials are an indispensable window to the development of IR theory, illuminating the seeds of the theory-practice nexus in Cold War U.S. foreign policy. Historians of International Relations recently revised the standard narrative of the field's origins, showing that IR witnessed a sharp turn to theoretical consideration of international politics beginning around 1950 and remained preoccupied with theory. Taking place in 1953-54, the CFR study group represents a vital snapshot of this shift. This book situates the CFR study group in its historical and historiographical contexts and offers a biographical analysis of the participants. It includes seven preparatory papers on diverse theoretical approaches penned by former Berkeley political scientist George A. Lipsky, followed by the digest of discussions from the study group meetings. *American Power and International Theory at the Council on Foreign Relations, 1953-54* offers new insights into the early development of IR, as well as the thinking of prominent elites in the early years of the Cold War.

Marx and Other Four-Letter Words Georgina

Blakeley, Valerie Bryson, 2005-04-20 Karl Marx's classic definitions of class and society under capitalism are still widely used today. Ideas such as class, revolution, production and oppression are employed across a broad range of academic subjects reaching beyond politics, economics and sociology. Yet these concepts within a specifically Marxist framework are not always easy to understand. This book is an ideal student introduction that explains in clear and concise chapters the precise meaning and implications of each of Marx's key concepts. Furthermore, the contributors show how these ideas continue to be relevant and how they relate to modern society. The contributors include leading academics in the field of political science. Outlining clearly what each concept means, they move on to situate it within cutting edge contemporary political theory. Concepts include historical materialism, capitalism, class, the state, imperialism, the division of labour, oppression, production and reproduction, revolution, working class, internationalism, equality and democracy. *The Legacy of Marxism* Matthew Johnson, 2012-06-28 Marx's influence is evident in a range of often incompatible and contradictory political movements and intellectual approaches. With a number of those movements now discredited by the experience of really existing socialism and the academic left gravitating towards approaches which eschew authoritarian, essentialist and ethnocentric elements of orthodox Marxism, the relevance of Marx has been called into question. Featuring chapters by Norman Geras, Joseph Femia, Alan Johnson, Paul Bowman, Ronaldo Munck, Lawrence Wilde, Mark Cowling, Chengyi Peng, Terrell Carver, Oliver Harrison and Stuart Sim, this book is an attempt to examine means by which the left can make real substantive and positive contributions to contemporary debate. The collection examines such topics as the meaning of Marxism and pluralism within the left, Marxism's scientific credentials, the revolution, democracy and cultural studies, the politics of development, the relationship between Marxism and global capitalism, the global justice debate and Marx's rejection of moral discourse, the analysis of crime and criminal justice, Chinese society and constitutional diversity and the relationship between Marxism and post-Marxism. **Imperialism** Ronald H. Chilcote, 2000-06 The tension and disparity between developed and underdeveloped nations will be a major challenge to world stability in the twenty first century. In an era of international markets and global economy it is thus important to understand the dynamic forces that have led to the development and expansion of capitalism which continues to transform society at a galloping pace. The key essays in this valuable collection present different perspectives but they are all united by the fundamental premise that capitalism is at the root of both development and imperialism. Editor Ronald H. Chilcote has selected major contributors in the field of economic development and divided their articles into four thematic sections. The first section provides a conceptualization of imperialism in the context of capitalism and a definition of the limits of imperialism elaborated by Paul Sweezy. Classical theories of imperialism are then reviewed including those of J. A. Hobson, Rudolf Hilferding, Nicolai Bukharin, V. I. Lenin, Rosa Luxemburg and Joseph Schumpeter. The second set of selections focuses on the relationship of imperialist theory to contemporary views of development and underdevelopment taking into account both the legacy of Marx and of Lenin. The third section builds on the earlier

theoretical contributions of the classical thinkers links imperialism to the underdevelopmental literature and traces the evolution of development underdevelopment theory after the Second World War The final section reminds us that some of these presumably dated theories and concerns remain current and relevant today This well designed anthology provides an excellent basis for a sophisticated understanding of current political and economic realities and the historical developments that went into their making Marx in the Age of Digital Capitalism ,2015-09-29 More than 130 years after Karl Marx s death and 150 years after the publication of his opus magnum Capital Critique of Political Economy capitalism keeps being haunted by period crises The most recent capitalist crisis has brought back attention to Marx s works This volume presents 16 contributions that show how Marx s analyses of capitalism the commodity class labour work exploitation surplus value dialectics crises ideology class struggles and communism help us to understand the Internet and social media in 21st century digital capitalism Marx is back This book is a key resource on the foundations of Marxist Internet and Digital Media Studies
