New Perspectives on Young Children's Moral Education Tony Eaude, 2015-12-17 New Perspectives on Young Children's Moral Education explores how to approach young children's moral education in a world of uncertainty and change What is moral education How do young children learn to act and interact appropriately How do we enable children to recognise that how they act and interact matters How can character virtues and value help young children internalise qualities associated with living a good life Challenging many current assumptions about ethics and education Tony Eaude suggests that a moral dimension runs through every aspect of life and that ethics involves learning to act and interact appropriately based on an ethic of care and enduring qualities and attributes to equip children to resist strong external pressures Drawing accessibly on research in neuroscience and psychology he discusses how young children learn highlighting the role of emotion culture example habituation and feedback Small actions can help to develop agency empathy and thoughtfulness and a sense of moral identity with an increasing emphasis on self regulation a vocabulary of ethics and intrinsic motivation Eaude explores how character virtues and values can help young children and adults to recognize and internalize qualities associated with living a good life He identifies how adults and learning environments can support these processes and shows why an inclusive approach is needed rather than focusing on these topics only in particular settings programmes or lessons Recognising pitfalls and dilemmas Eaude argues that an approach based on virtue ethics and an apprenticeship model is suitable in school and other settings both religious and otherwise internationally

Confucian Ritual and Moral Education Colin J. Lewis, 2020-09-30 It is widely accepted that moral education is quintessential to facilitating and maintaining prosocial attitudes What moral education

should entail and how it can be effectively pursued remain hotly disputed questions In *Confucian Ritual and Moral Education* Colin J Lewis examines these issues by appealing to two traditions that have until now escaped comparison Vygotsky's theory of learning and psychosocial development and ancient Confucianism's ritualized approach to moral education Lewis argues first that Vygotsky and the Confucians complement one another in a manner that enables a nuanced empirically sound understanding of how the Confucian ritual education model should be construed and how it could be deployed and second just as ritual education in the Confucian tradition can be explicated in terms of modern developmental theory this ancient notion of ritual can also serve as a viable resource for moral education in a contemporary diverse world

Power and Moral Education in China Wangbei Ye, 2014-04-15 Chinese moral education reform in the last three decades represents the most significant decentralization of decision making power since the foundation of People's Republic of China in 1949 On one hand it shows how de politicized China's moral education curriculum has become following the introduction of China's Open door policy and economic reforms and the resultant social transformations On the other hand it reveals persistent problems in moral education caused by political stresses and tight state control To explain these tensions *Power and Moral Education in China* analyzes the characteristics of power relationships in school moral education curriculum goal setting content and pedagogy selection and implementation The ultimate purpose is to identify not only what factors impact Chinese moral education curriculum decision making at the school level but also how and why Through a multiple case study conducted during 2008 in three schools in Shenzhen City and based on four major data collection instruments observation interview questionnaire and document review Wangbei Ye analyzes how power relationships have evolved in school moral education and how and why school power affects school moral education Contrary to the common belief that Chinese schools are passively impacted by external forces in moral education curriculum development this book suggests that school power is a semi emancipatory relationship that acts as a major force shaping moral education This means that although both the Chinese Communist Party and the state are positioned to control schools and moral education schools nonetheless have the power to either negotiate for more influence or partly emancipate themselves by collaborating with other external forces responding to grass root needs empowering school teachers and adjusting internal school management style This helps to explain the influence of Chinese schools in moral education and suggests a broader theory of power relationships in curriculum

Moral Education for a Secular Society Phyllis Stock-Morton, 1988-07-08 The current controversy over the teaching of values and the role of religion in our public schools is an important and much discussed topic Stock Morton's work represents not only a valuable historical investigation but a useful resource for the review and consideration of our present day dilemma France is the only country which has attempted to teach an official secular morality and Stock Morton's is the first study to describe and trace the development of that effort During the nineteenth century the impetus for a practical secular moral teaching arose primarily through the concern of those who sought the liberalization of French society

and politics The educational dilemma faced at that time arose from the opposition of the Catholic Church to liberal government Gradually liberals and radical reached a consensus on the necessity of teaching ethics in the schools while eliminating the presence of the clergy Their solution and its philosophical basis were anchored in the Enlightenment and the Revolution but developed in the context of nineteenth century political and philosophical change In the 1880s when the republicans were able to inaugurate universal free and secular education secular ethics became a required course for all The history of morale laique is significant at a time when our own country is rife with controversy over the role of religion and the teaching of values in the schools Stock Morton s thoughtful study represents an important contribution to the literature for those concerned with these significant issues *Moral Education* William Kay,2025-08-05 In the early 1970s few subjects in schools had grown faster than moral education and more and more teachers were seeking guidance in a changing and developing field where a training in the traditional subjects could not always provide sufficient help Originally published in 1975 Dr Kay maintained that a study of the sociological factors involved could give considerable insight into the meaning and purpose of moral education and in this book he examines the effect on the individual pupil of the home the school and differing socio economic class structures and ideologies Using standard sociological analyses Dr Kay discloses some of the determinants of individual morality as they affect children in their homes and schools He concludes that the alleged moral superiority of the middle classes merely stresses the fact that the benefits which are currently enjoyed by this minority should become the privilege of all The analysis of home and school leads him to the view that a democratic milieu is the environment most likely to promote moral growth And his study of school systems concludes with the view that privileged elitism should be replaced by an aristocracy of service with full pupil participation in every aspect of school life Today it can be read in its historical context *Moral Education for Social Justice* Larry Nucci,Robyn Ilten-Gee,2021 The authors draw from their work with teachers and students to address issues of social justice through the regular curriculum and everyday school life This book illustrates an approach that integrates social justice education with contemporary research on students development of moral understandings and concerns for human welfare in order to critically address societal conventions norms and institutions The authors provide a clear roadmap for differentiating moral education from religious beliefs and offer age appropriate guidance for creating healthy school and classroom environments Demonstrating how to engage students in critical thinking and community activism the book includes proven effective lessons that promote academic learning and moral growth for the early grades through adolescence The text also incorporates recent work with social emotional learning and restorative justice to nurture students ethical awareness and disrupt the school to prison pipeline Book Features Guidance to help teachers move from classroom moral discourse to engage students in community action Age specific lesson plans developed with classroom teachers for integration with regular academic curricula Detailed overview of moral growth with examples of student reasoning Connections between moral development and critical pedagogy
