This text focuses on the core competencies required for teacher certification in instrumental music. The first section of the book focuses on essential issues for a successful instrumental program: objectives, assessment, and evaluation; motivation; administrative tasks; and recruiting and scheduling, including block scheduling. The second section devotes a chapter to each wind instrument plus percussion and strings and includes troubleshooting checklists for each instrument. The third section focuses on rehearsal techniques from the first day through high school. *Cooking with Csound, Part 1* Andrew Horner, Lydia Ayers, 2002-01-01 *Cooking with Csound* offers a fresh approach to using the software to create effective sounds. This book contains a collection of software synthesis designs for the woodwind and brass instruments which you can bake into compositional curries, casseroles, and soufflés in your computer. Whether you are a composer, researcher, student, or hobbyist, the ready-to-use designs found in this volume will provide you with a rich set of sounds. The

designs are in the Csound software synthesis language which is available free on the web. The book includes a tutorial for those new to Csound and a wide variety of effects for customizing the instrument designs. A chapter on pitch representation also allows readers to use customized tunings and scales. Includes a CD ROM. *Oboe Unbound* Libby Van Cleve, 2014-10-16

After decades of experimentation, musicians have begun to utilize a strikingly colorful palette of sounds on woodwind instruments. Flute, clarinet, and saxophone players in many different musical settings regularly use sounds that were unheard of in the middle of the twentieth century. Oboists in comparison have lagged somewhat behind their more adventurous colleagues. In writing *Oboe Unbound: Contemporary Techniques*, author Libby Van Cleve opens up the tradition-bound assumptions of the instrument's capabilities. Not only does she include descriptions of the instrument's standard technique from range and reeds to the use of vibrato, but she also discusses recent techniques such as multiphonics, microtones, altered timbres, and extended range, to name a few. Van Cleve bolsters this book with numerous music examples and professionally tested fingering charts and concludes with basic information about the use of electronics for amplification, recording, and sound enhancement. The book's appendixes include a substantial bibliography of music and literature and a discography including jazz, non-western, and art music recordings. The revised edition incorporates new information about resources now available through the internet and marks the launch of a website that includes examples of all the contemporary sounds as well as audio and video recordings of unreleased compositions. *The Clarinet*, 2006 *Making and Adjusting Single Reeds* Phillip Rehfeldt, 1991. Subjects include breaking in, cutting reeds from tubes, cane equipment, miscellaneous ideas, and suggestions, sources for cane and equipment, bibliography. **Guide to Playing Woodwind Instruments** Phillip Rehfeldt, 2010-01-01. Volumes 1 and 2 provide information sufficient for getting players to the beginning professional level: embouchures, concepts of blowing, tone, fingerings, reeds, practicing, performing, beginning methods for each instrument, samples from the orchestral repertoire, college woodwind class materials, Bach's complete Clavier Buchlein for woodwinds with analysis, and a means for those who wish it for certification. *The Teaching of Instrumental Music* Richard J. Colwell, Michael P. Hewitt, 2024-11-14. The Teaching of Instrumental Music, Sixth Edition, introduces music education majors to basic instrumental pedagogy for the instruments and ensembles commonly found in the elementary and secondary curricula.
