Reforming the Art of Living Rico Vitz,2014-10-20 Descartes s concern with the proper method of belief formation is evident in the titles of his works e g The Search after Truth The Rules for the Direction of the Mind and The Discourse on Method of rightly conducting one s reason and seeking the truth in the sciences It is most apparent however in his famous

discussions both in the *Meditations* and in the *Principles* of one particularly noteworthy source of our doxastic errors namely the misuse of one's will What is not widely recognized let alone appreciated and understood is the relationship between his concern with belief formation and his concern with virtue In fact few seem to realize that Descartes regards doxastic errors as moral errors and as sins both because such errors are intrinsically vicious and because they entail notably deleterious social consequences Reforming the Art of Living seeks to rectify this rather common oversight in two ways First it aims to elucidate the nature of Descartes's account of virtuous belief formation Second it aims both i to illuminate the social significance of Descartes's philosophical program as it relates to the understanding and practice not of science but of religion and ii to develop a kind of Leibnizian critique of this aspect of his program More specifically it aims to show that Descartes's project is dangerous insofar as it is subversive not only of traditional Christianity but also of other traditional forms of religion both in theory and in practice
