Radiologic Findings In Skin Diseases:

Radiological Findings in Skin Diseases and Related Conditions Martti Kormano, Ilmari Lindgren, Inkeri Helander, 1999

Dermatologic syndromes are seldom mentioned in the traditional radiologic textbooks. On the other hand, in the traditional textbooks on dermatology, potential radiological findings are often ignored. About 20% of the patients in general practice have skin problems in about two hundred disorders, and malignant diseases: the first lesion often appears on the skin and radiological abnormalities appear at the same time. The systematic treatment of skin diseases with concurrent radiological findings in this book provides additional important information for the diagnosis of the condition. Summarizing the clinical features of the disorders and syndromes, the book also serves as a short reference book. **Neuroradiological Imaging of**

Skin Diseases and Related Conditions Daniel Thomas Ginat, 2018-11-30. The book will be an invaluable clinical resource for both neuroradiologists and dermatologists. Patients with skin diseases often undergo neuroradiological imaging, and it is therefore important for neuroradiologists to be familiar with the various types of dermatological conditions and their imaging appearances. **Radiology of Infectious**
