Reconceptualizing the Literacies in Adolescents' Lives Donna E. Alvermann, Kathleen A. Hinchman, David W. Moore, Stephen F. Phelps, Diane R. Waff, 2007-07-10 Reconceptualizing the Literacies in Adolescents Lives Second Edition focuses on exploring the impact of young people's identity making practices in mediating their perceptions of themselves as readers and writers in an era of externally mandated reforms What is different in the Second Edition is its emphasis on the importance of valuing adolescents' perspectives in an era of skyrocketing interest in improving literacy instruction at the middle and high school levels driven by externally mandated reforms and accountability measures A central concern is the degree to which this new interest takes into account adolescents' personal social and cultural experiences in relation to literacy learning In this new edition of Reconceptualizing the Literacies in Adolescents Lives students' voices and perspectives are featured front and center in every chapter Particular attention is given throughout to multiple literacies especially how information and new communication technologies are changing learning from and with text Nine of the 15 chapters are new all other chapters are thoroughly updated The volume is structured around four main themes Situating Adolescents' Literacies addressing how young people use favorite texts to perform their identities how they counter school

based constructions of incompetence and how they re construct their literate identities in relation to certain kinds of gendered expectations pedagogies and cultural resources Positioning Youth as Readers and Writers stressing the importance of classroom discourse cultural capital agency and democratic citizenship in mediating adolescents literate identities Mediating Practices in Young People s Literacies looking at issues of language social class race and culture in shaping how adolescents represent themselves and are represented by others and Changing Teachers Teaching Changes capturing the productive ambiguities associated with teaching urban adolescents to read and write in changing times encouraging students to conduct action research on topics that are personally relevant and using enabling constraints as a concept to formulate policies on adolescent literacy instruction Reconceptualizing the Literacies in Adolescents Lives Second Edition is an essential volume for researchers faculty teacher educators and graduate students in the field of adolescent literacy education

Science Education as a Pathway to Teaching Language Literacy ,2010-01-01 In this era of mandated high stakes and standardized testing teachers and schools officials find themselves struggling to meet the demands for improved student achievement At the same time they are also expected to teach all subjects as required by national and state curriculum standards Because of these competing demands science is not even taught or taught less often in order to make more room for mathematics and language arts drill and practice and teaching to the test Anyone concerned with providing students with a well rounded education should ask whether these drastic measures even if they were to show improvement in achievement justify denying children access to the unique opportunities for intellectual growth and social awareness that the effective instruction of science provides Will these students have enough exposure to the science curriculum to prepare them to do well later in middle and high school How is this current situation going to help ameliorate the pervasive achievement gap in science and how is it going to motivate students to pursue science related careers The authors of this book believe that instead of sacrificing the science curriculum to make more time for drill and practice in mathematics and language arts what should be done is to connect current research on literacy and science instruction with effective pedagogy Therefore this volume provides fresh theoretical insights and practical applications for better understanding how science can be used as a pathway to teaching literacy and hence as a pathway to improving teachers practice and students learning *Resources in Education* ,2001
