Across the Iron Curtain Christopher D. Hollings,2015-12-12 This monograph provides a concise introduction to the tangled
 issues of communication between Russian and Western scientists during the Cold War It details the extent to which mid
 twentieth century researchers and practitioners were able to communicate with their counterparts on the opposite side of
 the Iron Curtain Drawing upon evidence from a range of disciplines a decade by decade account is first given of the varying
 levels of contact that existed via private correspondence and conference attendance Next the book examines the exchange of
 publications and the availability of one side s work in the libraries of the other It then goes on to compare general language
 abilities on opposite sides of the Iron Curtain with comments on efforts in the West to learn Russian and the systematic
 translation of Russian work In the end author Christopher Hollings argues that physical accessibility was generally good in
 both directions but that Western scientists were afflicted by greater linguistic difficulties than their Soviet counterparts
 whose major problems were bureaucratic in nature This volume will be of interest to historians of Cold War science
 particularly those who study communications and language issues In addition it will be an ideal starting pointing for anyone
