Russias Food Policies And Globalization:

Russia's Food Policies and Globalization Stephen K. Wegren, 2005-01-01 The post Soviet period has witnessed Russia's increasing interdependence with other nations in its food trade as in the economy as a whole President Putin has repeatedly identified international integration as an economic necessity if Russia is to share in the benefits of globalization In *Russia's Food Policies and Globalization* author Stephen K Wegren analyzes the primary questions affecting Russia and globalization How do Russia's domestic and external food policies affect its efforts at international integration How prepared is Russia for global economic integration for instance entrance into the World Trade Organization What are the structural economic and political obstacles that exist in Russia's food policies which in turn hinder closer integration In short will Russia integrate or fall behind and what is the role of food policy in deciding this crucial issue Through an analysis of Russia's contemporary food policies and strategies Wegren places Russia's economic development in a new international context Political scientists economists policymakers and scholars of the Soviet and post Soviet period as well as those interested in rural studies must read this book *Russia's Role in the Contemporary International Agri-Food Trade System* Stephen K. Wegren, Frode Nilssen, 2021-11-11 This Open Access book analyses the emergence of Russia as a global food power and what it means for global food trade Russia's strategy for food production and trade has changed significantly since the end of the Soviet period and this is the first book to take account of Russia's rise as a food power and the global implications of that rise It includes food trade policy and practice and developments in regional food trade This book will be of interest to academics and practitioners in agricultural economics international trade and international food trade *Russia's Food Revolution* Stephen K. Wegren, 2020-09-21 This book analyzes the food revolution that has occurred in Russia since the late 1980s documenting the transformation in systems of production supply distribution and consumption It examines the dominant actors in the food system explores how the state regulates food considers changes in patterns of food trade interactions with other states and discusses how all this and changing habits of consumption have impacted consumers It contrasts the grim food situation of 1980s and 1990s with the much better food situation that prevails at present and sets the food revolution in the context of the wider consumer revolution which has affected fashion consumer electronics and other sectors of the economy **Food Policy and Food Security** Stephen K. Wegren, Alexander Nikulin, Irina Trotsuk, 2018-03-28 This book provides a comprehensive analysis of Russian food policy Food policy is defined as the way government policy influences food production and distribution Russia's food policy is important for several reasons The first and most obvious reason is that a dysfunctional food policy is symptomatic of larger political and societal problems A failing food policy is often the precursor to political instability Russian food policy is also important is due to the agricultural recovery since 2004 that has allowed Russia to become self sufficient in grain production Being food sufficient in grain means that Russia is not drawing upon global grain supply Even more important Russia now produces surpluses and has become a global grain supplier Moreover

the agricultural recovery has made the country food secure traditionally defined as having enough food for a healthy life An analysis of food policy reveals that the structure of food production has changed with the emergence of mega farms called agroholdings that are horizontally and vertically integrated Agroholdings represent a concentration of capital and land with a small number of farms producing large percentages of total food output The book explores alternatives to the industrial agricultural model by discussing different variants of sustainable agriculture A final importance of Russian food policy concerns food trade Russia has become more protectionist since 2012 The food embargo against Western nations 2014 2017 is one example so too is import substitution that is a core component of food policy The book demonstrates the politicalization of external food trade Food trade and denial of access to the Russian market is used as an instrument of foreign policy to punish countries with whom Russia has disagreements Current Russian policymakers have food resources to augment support and extend national interests abroad Russia historically has cycled through periods of integration and isolation from the West This book raises the question whether a new normal has arisen that is characterized by the permanent withdrawal from integration as evidenced by its nationalist and protectionist food policy The book is entirely original rich in detail and broad in scope It is based on field work survey data a wide reading of primary sources and the secondary literature all of which are linked to important policy questions in development studies and food studies It is destined to become a classic book on Russian food policy
