Tigner, 2016-05-13 Spanning the period from Elizabeth I's reign to Charles II's restoration this study argues the garden is a primary site evincing a progressive narrative of change a narrative that looks to the Edenic as obtainable ideal in court politics economic prosperity and national identity in early modern England In the first part of the study Amy L. Tigner traces the conceptual forms that the paradise imaginary takes in works by Gascoigne Spenser and Shakespeare all of whom depict the garden as a space in which to imagine the national body of England and the gendered body of the monarch In the concluding chapters she discusses the function of gardens in the literary works by Jonson an anonymous masque playwright and Milton the herbals of John Gerard and John Parkinson and the tract writing of Ralph Austen Lawrence Beal and Walter Blithe In these texts the paradise imaginary is less about the body politic of the monarch and more about colonial pursuits and pressing environmental issues As Tigner identifies during this period literary representations of gardens become potent discursive models that both inspire constructions of their aesthetic principles and reflect innovations in horticulture and garden technology Further the development of the botanical garden ushers in a new world of science and exploration With the importation of a new world of plants the garden emerges as a locus of scientific study hybridization medical investigation and the proliferation of new ornamentals and aliments In this way the garden functions as a means to understand and possess the rapidly expanding globe      **The Garden** ,1925
