# S1 C15 16 Time Capsule R

**Robert M. Overstreet**

## S1 C15 16 Time Capsule R:

*Machine Learning in Geomechanics 2* Ioannis Stefanou, Félix Darve, 2024-11-05 Machine learning has led to incredible achievements in many different fields of science and technology. These varied methods of machine learning all offer powerful new tools to scientists and engineers and open new paths in geomechanics. The two volumes of *Machine Learning in Geomechanics* aim to demystify machine learning. They present the main methods and provide examples of its applications in mechanics and geomechanics. Most of the chapters provide a pedagogical introduction to the most important methods of machine learning and uncover the fundamental notions underlying them. Building from the simplest to the most sophisticated methods of machine learning, the books give several hands-on examples of coding to assist readers in understanding both the methods and their potential and identifying possible pitfalls.
