Early Ships and Seafaring: Water Transport Beyond Europe Seán McGrail,2015-06-30 In this volume Professor Sen McGrail introduces the reader to a relatively new branch of Archaeology the study of water transport how early rafts boats and ships were built and used Concepts such as boatbuilding traditions ship stability and navigation without instruments are first described Archaeological research is then discussed including sea levels in earlier times how to distinguish the vestigial remains of a cargo vessel from those of a fighting craft and the difference between a boat and a ship Chapters 2 and 3 the heart of the text deal with the early water transport of the Mediterranean and Atlantic Europe from the Stone Age to Medieval times Each chapter includes a description of the region s maritime geography and an exposition of its boat building traditions The third element is a discussion of the propulsion the steering and the navigation of these early vessels The sparse often jumbled remains of excavated vessels have to be interpreted a process that is assisted by consideration of early descriptions and illustrations Studies of the way traditional builders of wooden boats ply their trade today are also a great help Experimental boat archaeology is still at an early stage but when undertaken rigorously it can reveal aspects of the

vessel s capabilities Such information is used in this volume to further our understanding of data from boat and ship excavations and to present as coherent comprehensive and accurate a picture as is now possible of early European boatbuilding and use

Jessica M Fletcher Kari L Hayes Kathryn Howley Stephen Humphries Keith Miller Vanessa Muros Robyn Price David Rubinstein Judith Southward Jason Weinman Back to the Garden James H. S. McGregor, 2015-02-10 The garden was the cultural foundation of the early Mediterranean peoples they acknowledged their reliance on and kinship to the land and they understood nature through the lens of their diversely cultivated landscape Their image of the garden underwrote the biblical book of Genesis and the region s three major religions In this important melding of cultural and ecological histories James H S McGregor suggests that the environmental crisis the world faces today is a result of Western society s abandonment of the First Nature principle of the harmonious interrelationship of human communities and the natural world The author demonstrates how this relationship which persisted for millennia effectively came to an end in the late eighteenth century when nature came to be equated with untamed landscape devoid of human intervention McGregor s essential work offers a new understanding of environmental accountability while proposing that recovering the original vision of ourselves not as antagonists of nature but as cultivators of a biological world to which we innately belong is possible through proven techniques of the past **The Gordion Wooden Objects, Volume 1 The Furniture from Tumulus MM (2-vol. set)** Elizabeth Simpson, 2010-12-15 The Furniture from Tumulus MM The Gordion Wooden Objects volume 1 is a study of the furniture from the largest tomb at Gordion Turkey excavated in 1957 by the University of Pennsylvania Museum The tomb dates to the eighth century BC and is thought to be the burial of the great Phrygian king Midas or his father The objects initially misunderstood are now identified as nine tables two serving stands two stools a chair and an open log coffin Three pieces are ornately carved and inlaid with religious symbols and complex geometric motifs The wooden objects from Gordion are now recognized as the most important collection of well preserved wooden artifacts excavated from the Near East Included in this volume are new photographs reconstruction drawings and eight scientific technical appendices Contributors include Harry Alden Burhan Aytu Mary W Ballard Robert A Blanchette Roland Cunningham Laure Dussubieux Patrick E McGovern Benjamin Held Walter Hopwood Joseph Koles Lynn E Roller Krysia Spirydowicz this work goes well beyond a typical site specific object catalogue and makes important contributions to a wide range of scholarly fields both technical and conceptual from textile and wood analysis to anthropological and religious studies Elizabeth P Baughan University of Richmond The book succeeds in its main aims of making available every scrap of information about the finds and it illuminates form techniques and function in a most convincing and stimulating manner Catherine M Draycott Courtauld Institute of Art A History of Ancient Egypt John Romer, 2013-08-20 The ancient world comes to life in the first volume in a two book series on the history of Egypt spanning the first farmers to the construction of the pyramids Famed archaeologist John Romer draws on a lifetime of research to tell one history s greatest stories how over more than a thousand years a society of farmers created a rich vivid world where one of the most astounding of all human made landmarks the Great Pyramid was built Immersing the reader in the Egypt of the past Romer examines and challenges the long held theories
