Scrutinising Science The Changing Uk Government Of Science:

Scrutinising Science R. Boden,D. Cox,M. Nedeva,K. Barker,2003-12-17 By the 1980s UK government research laboratories were an often quirky but always essential part of the state sector In one of the most radical experiments in the organization and management of scientific research attempted in the UK successive Conservative governments sought to reform these laboratories by applying the market based solution of New Public Management Scrutinising Science explores and critiques that reform process by examining the laboratories new organizational forms the new visions of what science is for implicit in the reform agenda and the new forms of scientific knowledge production that have arisen as a consequence

Scrutinising Science Rebecca Boden,2004 For many laboratories this meant some form of privatisation for the remainder it meant a significant degree of marketisation within the public sector Scrutinising Science explores and critiques that reform process by examining the laboratories new organisational forms the new visions of what science is for as defined in the reform agenda and the new forms of scientific knowledge production that have arisen as a consequence BOOK JACKET

Innovation, Science, and Institutional Change Jerald Hage,Marius Meeus,2006-10-26 Innovation is central to the dynamics and success of organizations and society in the modern world the process famously referred to by Schumpeter as gales of creative destruction This ambitious and wide ranging book makes the case for a new approach to the study of innovation It is the editors conviction that this approach must accomplish several objectives it must recognise that innovation encompasses changes in organizations and society as well as products and processes it must be genuinely interdisciplinary and include contributes from economics sociology management and political science It must be international to reflect both different patterns or systems of innovation and different research traditions and it must reflect the fundamental changes taking place in science research and knowledge creation at all levels To this end they have gathered together a distinguished group of economists sociologists political scientists and organization innovation and institutional theorists to both assess current research on innovation and to set out a new research agenda This has been achieved through careful planning and development of the project and also through the ensuing structure of the book which looks in turn at Product and Process Innovation perhaps the best established focus of existing research on innovation Scientific Research assessing the changing character of basic research and science policy Knowledge Dynamics in Context encompassing organizational learning in all its aspects and Institutional Change an analysis of the institutional context that can shape enable and constrain innovation This carefully integrated and wide ranging book will be an ideal reference point for academics and researchers across the Social Sciences interested in all dimensions of innovation be they in the field of Management Studies Economics Organization Studies Sociology Political Science and Science and Technology Studies **Innovation, Science, Environment** 06/07 G. Bruce Doern,2006-02-14 Topics include the Martin liberals and changing ISE policies the federal sustainable development strategy process the National Research Council s response to changing federal agendas a

comparison of Canadian and UK innovation strategies the Natural Sciences and Engineering Research Council and the Social Sciences and Humanities Research Council innovation strategy and the mining supply and service sector environmental industries and the role of the Canadian Environmental Technology Advancement Centres local innovation and source water protection and information disclosure as an environmental policy instrument **Towards European Science** Linda Wedlin, Maria Nedeva, 2015-12-18 Since the European Research Area was launched at the beginning of the century significant efforts have been made to realise the vision of a coherent space for science and research in Europe But how does one define such a space and measure its development This timely book analyses the dynamics of change in the policy and governance of science and research within Europe over the past decade It widens the scope of traditional policy analysis by focusing attention on the interaction between policy rationales new governance mechanisms and the organisational dynamics of the scientific field The contributors build a novel analytical framework to understand the European research space as one shifting from a fragmented space of Science in Europe to one that is labeled European Science The chapters explore the dynamics of this shift through the lenses of political science organisation theory science policy and related analytical traditions Towards European Science is an interdisciplinary book which will attract a wide set of scholars and professionals interested in science policy governance and scientific practice It will also be of use to university leaders and managers as well as policy makers and practitioners working on issues of internationalisation and the Europeanisation of science

Applied Science Robert Bud, 2024-03-28 For almost two centuries the category of applied science was widely taken to be both real and important Then its use faded How could an entire category of science appear and disappear By taking a longue dur e approach to British attitudes across the nineteenth and twentieth centuries Robert Bud explores the scientific and cultural trends that led to such a dramatic rise and fall He traces the prospects and consequences that gave the term meaning from its origins to its heyday as an elixir to cure many of the economic cultural and political ills of the UK eventually overtaken by its competitor technology Bud examines how applied science was shaped by educational and research institutions sociotechnical imaginaries and political ideologies and explores the extent to which non scientific lay opinion mediated by politicians and newspapers could become a driver in the classification of science Strategic Science in the Public Interest G. Bruce Doern, Jeffrey S. Kinder, Jeff Kinder, 2007-01-01 The past twenty years have seen considerable shifts and struggles in government science that is in the way the state funds supports regulates conducts and uses scientific and technological activity Focusing on federal labs and agencies Strategic Science in the Public Interest explores how these labs have been located within and often buried by the larger commercially focussed federal innovation agenda G Bruce Doern and Jeffrey S Kinder examine four labs whose mandates deal with the Alberta oil sands environmental technologies wildlife research and mining and metals respectively The authors use these cases to explain why a better middle level approach to analysis is needed for strategic public interest centred government science They illustrate the importance of understanding

the variety as well as the similarity of federal science and technology labs and agencies and of instituting policies that reflect this diversity The growing importance of Related Science Activities RSA is also explored as well as the core trade offs between commercial and public goods science in their mandates and their internal capacities *Handbook on the Politics of Higher Education* Brendan Cantwell, Hamish Coate, Roger King, 2018 Understanding the politics of Higher Education is becoming more important as the sector is increasingly recognised as a vital source of innovation skills economic prosperity and personal wellbeing Yet key political differences remain over such issues as who should pay for higher education how should it be accountable and how we measure its quality and productivity Particularly are states or markets the key in helping to address such matters The Handbook provides framing perspectives and perspectives chapters on funding governance and regulation and pieces on the political economy of higher education and on the increased role of external stakeholders and indicators Research for the Developing World Bruce Currie-Alder, 2015-10-08 Research for the developing world can generate evidence on the effectiveness of foreign aid invent new technologies that serve poor people and strengthen research capabilities in poor countries How do countries determine which of these policy goals to pursue Examining the United Kingdom Canada and Australia reveals how each country established a unique approach to research funding Programs and grantmaking evolved in response to various expectations across government tempered by the need to remain credible in the scientific community This book explores the histories of the UK Department for International Development DFID Canada's International Development Research Centre IDRC and the Australian Centre for International Agricultural Research ACIAR Looking back changes in research governance encouraged a shift towards whole of government priorities shorter timeframes for realizing results and performance predicated on academic productivity and research impact Whereas funders used to encourage small is beautiful with local experiments in development today the emphasis is on getting to scale delivering innovation through self financing models Looking forward research for the developing world is fading as part of development assistance yet rising as collaboration on common global challenges Funders are adopting new definitions of performance and actively shaping policy to connect science and international development Leaders are brokering partnerships that connect research governance at home and abroad bridging the incentives towards academic productivity and research impact In short the future of research for the developing world is moving from foreign aid to science diplomacy *The SAGE Handbook of Qualitative Research* Norman K. Denzin, Yvonna S. Lincoln, 2017-01-05 The substantially updated and revised Fifth Edition of this landmark handbook presents the state of the art theory and practice of qualitative inquiry Representing top scholars from around the world the editors and contributors continue the tradition of synthesizing existing literature defining the present and shaping the future of qualitative research The Fifth Edition contains 19 new chapters with 16 revised making it virtually a new volume while retaining six classic chapters from previous editions New contributors to this edition include Jamel K Donnor and Gloria Ladson Billings Margaret Kovach Paula Saukko Bryant

Public Funding of Research Benedetto Lepori, Ben Jongbloed, Diana Hicks, 2023-03-02 Given the recent re evaluation of research funding policy as an issue central to national governments and the EU it is imperative that underlying rationales and channels for investment in research and development are examined A pioneering analysis of the complexity allocation and management of public funding of research this Handbook explores the strategies whereby research can be successfully targeted and supported to resolve problems of broad public concern **Collecting and Interpreting Qualitative**

Materials Norman K. Denzin, Yvonna S. Lincoln, 2012-10-24 This book is the third of three paperback volumes taken from The SAGE Handbook of Qualitative Research Fourth Edition It introduces the researcher to basic methods of gathering analyzing and interpreting qualitative empirical materials Part 1 moves from narrative inquiry to critical arts based inquiry to oral history observations visual methodologies and autoethnographic methods It then takes up analysis methods including computer assisted methodologies focus groups as well as strategies for analyzing talk and text The chapters in Part II discuss evidence interpretive adequacy forms of representation post qualitative inquiry the new information technologies and research the politics of evidence writing and evaluation practices **The Transformation of University Institutional and**

Organizational Boundaries Emilia Primeri, Emanuela Reale, 2015-11-02 An emerging issue in higher education studies is that of boundaries crossing This is the main topic of the book The transformation of University institutional and organizational boundaries Several signals of shifting boundaries can be envisaged in higher education and research institutions which could be glimpsed through organizations the institutions and changes to the academic profession That of boundaries crossing in Higher Education is a complex and heterogeneous issue which characterizes scientific knowledge today and represents a key issue when looking at University transformations across contexts and policies instruments and practices The analysis of boundaries supplies interpretative frameworks for the interactions between the development of professions and disciplines as well as the relationships of the science with various parts of society such as state professionals and the market Fuelling further the discussion on HEIs transformations allows capturing changes in the function objectives and scope of higher education and research institutions the move beyond sectoral and disciplinary boundaries and the increasingly blurred boundaries of academic professions and of scientific work Public policies and HE reforms can push or impede the mentioned transformations but they can also derive from individual likelihood of moving in blurring spaces or from the transformations of the epistemic communities and the emergence of new fields and sectors Hence changes are there open to our observations **Society, Culture and Technology at the Dawn of the 21st Century** Katarzyna

Leszczyńska, Janusz Mucha, 2010-04-16 The articles in this collection analyse methodological aspects of today's hard sciences and humanities and of applied research in the field of high technology. The authors explore structural and cultural contexts of scientific research relations between information technologies and our everyday life as well as relations between innovation and business culture.

Prospects of Higher Education, 2007-01-01 As common global problems accumulate research and higher education become ever more vital. At the same time global convergence is transforming the prospects of higher education institutions. Local and national affairs are no longer the ultimate horizon creating much scope for cross border initiative and invention in both knowledge and university strategy. Yet the new freedoms are not experienced equally in all localities. Differences between nations are still determining. As the older barriers are stripped away this enhances the capacity of strong universities and systems to dominate the rest though new players are emerging. There are many possible trajectories for the university. The future is open and the 22 authors in *Prospects of Higher Education* explore it from three perspectives: the world as a whole, the Americas and particular localities and regions. Moving beyond nation centered analysis of states and markets *Prospects* uses concepts of public and private goods to map the potentials for global trade and university rankings, common knowledge, benefits and multilateral policy action, national stratification and the wash back effects in systems and institutions. Broad and imaginative, methodologically innovative and policy sharp, this book has much for government and university leaders, scholars of higher education and anyone interested in public policy.

Higher Education and National Development, David Bridges, Palmira Juceviciene, Roberta Jucevicius, Terence H. McLaughlin, Jolanta Stankeviciute, 2006-11-27 Universities and societies around the world are involved in significant transition. Universities are now invited to expand their central aims and purposes in order to embrace a role in relation to the development of the societies in which they are located. This change of focus has major implications for curricula, modes of teaching and the student body. International contributors to this wideranging text discuss different aspects of the phenomenon of globalisation in relation to higher education but also in relation to moves by nation states to devolve government to regional and subregional bodies and the implications this has for educational systems.

Economics of the European Union, Michael Artis, Frederick Nixon, 2007-05-17 The new edition of this successful text analyses the current economic issues facing a rapidly changing Europe. The authors combine policy history and data to present a global perspective of the EU written with a range of students taking an introductory module in European Economics in mind. With new material on the economic relationship between the EU and the US, Enlargement and the Lisbon process the authors consider the changing landscape and Europe's development as a major global player. The authors use history, theory and analysis including comparative data to evaluate Economic policies ranging from the Common Agricultural Policy and Competition Policy to Social Policy and Monetary Policy and to assess issues such as unemployment and foreign aid. The contributors are drawn from a range of Universities such as Vienna, Manchester, Brussels, LSE and Purdue as well as institutions such as the IMF and the European

Central Bank *World Yearbook of Education 2008* Debbie Epstein, Rebecca Boden, Rosemary Deem, Fazal Rizvi, Susan Wright, 2013-01-11 This volume examines higher education in globalized conditions through a focus on the spatial historic and economic relations of power in which it is embedded Distinct geometries of power are emerging as the knowledge production capability of universities is increasingly globalized Changes in the organization and practices of higher education tend to travel from the West to the rest Thus distinctive geographies of knowledge are being produced intersected by geometries of power and raising questions about the recognition production control and usage of university produced knowledge in different regions of the world What flows of power and influence can be traced in the shifting geographies of higher education How do national systems locate themselves in global arenas and what consequences does such positioning have for local practices and relations of higher education How do universities and university workers respond to the increasing commodification of knowledge How do consumers of knowledge assess the quality of the goods on offer in a global marketplace The 2008 volume of the World yearbook addresses these questions highlighting four key areas Producing and Reproducing the University How is the university adapting to the pressures of globalization Supplying Knowledge What structural and cultural changes are demanded from the university in its new role as a free market supplier of knowledge Demanding Knowledge Marketing and Consumption How can consumers best assess the quality of education on a global scale Transnational Academic Flows What trends are evident in the flow of students knowledge and capital with what consequences The 2008 volume is interdisciplinary in its approach drawing on scholarship from accounting finance and human geography as well as from the field of education Transnational influences examined include UNESCO and OECD GATS and the effects of digital technologies Contrasting contexts include Central and Eastern Europe Finland China and India and England With its emphasis on the interrelationship of knowledge and power and its attention to emergent spatial inequalities Geographies of Knowledge Geometries of Power Framing the Future of Higher Education provides a rich and compelling resource for understanding emergent practices and relations of knowledge production and exchange in global higher education Corporate Governance and the Nuclear Industry Barry Pemberton, 2015-09-16 Corporate Governance and the Nuclear Industry explores the UK nuclear Legacy governance issues associated with the decommissioning of a range of early generation civil nuclear facilities This book traces how we got here and the risks that have been taken whilst presenting new research and thinking that is required to manage our nuclear Legacy The book addresses a new analytical approach using notions of governance to review key historic events This approach analyses these events using concepts of stakeholder control accountability and regulation Using these concepts and undertaking a more detailed analysis of the Legacy s current governance arrangements the conventional public sector based solutions that attempt to harness private sector expertise this book will contrast these with government responses to determine the degree of control over the Legacy and any possible control issues Corporate Governance and the Nuclear Industry concludes that we need to recognise the

legacy's problems as exceptional rather than prosaic and suggests that this requires exceptional governance solutions rather than the current form that is clearly failing Research and Innovation Policy G. Bruce Doern, Christopher Stoney, 2009-01-01 This collection is the first systematic examination of the evolving relationship between the federal government and Canadian universities as revealed through changes in federal research and innovation policies
