European Integration and the Atlantic Community in the 1980s Kiran Klaus Patel,Kenneth Weisbrode,2013-09-02 This unique collection of essays lays the groundwork for the study of the intersection of European integration and transatlantic relations in the 1980s With archives for this period only recently being opened scholars are beginning to analyse and understand what some have called a peak moment in the European project and others have called the Second Cold War How do these moments intersect and relate to one another These essays by prominent scholars from Europe and the United States examine these and related questions while challenging the 1980s itself as a useful demarcation for historical analysis

Strategic Defence and Future of the Arms Race John P. Holdren,Joseph Rotblat,1987-06-01 Ronald Reagan and His Quest to Abolish Nuclear Weapons Paul Lettow,2005-02-01 Ronald Reagan s Strategic Defense Initiative SDI has puzzled scholars and commentators Some have claimed that it was a purely political maneuver while others have explained it as a ruse conjured up by presidential advisers to weaken Soviet resolve These assumptions however fail to acknowledge the depth of Reagan s involvement in nuclear abolition and how passionately committed Reagan was to the pursuit of this goal In Ronald Reagan and His Quest to Abolish Nuclear Weapons Paul Lettow renders untenable the persistent belief that Reagan was an ideologically shallow figurehead Reagan s wish to ban nuclear armament first came to light in 1945 just months after the Hiroshima and Nagasaki bombings While sidestepping political partisanship Lettow demonstrates that scholars and historians have largely neglected to assess properly the influence of Reagan s ideal and how it led to one of the most important if the least understood of Reagan s accomplishments In a narrative that covers the start of Reagan s presidency and the 1986 Reykjav k summit between Reagan and Soviet leader Mikhail Gorbachev during which SDI was a defining issue we see SDI for what it was a full on assault against nuclear weapons waged as much through policy as through ideology

While cabinet members and advisers Secretary of State George Shultz and Defense Secretary Caspar Weinberger among them played significant roles it was Ronald Reagan himself who presided over every element large and small of this paradigm shift in U S diplomacy Lettow conducted interviews with former Reagan officials four of his six national security advisers both of his ambassadors to the USSR and both of his defense secretaries He also draws upon the vast body of declassified security documents from the Reagan presidency much of what he quotes from these documents appears publicly here for the first time The result is the first major work to apply such evidence to the study of SDI and superpower diplomacy In Ronald Reagan and His Quest to Abolish Nuclear Weapons Paul Lettow does not simply add nuance to the existing record he revises our very understanding of the Reagan presidency

The Strategic Defense Initiative Ralph L. Dietl, 2018-08-15 The Nuclear and Space Talks revolutionized arms control The Cold War endgame commenced with the umbrella negotiations that linked START and INF negotiations to a regulation on the weaponization of space This volume reveals a US grand strategy to replace deterrence with a collective security order An entente of the superpowers was needed to transform bipolarity The US planned the replacement of mutually assured destruction by mutually assured security A global astrodome was to protect a nuclear disarmed world The Franco German special relationship in European affairs had to be amended by a US SU special relationship to replace classic bloc politics The Reagan Administration planned a global zero agenda a joint development of a global protective system and a creation of a Common House of Europe In brief the superpowers prepared the velvet revolution that eliminated the Cold War structures Neither containment nor convergence offers a valid explanation of the Cold War endgame Co creation is the key to decipher the end of the Cold War NATO Europe challenged the transformation of bipolarity The European NWS resisted to a multilateralization of strategic arms control In Europe the classic Cold War thinking survived the fall of the Iron Curtain European conservatism contributed to the geopolitical catastrophe of the first order the downfall of the Soviet Union The Reagan Administration developed a Grand Strategy to end the Cold War The US SU co creation of an astrodome was meant to ease a global zero agenda A global collective security structure under the United Nations was to replace deterrence The superpower project collapsed due to the penetration of US decision making by NATO Allies The European NWS totally objected to a multilateralization of strategic arms control to preserve their relative position in the international system

NATO's Conventional Defences Stephen J. Flanagan, 1988-10-07 A review of the full range of recent official and non official schemes for improving NATO s conventional posture from exploitation of emerging technologies to non provocative defences in the light of prevailing military political economic and demographic trends
