Stewart,2013-10-08 First published in 1969 this was a new assessment of Freud's most creative years and the formative period in psychoanalysis and was the first book to attempt a systematic presentation of Freud's early ideas relating them to his later work and to contemporary psychoanalysis During the years 1888 1898 Freud published 15 papers and one book In addition many of his ideas were formulated in a series of letters and drafts that he wrote to Dr Wilhelm Fliess This material provided new insights into the nature of Freud's creative genius and gave new meaning to his published works

Psychoanalysis The First Ten Years reviews these early papers drafts and letters and describes tentative formulations that in spite of their value were not developed further because of lack of time or a shift in interest As Dr Stewart observes the study of this aspect of Freud's work is perhaps the most exciting Freud's creativity in these years was remarkable The ideas he discarded in this short period of time would for a less gifted person have been a full life's work of which he could have been proud There is a good deal of historical and literary interest in his account of Freud's relationships with Fliess Breuer and others but the core of the book is the critical assessment and systematic presentation of Freud's early major insights which dramatically reveal a creative genius in the process of discovery **Virginia Reports** ,1901 Waste Isolation Pilot Plant Disposal Phase, Disposal of Transuranic Waste, Carlsbad ,1996 **Human Life, Action and Ethics** G.E.M.
