Pack, 1971      *Naval Blockades and Seapower* Bruce A. Elleman, S. C. M. Paine, 2006 This book is one of the first scholarly works to address the problem of naval blockades from a multi national perspective      **Sea Power in the Mediterranean, a Study for Sea Power in the Mediterranean from the Seventeenth Century to the Present Day** S. W. C. Pack, 1970      **Sea power in the Mediterranean; a study of the struggle for the sea power in the Mediterranean from the 17th century to the present day** S. W. C. Pack, 1971

**Seapower** Geoffrey Till, 1994 This volume explains the evolution of maritime strategy through the twentieth century and concludes with some speculations about its future in the next century The forms and practices of navies and maritime strategy are analysed through the development of eight historical and contemporary topics drawn from the First and Second World Wars the Cold War and post Cold War period      **Russian Seapower and 'the Eastern Question' 1827-41** John C.K. Daly, 1991-06-18 Focusing on the Black Sea fleet between 1827 1841 this book assesses Russia s naval strength against other Mediterranean powers especially the Ottoman Empire arguing their limitations came from geographic political and economic considerations Primary and secondary sources are utilized      *Seapower States* Andrew Lambert, 2018-11-27 A fascinating geopolitical chronicle A superb survey of the perennial opportunities and risks in what Herman Melville called the watery part of the world The Wall Street Journal In this volume one of the most eminent historians of our age investigates the extraordinary success of five small maritime states Andrew Lambert author of *The Challenge Britain Against America in the Naval War of 1812* winner of the prestigious Anderson Medal turns his attention to Athens Carthage Venice the Dutch Republic and Britain examining how their identities as seapowers informed their actions and enabled them to achieve success disproportionate to their size Lambert demonstrates how creating maritime identities made these states more dynamic open and inclusive than their lumbering continental rivals Only when they forgot this aspect of their identity did these nations begin to decline Recognizing that the United States and China are modern naval powers rather than seapowers is essential to understanding current affairs as well as the long term trends in world history This volume is a highly original big think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered how to do so in ways that are consistent with their values and sometimes how to negotiate the descent from being a great power when the cards just aren t in their favor any more These are timely questions Times Higher Education Supplement Lambert is without a doubt the most insightful naval historian writing today The Times      *Twenty-First Century Seapower* Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of

emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general Ottoman Seapower and Levantine Diplomacy in the Age of Discovery Palmira Johnson

Brummett,1994-01-01 This work reframes sixteenth century history incorporating the Ottoman empire more thoroughly into European Asian and world history It analyzes the Ottoman Empire s expansion eastward in the contexts of claims to universal sovereignty Levantine power politics and the struggle for control of the oriental trade Challenging the notion that the sixteenth century Ottoman Empire was merely a reactive economic entity driven by the impulse to territorial conquest Brummett portrays it as inheritor of Euro Asian trading networks and participant in the contest for commercial hegemony from Genoa and Venice to the Indian Ocean Brummett shows that the development of seapower was crucial to this endeavor enabling the Ottomans to subordinate both Venice and the Mamluk kingdom to dependency relationships and providing the Ottoman ruling class access to commercial investment and wealth **International Law of the Sea and Marine Affairs**
