## Sea Watch:

The New Internationalists Sue Clayton, 2020-12-29 An account of the mobilization of thousands of volunteers who rescued supported and welcomed refugees during the recent European refugee crisis In The New Internationalists Sue Clayton tells the story of the largest civic mobilization since the Second World War when volunteers many young and untrained took on unimaginable responsibilities and saved thousands of lives During the European refugee crisis of 2015 2020 they witnessed first hand the catastrophic failure of established NGOs and the indifference and frequently the open hostility of the EU and national governments Many faced state hostility themselves Their accounts show how activist volunteers have shaped today s European humanitarian agenda and provide a powerful critique of failures of current policy Hearings United States. Congress. Joint Committee ..., 1948 Constitutionalising Social Media Edoardo Celeste, Amélie Heldt, Clara Iglesias Keller, 2022-06-30 This book explores to what extent constitutional principles are put under strain in the social media environment and how constitutional safeguards can be established for the actors and processes that govern this world in other words how to constitutionalise social media Millions of individuals around the world use social media to exercise a broad range of fundamental rights However the governance of online platforms may pose significant threats to our constitutional guarantees The chapters in this book bring together a multi disciplinary group of experts from law political science and communication studies to examine the challenges of constitutionalising what today can be considered the modern public square The book analyses the ways in which online platforms exercise a sovereign authority within their digital realms and sheds light on the ambiguous relationship between social media platforms and state regulators The chapters critically examine multiple methods of constitutionalising social media arguing that the constitutional response to the global challenges generated by social media is necessarily plural and multilevel All topics are presented in an accessible way appealing to scholars and students in the fields of law political science and communication studies The book is an essential guide to understanding how to preserve constitutional safeguards in the social media environment **Hearings** United States. Congress. House. Committee on Merchant Marine and Fisheries, 1935 Transnational Mobility and Externalization of EU Borders Robel Afevorki Abay, Petra Danková, Tanja Kleibl, Nikos Xypolytas, 2024-01-22 Transnational Mobility and Externalization of EU Borders Social Work Migration Management and Resistance addresses the topics of social work and international migration with specific focus on the consequences of EU border externalization policies The increasingly authoritarian character of EU border management raises a number of issues related to the role of social work within a context that is heavily charged both ideologically and politically After theoretically and historically contextualizing externalization with explicit attention to neo colonial genealogies of the current migration regimes this book examines the complex inter relations of social workers with key actors namely mobile people policy makers or funders Particular attention is paid to the socio economic and political impacts of the global Covid 19 pandemic on social work with variously categorized

people moving across borders or immobilized in camps. Finally the book explores how social workers and refugees resist violent migration controls and increasing criminalization of cross border movements. This volume brings together contributions located in the so called countries of origin and transit targeted by EU externalization interventions as well as EU countries in which social workers deal with the effects of border externalization and internalization.

**Europe's Migration Crisis** Vicki Squire, 2020-09-17 Rejecting claims that migration is a crisis for Europe this book instead suggests that the migration crisis reflects a more fundamental breakdown of a modern European tradition of humanism. Squire provides a detailed and broad ranging analysis of the EU's response to the crisis highlighting the centrality of practices of governing migration through death and precarity. Furthermore she unpacks a series of pro migration activist interventions that emerge from the lived experiences of those regularly confronting the consequences of the EU's response. By showing how these advance alternative horizons of solidarity and hope Squire draws attention to a renewed humanism that is grounded both in a deepened respect for the lives and dignity of people on the move and an appreciation of longer histories of violence and dispossession. This book will be of interest to scholars and researchers working on migration in political science international relations European studies law and sociology.

**Hierarchies and exclusion in humanitarianism** Clara Egger, 2025-06-24 While humanitarians generally present themselves as do gooders and use this image to gather support and funding this edited volume addresses hierarchies and exclusions in humanitarianism an issue that has gained increased attention. Contributions analyse how hierarchies power asymmetries and exclusion emerge are maintained and can ultimately be challenged in humanitarian governance. Leading scholars on humanitarianism coming from a variety of disciplinary fields such as international relations philosophy organisational science and management and sociology analyse exclusion dynamics at the individual organisational and structural levels. Authors thereby combine data from a diverse range of methods including ethnography survey and statistical analysis. The volume informs current efforts to increase inclusiveness and equity in humanitarian practice.

*Citizen Humanitarianism at European Borders* Maria Gabrielsen Jumbert, Elisa Pascucci, 2021-06-16 At a time of escalating conflict between states and NGOs engaged in migrant search and rescue operations across the Mediterranean this book explores the emerging trend of citizen led forms of helping others at the borders of Europe. In recent years Europe's borders have become new sites of intervention for traditional humanitarian actors and governmental agencies but also increasingly for volunteer and activist initiatives led by ordinary citizens. This book sets out to interrogate the shifting relationship between humanitarianism the securitization of border and migration regimes and citizenship. Critically examining the do it yourself character of refugee aid practices performed by non

professionals coming together to help in informal and spontaneous manners the volume considers the extent to which these new humanitarian practices challenge established conceptualisations of membership belonging and active citizenship Drawing on case studies from countries around Europe including Greece Turkey Italy France and Russia this collection constitutes an innovative and theoretically engaged attempt to bring the field of humanitarian studies into dialogue with studies of grassroots refugee aid and more explicitly with political forms of solidarity with migrants and refugees which fall between aid and activism This book is key reading for advanced students and researchers of humanitarian aid European migration and refugees and citizen led activism The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

**Securitization** Alice Massari,2021-05-18 This open access book offers an innovative account of how relief organizations visual depiction of Syrian displacement contributes to reproduce and reinforce a securitized account of refugees Through visual analysis the book demonstrates how the securitization process takes place in three different ways First of all even if marginally it occurs through the reproduction of mainstream media and political accounts that have depicted refugees in

terms of threats Secondly and more consistently through a representation of Syrian displaced people that despite the undeniable innovative aesthetic patterns focusing on dignity and empowerment continue to reinforce a visual narrative around refugees in terms of victimhood and passivity The reproduction of a securitized account takes also place through the dialectic between what is made visible in the pictures and what is not At the same time the book identifies visual glimmers and minor displacements in the humanitarian discourse that have the potentiality to produce alternative discourses on refugees and displacement beyond the mainstream securitized ones By showing how relief organizations visual representation contributes to the securitization of the refugee issue this book provides a great resource to students and academics in migration visuality humanitarianism and securitization as well as social scientists and policy makers
