## **Seamless Society:**

**Seamless Leadership** Adriaan Groenewald, 2015-03-13 For most of the lifespan of the new South Africa leadership consultant Adriaan Groenewald has interviewed and written about top political corporate entertainment and sports leaders His leadership model embraces the legacy of Nelson Mandela to unselfishly unite people around the creation of positive movement towards the impossible while fearlessly openly embracing and confronting all obstacles along the way What makes a seamless leader The book combines theory and practice in subjects such as decision making combining success and values igniting passion and shifting attitude performance multiplying leaders for real impact motivation courageous conversations and leading in difficult times or sensitive situations Short chapters are complemented by interview sections which illuminate principles learned from personal leadership conversations with individuals from different sectors of society ranging from President Jacob Zuma to Helen Zille and Sizwe Nxasana to Mike Brown

**Thinking about Society: Theory and Practice** Ian Jarvie, 2012-12-06 I C Jarvie was trained as a social anthropologist in the center of British social anthropology the London School of Economics where Bronislaw Malinowski was the object of ancestor worship Jarvie s doctorate was in philosophy however under the guidance of Karl Popper and John Watkins He changed his department not as a defector but as a rebel attempting to exorcize the ancestral spirit He criticized the method of participant observation not as useless but as not comprehensive it is neither necessary nor sufficient for the making of certain contributions to anthropology rather it all depends on the problem situation And so Jarvie remained an anthropologist at heart who in addition to some studies in rather conventional anthropological or sociological molds also studied the tribe of social scientists but also critically examining their problems especially their overall rather philosophical problems but not always so a few of the studies included in this volume exemplify his work on specific issues whether of technology or architecture or nationalism in the academy or moviemaking or even movies exhibiting excessive sex and violence These studies attract his attention both on account of their own merit and on account of their need for new and powerful research tools such as those which he has forged in his own intellectual workshop over the last two decades

**Learning across Contexts in the Knowledge Society** Ola Erstad, Kristiina Kumpulainen, Åsa Mäkitalo, Kim Christian Schrøder, Pille Pruulmann-Vengerfeldt, Thuridur Jóhannsdóttir, 2016-02-10 Developments within the knowledge society especially those resulting from technological innovation have intensified an interest in the relationship between different contexts and multiple sites of learning across what is often termed as formal non formal and informal learning environments The aim of this book is to trace learning and experience across multiple sites and contexts as a means to generate new knowledge about the borders and edges of different practices and the boundary crossings these entail in the learning lives of young people in times of dynamic societal environmental economic and technological change The empirical research discussed in this book has grown out of a Nordic network of researchers The research initiatives in the Nordic countries tend to avoid the more spectacular debates over the

future of the educational institutions that tend to dominate and obscure discussions on education in the knowledge society and which look to models of informal learning whether in the learning communities of workplaces and families or in the new socio technical spaces of the Internet as a source of alternative educational strategies Rather Nordic researchers more modestly ask whether it is possible to envisage new models of teaching and learning which take seriously both the responsibility to social justice and social wellbeing which at least rhetorically underpinned a commitment to mass education of the 20th century as well as to the radical challenges to traditional educational models offered by the new socio technical spaces and practices of the 21st century      *Seamless Learning in the Age of Mobile Connectivity* Lung-Hsiang Wong, Marcelo Milrad, Marcus Specht, 2014-11-02 The book departs from the approach of related titles by focusing on describing and reflecting upon the notion of seamless learning with regard to salient characteristics of learner mobility and bridging of learning experiences across learning spaces It is the first such work that is solely dedicated to research on and the practice of seamless learning uniquely combining interpretations visions and past research on and practices in seamless learning from diversified perspectives The book also strikes a good balance between theoretical and practical perspectives going beyond a collection of reports on specific research projects Instead of thick descriptions of research processes and findings readers will find significant insights and food for thought intended to inspire further advances in the research on and practice of seamless learning      **Making Global Society** Barry Buzan, 2023-08-10 Tracks the material and social conditions of humankind across history explaining how global society evolved and what its prospects are      *NBS Special Publication*, 1945      **Seamless Healthcare Monitoring** Toshiyo Tamura, Wenxi Chen, 2017-11-24 This book shares the knowledge of active and prestigious worldwide researchers and scholars in the field of healthcare monitoring as authors investigate historical developments summarize latest advancements and envision future prospects on wearable attachable and invisible devices that monitor diverse physiological information The coverage of the book spans multiple disciplines from biomechanics to bioelectricity biochemistry biophysics and biomaterials There is also wide coverage of various physical and chemical quantities such as electricity pressure flow motion force temperature gases and biomarkers Each chapter explores the background of a specific monitoring device as well as its physical and chemical principles and instrumentation signal processing and data analysis achieved outcomes and application scenarios and future research topics There are chapters on Electrocardiograms electroencephalograms and electromyograms Measurement of flow phenomenon Latest wearable technologies for the quantification of human motion Various forms of wearable thermometers Monitoring of gases and chemical substances produced during metabolism and more This book is appropriate and accessible for students and scientists as well as researchers in biomedical engineering computer engineers healthcare entrepreneurs administrative officers policy makers market vendors and healthcare personnel It helps to provide us with insights into future endeavors formulate innovative businesses and services and will help improve people s health and quality of life      Digital Culture &
