The Postcolonial Historical Novel H. Dalley, 2014-10-17 The Postcolonial Historical Novel is the first systematic work to examine how the historical novel has been transformed by its appropriation in postcolonial writing It proposes new ways to understand literary realism and explores how the relationship between history and fiction plays out in

contemporary African and Australasian writing The Squad T. Ryle Dwyer, 2030-01-01 In 1919 Michael Collins conceived of a scheme to knock out the eyes and ears of the British Administration at Dublin Castle by undermining and terrorising the police so that the British would react blindly and drive the Irish people to support of the Irish Republican Army The Bureau of Military History interviewed those involved in this scheme in the early 1950s with the assurance that the material would not be published in their lifetimes A few of the contributions were made available by the families of those involved but the bulk of them have only recently been released This is the first book to make use of those interviews It makes fascinating almost unique reading because they contain first hand descriptions in which men speak candidly of their involvement in killing selected people at close range As a result it throws a considerable amount of new light on the activities of the Squad and the intelligence operations of Michael Collins

Under the Radar M Goss, Richard McGee, 2009-09-24 It is rare for a complete biography of an Australian scientist particularly of an Australian woman scientist to be published It is rarer for such a book to be co authored by an American Although scientists have written discourses on the history of their discipline it is most unusual for a scientist to write a full length biography of a colleague in his field It is also uncommon for a man to write about an Australian woman scientist most of the work on Australian women scientists has been done by other women However these authors both distinguished researchers in the field of radio astronomy became so interested in the history of their discipline and in the career of the pioneer radio astronomer Ruby Payne Scott that they spent some years bringing this book to fruition Until relatively recently Ruby Payne Scott had been the only woman scientist mentioned briefly in histories of Australian science or of Australian radio astronomy This book will be an invaluable resource for anyone interested in these disciplines Being scientists themselves the authors explain Payne Scott's scientific work in detail therefore the value and importance of her contributions can for the first time be recognised not only by historians but also by scientists
