**The Search for Security in the Pacific 1901-1914** Neville Meaney, 2009-07-31 First published in 1976 The Search for Security in the Pacific 1901 1914 is the first volume in a pioneering two volume history of Australia's relations with the world from the founding of the Commonwealth to the Great War and its immediate aftermath This book is based on wide ranging research in collections of personal and official papers in Australia Britain the United States and Canada and offers original insights into Australia's political culture In taking the story up to the outbreak of the European conflict it shows the great impact that the looming presence of East Asia had on Australia's perception of the world and on the evolution of a distinctive defence and foreign policy It tells the story of how in an age of race nationalism the fear of Asia led first to the making of the Commonwealth and the White Australia policy and then after Japan's defeat of Russia in 1905 to the potential prospect of a military invasion from the north This sense of an Australian Crisis pervaded the whole society and found expression in poetry plays novels cartoons at least one film newspaper editorials as well as political speeches To meet this threat Australian leaders against all the advice from the British authorities introduced compulsory military training and established a navy and a fledgling air force The outbreak of the European war found the Australians resentful about the British betrayal and anxious to know what the Empire's involvement in that conflict might mean for the Pacific This divergence of security concerns created tension between Australia's community of culture and its community of interest between its British identity and its geopolitical circumstances

**Framing the Islands** Greg Fry, 2019-10-25 Since its origins in late eighteenth century European thought the idea of placing a regional frame around the Pacific islands has never been just an exercise in geographical mapping This framing has always been a political exercise Contending regional projects and visions have been part of a political struggle concerning how Pacific islanders should live their lives Framing the Islands tells the story of this political struggle and its impact on the regional governance of key issues for the Pacific such as regional development resource management security cultural identity political agency climate change and nuclear involvement It tells this story in the context of a changing world order since the colonial period and of changing politics within the post colonial states of the Pacific Framing the Islands argues that Pacific regionalism has been politically significant for Pacific island states and societies It demonstrates the power associated with the regional arena as a valued site for the negotiation of global ideas and processes around development security and climate change It also demonstrates the political significance associated with the role of Pacific regionalism as a diplomatic bloc in global affairs and as a producer of powerful policy norms attached to funded programs This study also challenges the expectation that Pacific regionalism largely serves hegemonic powers and that small islands states have little diplomatic agency in these contests Pacific islanders have successfully promoted their own powerful normative framings of Oceania in the face of the attempted hegemonic impositions from outside the region seen for example in the strong commitment to the Blue Pacific continent framing as a guiding ideology for the policy work of

the Pacific Islands Forum in the face of pressures to become part of Washington's Indo Pacific strategy

**The Genesis of a Policy** Honae Cuffe, 2021-11-16 The years 1921-57 marked a period of immense upheaval for Australia as the nation navigated economic crises the threat of aggressive Japanese expansion and shifting power distributions with the world transitioning from British leadership to that of the US This book offers a reassessment of Australia's foreign policy origins and maturation during these tumultuous years Successive Australian governments carefully observed these global and regional forces The policy that developed in response was an integrated one that is one that sought to balance Australia's particular geopolitical circumstances with great power relationships and in assessing the value of these relationships ensure that the nation's trade security and diplomatic interests were served Amid the economic and strategic uncertainty of the interwar years the Australian government acknowledged the shifting power distributions in the global and Asia Pacific orders and that neither the policies of Britain nor the US completely served the national interest The nation accordingly sought to intervene within the policies of the great powers to ensure its particular interests were secured This geopolitically informed interventionist approach which had its genesis in the 1930s is traced throughout the 1940s and 1950s highlighting Australia's gradual and uneven transition from the British world order to that of the US and the frank assessments made about which relationship best served Australia's interests The *Genesis of a Policy* identifies a comprehensive and pragmatic approach albeit not always effectively executed in Australian foreign policy tradition that has not been previously examined *Samoa (Western) Recent Economic and Political Developments Volume 1 Strategic Information and Developments* IBP USA, 2013-08 2011 Updated Reprint Updated Annually Samoa Western Recent Economic and Political Developments Yearbook

**Asia-Pacific Economic Update**, 2005 **Britain, Australia, New Zealand and the Challenge of the United States, 1939-46** P. Orders, 2002-12-13 This book relates the development of Anglo Australian New Zealand relations during and immediately after the second world war to the role of the United States in the South west Pacific Based on the results of comprehensive multi archival research the book highlights the extent of American Commonwealth rivalry in the region and following the crisis of late 1941 and early 1942 demonstrates how the reforging of imperial links was shaped by the expansion of American power in Pacific areas south of the equator It provides an important and timely reassessment of the economic political and strategic factors that led Britain Australia and

**International Security in the Asia-Pacific** Alan Chong,2017-09-13 This volume argues that international security in the Asia Pacific lends itself to contradictory analyses of centrifugal and centripetal trends Transitional polycentrism is intrinsically awkward as a description of the security of states and their populations it implies the loosening of state control and the emergence of newly asserted authority by mixed constellations of intergovernmental organizations and non state actors It implies a competition of agendas threats to the integrity of borders and human security threats such as natural disasters airliner crashes and displacement by man made pollution and food scarcity Conversely polycentrism could also imply a return to a more neo realist oriented international order where great powers ignore ASEAN and steer regional order according to their perceived interests and relative military superiority This book embraces these contradictory trends as a foundation of analysis and accepts that disorder can also be re described from the perspective of studied detachment as polycentric order

**Striving for Peace, Security, and Development of the World** Joseph Rotblat,1993 The momentous events of the past year have changed the political face of the globe the ideological struggle that dominated the world for most of this century is over erstwhile mortal enemies have become friends and partners But old attitudes have survived and modern weapons are in abundance New foci of conflict have emerged military confrontations are taking place the world is still in turmoil The welcome deep cuts in nuclear weapons have still left thousands of warheads in the arsenals and the spread of these weapons to new states would further increase the danger of a nuclear confrontation The release of the pressure pent up under oppressive regimes created a powerful drive for independence often achieved only after bloody wars Many of the new states are economically non viable poverty and famine are frequent adjuncts of independence If military conflicts are to be avoided a comprehensive strategy must be formulated to improve the standards of living in the developing countries and enhance their security A strategy is also needed to protect the environment from the effects of further industrialization and greater use of energy What is needed is a concept of a sustainable equitable and liveable world for all its inhabitants All these problems were analysed by scientists and scholars who met at a Pugwash Conference The arguments used by them and the proposed solutions are presented in this book under six themes World Peace Nuclear Disarmament Issues Arms Control Security in the Asia Pacific Region Development Strategies and World Economic Order Energy and the
