Search For Political Community American Activists Reinventing Commitment:

The Search for Political Community Paul Lichterman, 2003 4e de couv This book challenges the myth that Americans emphasis on personal fulfilment necessarily weakens commitment to the common good Drawing on extensive participant observation with a variety of environmentalist groups Paul Lichterman argues that individualism sometimes enhances public political commitment and that a shared respect for individual inspiration enables activists with diverse political backgrounds to work together This personalised culture of commitment has sustained activists working long term for social change The book contrasts personalised politics in mainly white environmental groups with a more traditional community centred culture of commitment in an African American group The untraditional personalised politics of many recent social movements invites us to rethink common understandings of commitment community and individualism in a post traditional world The

Search for Political Community Paul Lichterman, 1996-09-19 This book challenges the myth that individualism necessarily weakens commitments to the common good It examines environmental and other activist groups in which individualism sometimes enhances political commitment Rather than criticize individualism and favor a return to traditional values Paul Lichterman examines the untraditional personalized politics of many recent social movements and invites us to rethink common understandings of commitment community and individualism in a post traditional world **Youth Engagement**

Taft, Sandi Kawecka Nenga, 2013-03-08 This volume critically examines the multiple and contested meanings of ideal citizenship and reveal how children and youth craft active citizenship as they encounter and respond to the various institutions and organizations designed to encourage their civic and political development **Community** Gerard

Delanty, 2009-12-04 The increasing individualism of modern Western society has been accompanied by an enduring nostalgia for the idea of community as a source of security and belonging and in recent years as an alternative to the state as a basis for politics Gerard Delanty begins this stimulating introduction to the concept with an analysis of the origins of the idea of community in Western Utopian thought and as an imagined pristine condition equated with traditional societies in classical sociology and anthropology He goes on to chart the resurgence of the idea within communitarian thought the complications and critiques of multiculturalism and its new manifestations within a society where new modes of communication produce both fragmentation and the possibilities of new social bonds Contemporary community he argues is essentially a communication community based on new kinds of belonging No longer bounded by place we are able to belong to multiple communities based on religion nationalism ethnicity life styles and gender **Virtual Communities** Felicia Wu Song, 2009

Does contemporary Internet technology strengthen civic engagement and democratic practice The recent surge in online community participation has become a cultural phenomenon enmeshed in ongoing debates about the health of American civil society But observations about online communities often concentrate on ascertaining the true nature of community and democracy typically rehearsing familiar communitarian and liberal perspectives This book seeks to understand the

technology on its own terms focusing on how the technological and organizational configurations of online communities frame our contemporary beliefs and assumptions about community and the individual It analyzes key structural features of thirty award winning online community websites to show that while the values of individual autonomy egalitarianism and freedom of speech dominate the discursive content of these communities the practical realities of online life are clearly marked by exclusivity and the demands of commercialization and corporate surveillance Promises of social empowerment are framed within consumer and therapeutic frameworks that undermine their democratic efficacy As a result online communities fail to revolutionize the civic landscape because they create cultures of membership that epitomize the commodification of community and public life altogether

The Future of Social Movement Research Jacqueliën van Stekelenburg, Conny Roggeband, Bert Klandermans, 2013-07-01

Are the dynamics of contention changing This is the question confronted by the contributors of this volume among the most influential scholars in the field of social movements The answers arriving at a time of extraordinary worldwide turmoil not only provide a wide ranging and varied understanding of how social movements arise and persist but also engender unanswered questions pointing to new theoretical strands and fields of research The Future of Social Movement Research asks How are the dynamics of contention shaped by globalization By societies that are becoming increasingly more individualized and diverse By the spread of new communication technologies such as social media cell phones and the Internet Why do some movements survive while others dissipate Do local and global networks differ in nature The authors essays explore such questions with reference to changes in three domains of contention the demand of protest changes in grievances and identities the supply of protest changes in organizations and networks and how these changes affect the dynamics of mobilization In doing so they theorize and make empirically insightful how globalization individualization and virtualization create new grievances new venues for action new action forms and new structures of contention The resulting work brought together through engaging discussions and debates between the contributors is interdisciplinary and unusually broad in scope constituting the most comprehensive overview of the dynamics of social movements available today

How Civic Action Works Paul Lichterman,2020-12-15 The ways that social advocates organize to fight unaffordable housing and homelessness in Los Angeles illuminated by a new conceptual framework for studying collective action How Civic Action Works renews the tradition of inquiry into collective social problem solving Paul Lichterman follows grassroots activists nonprofit organization staff and community service volunteers in three coalitions and twelve organizations in Los Angeles as they campaign for affordable housing develop new housing or address homelessness Lichterman shows that to understand how social advocates build their campaigns craft claims and choose goals we need to move beyond well established thinking about what is strategic Lichterman presents a pragmatist inspired sociological framework that illuminates core tasks of social problem solving both contentious and noncontentious by grassroots and professional

advocates alike He reveals that advocates distinct styles of collective action produce different understandings of what is strategic and generate different dilemmas for advocates because each style accommodates varying social and institutional pressures We see too how patterns of interaction create a cultural filter that welcomes some claims about housing problems while subordinating or delegitimizing others These cultural patterns help solve conceptual and practical puzzles such as why coalitions fragment when members agree on many things and what makes advocacy campaigns separate housing from homelessness or affordability from environmental sustainability Lichterman concludes by turning this action centered framework toward improving dialogue between social advocates and researchers Using extensive ethnography enriched by archival evidence *How Civic Action Works* explains how advocates meet the relational and rhetorical challenges of collective action
