Animal James S. Serilla,2009-03-13 The coercive animal exists because our social systems of thought throughout the history of humankind have been unaccountable Our use of reason and rational thought allowed us to place the idea of reality anywhere one senses it to be From this ambiguity we have our history of ideas by decree from ancient philosophy to our modern thinkers Our religious thought our rational thought our governments and our economic systems they all operate without accountability When we learn how ideas work we understand how we move ideas within our minds to create ideas that may or may not relate to reality We understand how to categorize our ideas We discover how people can create intellectual shell games by initiating movement between broadband and narrowband ideas as well as between universal and limited ideas When we have this knowledge we expose the coercive animal Historically we have defined coercion as the arbitrary will of one person forced onto another Nevertheless what are arbitrary and non arbitrary wills This book removes the ambiguity by taking the arbitrary out of arbitrary How we distinguish between the two resides within the pages of this book *The Coercive Animal*

Sample Book Insights

- 1 The use of dream analysis in psychotherapy is still a debated issue Many practitioners find it indispensable in the treatment of neuroses while others dispute the value of dream analysis and believe that dreams are a negligible by product of the psyche
- 2 Dreams can be used to reveal the unconscious causes of a neurosis The Freudian answer is that dreams often reveal the unconscious contents that are causal factors in a neurosis
- 3 The dream is an accurate representation of the patient's subjective state which the conscious mind denies exists or recognizes only grudgingly The patient's conscious ego could see no reason why he should not go steadily forward but the dream showed us how things really stood
- 4 There are dreams that explain the causes of a neurosis and there are others that do not The point is that there are neuroses whose origins we discover only at the end of an analysis and there are others whose origins we do not need to discover
