**The Eponym Dictionary of Birds** Bo Beolens, Michael Watkins, Michael Grayson, 2020-03-19 A comprehensive dictionary listing all the people whose names are commemorated in the English and scientific names of birds. Birdwatchers often come across bird names that include a person's name either in the vernacular English name or latinised in the scientific nomenclature. Such names are properly called eponyms and few people will not have been curious as to who some of these people were or are. Names such as Darwin, Wallace, Audubon, Gould and Gilbert White are well known to most people. Keener birders will have yearned to see Pallas's Warbler, Hume's Owl, Swainson's Thrush, Steller's Eider or Brunnich's Guillemot. But few people today will have even heard of Albertina's Myna, Barraband's Parrot, Guérin's Helmetcrest or Savigny's Eagle Owl. This extraordinary work lists more than 4 000 eponymous names covering 10 000 genera, species and subspecies of birds. Every taxon with an eponymous vernacular or scientific name, whether in current usage or not, is listed followed by a concise biography of the person concerned. These entries vary in length from a few lines to several paragraphs depending on the availability of information or the importance of the individual's legacy. The text is punctuated with intriguing or little known facts unearthed in the course of the authors' extensive research. Ornithologists will find this an invaluable reference, especially to sort out birds named after people with identical surnames or in situations where only a person's forenames are used. But all birders will find much of interest in this fascinating volume, a book to dip into time and time again whenever their curiosity is aroused.

**The Explorers** Martin Dugard, 2014-06-03 Learn to unlock your inner explorer in this riveting account of a great forbidding adventure and a fascinating examination of the seven key traits of history's most famous explorers with infusions of insight and enthusiasm. Publishers Weekly starred review. In 1856 two intrepid adventurers, Richard Francis Burton and John Hanning Speke, set off to unravel a geographical unknown: the location of the Nile River's source. They traveled deep into an uncharted African wilderness, together arrived at two different solutions to the mystery and parted ways as sworn enemies. The feud became an international sensation on their return to England and a public debate was scheduled to decide whose theory was correct. What followed was a massive spectacle with an outcome no one could have foreseen. In *The Explorers*, New York Times bestselling author Martin Dugard shares the rich saga of the Burton and Speke expedition and guides readers through the seven traits that history's most legendary explorers called on to survive their impossible journeys. In doing so, Dugard demonstrates that these traits have a most practical application in everyday life. We see St. Brendan the Navigator driven by hope sail into the unknown and the curiosity that inspired John Ledyard to attempt to walk around the globe and the perseverance Howard Carter needed to discover Tutankhamen's tomb. From these and other examples, Dugard extracts lessons for unlocking the explorer in us all.
