Planning Ideas That Matter
 Bishwapriya Sanyal, Lawrence J. Vale, Christina D. Rosan, 2012-07-06 Leading theorists and practitioners trace the evolution of key ideas in urban and regional planning over the last hundred years Over the past hundred years of urbanization and suburbanization four key themes have shaped urban and regional planning in both theory and practice livability territoriality governance and reflective professional practice Planning Ideas That Matter charts the trajectories of these powerful planning ideas in an increasingly interconnected world The contributors leading theorists and practitioners discuss livability in terms of such issues as urban density land use and the relationship between the built environment and natural systems examine levels of territorial organization drawing on literature on regionalism metropolitanism and territorial competition describe the ways planning connects to policy making and implementation in a variety of political contexts and consider how planners conceive of their work and learn from practice Throughout the emphasis is on how individuals and institutions including government business professional organizations and universities have framed planning problems and ideas The focus is less on techniques and programs than on the underlying concepts that have animated professional discourse over the years The book is recommended for classroom use as a reference for scholars and practitioners and as a history of planning for those interested in the development of the field

Technology and Place Steven A. Moore, 2011-01-20 Developing sustainable architectural and agricultural technologies was the intent behind Blueprint Farm an experimental agricultural project designed to benefit farm workers displaced by the industrialization of agriculture in the Rio Grande Valley of Texas Yet despite its promise the very institutions that created Blueprint Farm terminated the project after just four years 1987 1991 In this book Steven Moore demonstrates how the various stakeholders competing definitions of sustainability technology and place ultimately doomed Blueprint Farm He reconstructs the conflicting interests and goals of the founders including Jim Hightower and the Texas Department of Agriculture Laredo Junior College and the Center for Maximum Potential Building

Systems and shows how ironically they unwittingly suppressed the self determination of the very farm workers the project sought to benefit From the instructive failure of Blueprint Farm Moore extracts eight principles for a regenerative architecture which he calls his nonmodern manifesto Suburban Nation Andres Duany,Elizabeth Plater-Zyberk,Jeff Speck,2010-09-14 For a decade Suburban Nation has given voice to a growing movement in North America to put an end to suburban sprawl and replace the last century s automobile based settlement patterns with a return to more traditional planning Founders of the Congress for the New Urbanism Andres Duany and Elizabeth Plater Zyberk are at the forefront of the movement and even their critics such as Fred Barnes in The Weekly Standard recognized that Suburban Nation is likely to become this movement s bible A lively lament about the failures of postwar planning this is also that rare book that offers solutions an essential handbook San Francisco Chronicle This tenth anniversary edition includes a new preface by the authors *Invisible City* John I. Gilderbloom,2009-02-17 A legendary figure in the realms of public policy and academia John Gilderbloom is one of the foremost urban planning researchers of our time producing groundbreaking studies on housing markets design location regulation financing and community building Now in Invisible City he turns his eye to fundamental questions regarding housing for the elderly the disabled and the poor Why is it that some locales can offer affordable accessible and attractive housing while the large majority of cities fail to do so Invisible City calls for a brave new housing paradigm that makes the needs of marginalized populations visible to policy makers Drawing on fascinating case studies in Houston Louisville and New Orleans and analyzing census information as well as policy reports Gilderbloom offers a comprehensive engaging and optimistic theory of how housing can be remade with a progressive vision While many contemporary urban scholars have failed to capture the dynamics of what is happening in our cities Gilderbloom presents a new vision of shelter as a force that shapes all residents Civitas by Design Howard Gillette, Jr.,2011-06-06 Since the end of the nineteenth century city planners have aspired not only to improve the physical living conditions of urban residents but also to strengthen civic ties through better design of built environments From Ebenezer Howard and his vision for garden cities to today s New Urbanists these visionaries have sought to deepen civitas or the shared community of citizens In Civitas by Design historian Howard Gillette Jr takes a critical look at this planning tradition examining a wide range of environmental interventions and their consequences over the course of the twentieth century As American reform efforts moved from progressive idealism through the era of government urban renewal programs to the rise of faith in markets planners attempted to cultivate community in places such as Forest Hills Gardens in Queens New York Celebration Florida and the post Katrina Gulf Coast Key figures including critics Lewis Mumford and Oscar Newman entrepreneur James Rouse and housing reformer Catherine Bauer introduced concepts such as neighborhood units pedestrian shopping malls and planned communities that were implemented on a national scale Many of the buildings landscapes and infrastructures that planners envisioned still remain but frequently these physical designs have proven insufficient to sustain the ideals they

represented Will contemporary urbanists efforts to join social justice with environmentalism generate better results Gillette places the work of reformers and designers in the context of their times providing a careful analysis of the major ideas and trends in urban planning for current and future policy makers **Travel by Design** Marlon G. Boarnet,Randall Crane,2001-03-08 Can transportation problems be fixed by the right neighborhood design The tremendous popularity of the new urbanism and livable communities initiatives suggests that many persons think so As a systematic assessment of attempts to solve transportation problems through urban design this book asks and answers three questions Can such efforts work Will they be put into practice Are they a good idea *Against the Tide* Cornelia Dean,1999 Few aspects of American military history have been as vigorously debated as Harry Truman s decision to use atomic bombs against Japan In this carefully crafted volume Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons surveys the major debates related to that decision and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945 He then provides a historical overview of thye events in question beginning with the decision and program to build the atomic bomb Detailing the sequence of events leading to Japan s surrender he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders Finally Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents scholarly books and articles *Design Book Review* ,1994 Urban Ethic Eamonn Canniffe,2006-06-01 Although contemporary practice in urbanism has many sources of design guidelines it lacks theory to provide a flexible approach to the complexities of most urban situations The author provides that theoretical framework looking beyond the style obsession of urban makeovers to the fundamental elements of city making The scope of this book takes in illuminating historical analysis and significant theoretical coherence while recent case studies link the physical environment to the citizens within it ultimately offering a new methodology for the analysis and design of urban spaces which encourages a balance between diversity and community
