Tarleton Family Charles William Tarleton,1900 **The Rise and Decline of the Redneck Riviera** Harvey H. Jackson,2012-05-01 A lucid often pithy history of the eastern Gulf Coast vacation destination by an Alabama native who is a talented storyteller as well as a scholar Washington Times In The Rise and Decline of the Redneck Riviera Southern historian Harvey H Jackson presents a cultural history of the coastal region stretching from Mobile Bay and Gulf Shores Alabama to Panama City Florida an area known as the Redneck Riviera Jackson chronicles the evolution of the are from the late 1920s

when it was sparsely populated with small fishing villages through to the devastating BP Deepwater Horizon oil spill of 2010. With both personal and historical perspectives Jackson explores the area's development as a middle and working class vacation destination following World War II, the building boom of the fifties and sixties and the emergence of the Spring Break season. He tracks the hurricanes that destroyed historic construction, the building boom that brought high rise condos and the effects of the 2008 housing market crash. While his major focus is on the social, cultural and economic development, he also documents the environmental and financial impacts of natural disasters and the politics of beach access and dune and sea turtle protection.

Most people attach great importance to their local community and its identity. The possibility of change can cause turmoil and become fertile ground for staking new identities. Understanding how these changes can take place is important to the future of community cohesion across the world. This book gives a detailed analysis of how different stakeholders in two Dutch municipalities use and adapt their identity discourses to deal with changing circumstances, situating this work within a wider international context through global comparisons. The growing spatial interdependence and political pressures for municipal cooperation or amalgamation creates not only threats but also opportunities for stakeholders in local communities to transform their local identities. By studying how local communities attach to local identities a new conceptual framework can be formed informed by lively accounts from residents on the rich and varied use of identity in their communities and their concerns over future developments. This is valuable reading for students, scholars and researchers working in geography, politics, sociology and cultural studies.

Invisible Seasides Tony Blackshaw, 2025-08-01. *Invisible Seasides* positions the seaside as a lens for understanding lived utopia pinned in a certain place, an immovable feature in a landscape where our hopes and fears continue to unfold. Wide ranging in theme it brings a double perspective, past and present, to bear on how we understand contemporary seaside experience. Presenting a magical paradox of the modern seaside, this book traces the development of a cultural phenomenon from the mid 1800s to the present day. In the process it modifies the accepted narrative about its rise and fall, reappraising our understanding of the end of a Mass Utopia and shining new light on the diversity of post utopias that have emerged in its afterlife. Fusing social theory, social history and leisure studies, its thesis adroitly envisions the diverse density of the seaside through a critical lens, making the unfamiliar familiar and vice versa, providing us with an exemplar for a different way of thinking sociologically which will be used by scholars from a range of different subject fields to encourage fresh reflection on social continuity and change.
