Secular Theories On Religion:

Secular Theories on Religion Tim Jensen, Mikael Rothstein, 2000 Scholars of religious studies from Europe and North America explore what a secular or scientific study of religion should be like what methods it should apply what aims and what kind of scientific thinking should be pursued They also consider scholars as public intellectuals operating within and influenced by general societal developments The 18 essays provide a survey of current thinking in the field Distributed in the US by ISBS c Book News Inc

Sacred and Secular Pippa Norris, Ronald Inglehart, 2011-10-17 This book develops a theory of existential security It demonstrates that the publics of virtually all advanced industrial societies have been moving toward more secular orientations during the past half century but also that the world as a whole now has more people with traditional religious views than ever before This second edition expands the theory and provides new and updated evidence from a broad perspective and in a wide range of countries This confirms that religiosity persists most strongly among vulnerable populations especially in poorer nations and in failed states Conversely a systematic erosion of religious practices values and beliefs has occurred among the more prosperous strata in rich nations

Post-Secular Society Peter Nynas, Mika Lassander, Terhi Utriainen, 2012-08-14 Are we still secular If not what can one possibly mean by post secular The answers depend on what one considers secular as well as the people societies and institutions that one considers Post Secular Society argues for the experience of living in a secular world and a secular age and the experience of living without religion as a normal condition Religion in the Western world is often described as being marked to some degree by both innovation and disarray The past couple of decades have seen the emergence of reformulated versions of theories of secularization variants of rational choice and supply side models of religion and new theoretical perspectives on de secularization of religion In spite of these different approaches and perspectives a majority of scholars agree that the West is experiencing a general resurgence of religion and that the public visibility of religious actors and discourses is on the rise across most Western societies Post Secular Society discusses the changes in religion related to globalization as well as New Age and other forms of popular religion The contributors review religion that is rooted in the globalized political economy and the relationship of post secularism to popular and consumer culture They also detail current innovative discourse as a religious belief system discuss theories of the post secular religious and spiritual well being and consider healing practices in Finland and environmentalism

'Religion' and 'Secular' Categories in Sociology Mitsutoshi Horii, 2022-01-01 Informed by critical religion perspective in Religious Studies and postcolonial self reflection in Sociology this book interrogates the ideas of religion and the secular in social theory and Sociology It argues that as long as social theory and sociological discourse embed the religion secular distinction and locate themselves on the secular side of the binary Sociology will continue to serve the very ideologies it tries to subvert namely Western modernity coloniality

Secularization Steve Bruce, 2011-01-27 Secularization remains one of the most hotly debated topics in the study of religion in modern societies Steve Bruce

elaborates the sociological secularization paradigm and defends it against a wide variety of recent attempts at rebuttal and refutation

Deep History, Secular Theory Luther Martin, 2014-05-21 Over the course of his career Luther H Martin has primarily produced articles rather than monographs This approach to publication has given him the opportunity to experiment with different methodological approaches to an academic study of religion with updates to and different interpretations of his field of historical specialization namely Hellenistic religions the subject of his only monograph 1987 The contents of this collected volume represent Martin s shift from comparative studies to socio political studies to scientific studies of religion and especially to the cognitive science of religion He currently considers the latter to be the most viable approach for a scientific study of religion within the academic context of a modern research university The twenty five contributions collected in this volume are selected from over one hundred essays articles and book chapters published over a long and industrious career and are representative of Martin s work over the past two decades

Global Religious and Secular Dynamics José Casanova, 2019-08-12 Global Religious and Secular Dynamics offers a global historical perspective that integrates European theories of modern secularization and competing theories of global religious revival as interrelated dynamics In the first section Casanova examines the emergence of the modern religious secular binary system of classification within a critical review of mile Durkheim s and Max Weber s divergent theories of religion The modern system of classification is contrasted with the pre axial one in which all reality was organized according to the binary sacred profane and with the post axial one which was organized according to the binary transcendent immanent The second and third sections contrast the internal European road of secularization without religious pluralization with the external colonial road of global intercultural and religious encounters particularly in Asia that led to the global system of religious pluralism The final section examines the contemporary intertwinement of religious and secular dynamics through the globalization of the immanent frame and the expansion of global denominationalism
