Security Barry Buzan, Ole Wæver, Jaap de Wilde, 2022 Traditionalists in the field of security studies tend to restrict the subject to politico military issues while wideners want to extend it to the economic societal and environmental sectors This book sets out a comprehensive statement of the new security studies establishing the case for the broader agenda The authors argue that security is a particular type of politics applicable to a wide range of issues Answering the traditionalist charge that this model makes the subject incoherent they offer a constructivist operational method for distinguishing the process of securitization from that of politicization Their approach incorporates the traditionalist agenda and dissolves the artificial boundary between security studies and international political economy opening the way for a fruitful interplay between the two fields It also shows how the theory of regional security complexes remains relevant in today s world

Security and Southeast Asia Alan Collins, 2003 From internal oppression in Burma to interstate conflict in the South China Sea the people of Southeast Asia face a range of threats This book identifies and explains the security challenges both traditional and nontraditional confronting the region Collins addresses the full spectrum of security issues discussing the impact of ethnic tensions and competing political ideologies the evolving role of ASEAN and Southeast Asia s interactions with key external actors China Japan and the United States The final section of the book explores how the region s security issues are reflected in two current cases the South China Sea dispute and the war on terrorism

The United Nations & Regional Security Michael Charles Pugh, Waheguru Pal Singh Sidhu, 2003 Events in Europe over the past decade or so have created a dynamic requiring conceptual and practical adjustments on the part of the UN and a range of regional actors This volume explores the resulting collaborative relationships in the context of peace operations in the Balkans

Contemporary Security Studies Alan Collins, 2025

Critical Approaches to Security Laura J. Shepherd, 2013 Focusing on critical approaches to security this new textbook offers readers both an overview of the key theoretical perspectives and a variety of methodological techniques With

a careful explication of core concepts in each chapter and an introduction that traces the development of critical approaches to security this textbook will encourage all those who engage with it to develop a curiosity about the study and practices of security politics Challenging the assumptions of conventional theories and approaches unsettling that which was previously taken for granted these are among the ways in which such a curiosity works Through its attention to the fact that and the ways in which security matters in global politics this work will both pioneer new ways of studying security and acknowledge the noteworthy scholarship without which it could not have been thought This textbook will be essential reading to advanced undergraduate and postgraduate students of critical security studies and highly recommended to students of traditional security studies International Relations and Politics *Seeking Security in an Insecure World* Dan Caldwell, Robert E. Williams Jr., 2016-02-24 This revised edition of *Seeking Security in an Insecure World* provides a thorough accessible introduction to contemporary security studies All chapters are updated and a wide range of new topics are discussed including the Syrian civil war Russia's annexation of Crimea and its intervention in East Ukraine the global refugee crisis China's military buildup the impact of fracking on oil and gas markets and rapidly evolving cyberwar capabilities Each chapter also addresses what has been and can be done to enhance security Overall *Seeking Security in an Insecure World* offers a clear and compelling framework for understanding what security means today and how it can best be achieved

Research Methods in Critical Security Studies Mark B. Salter, Can E. Mutlu, Philippe M. Frowd, 2023-05-12 This textbook surveys new and emergent methods for doing research in critical security studies filling a gap in the literature The second edition has been revised and updated This textbook is a practical guide to research design in this increasingly established field Arguing for serious attention to questions of research design and method the book develops accessible scholarly overviews of key methods used across critical security studies such as ethnography discourse analysis materiality and corporeal methods It draws on prominent examples of each method's objects of analysis relevant data and forms of data collection The book's defining feature is the collection of diverse accounts of research design from scholars working within each method each of which is a clear and honest recounting of a specific project's design and development This second edition is extensively revised and expanded Its 33 contributors reflect the sheer diversity of critical security studies today representing various career stages scholarly interests and identities This book is systematic in its approach to research design but keeps a reflexive and pluralist approach to the question of methods and how they can be used The second edition has a new forward looking conclusion examining future research trends and challenges for the field This book will be essential reading for upper level students and researchers in the field of critical security studies and of much interest to students in International Relations and across the social sciences *Critical Security Studies in the Digital Age* Joseph Downing, 2023-01-23 This book demonstrates that the disciplinary boundaries present within international relations approaches to security studies are redundant when examining social media and inter and multi disciplinary analysis is key A

key result of the analysis undertaken is that when examining the social media sphere security scholars need to expect the unexpected. This is because social media enables users to subvert contest and create security narratives with symbols and idioms of their choice which can take into account traditional security themes but also unexpected and under explored themes such as narratives from the local context of the users towns and cities and the symbolism of football clubs. The book also explores the complex topography of social media when considering constructions of security. The highly dynamic topography of social media is neither elite dominated and hierarchical as the Copenhagen School conceptualises security speak. However neither is it completely flat and egalitarian as suggested by the vernacular security studies non elite approach. Rather social media's topography is shifting and dynamic with individuals gaining influence in security debates in unpredictable ways. In examining social media this book engages with the emancipatory burden of critical security studies. This book argues that it remains unfulfilled on social media and rather presents a thin notion of discursive emancipation where social media does provide the ability for previously excluded voices to participate in security debates even if this does not result in their direct emancipation from power hierarchies and structures offline.
