Seek Polar:

Seek the Frozen Lands Frank Nugent, 2013-09-15 High on any list of Polar explorers would be the names Crozier McClintock McClure and Shackleton But how many know they were all Irish *Seek the Frozen Lands* unveils an array of Irish heroes largely unknown in modern Ireland The sage begins with Edward Bransfield who made one of the first sightings of the Antarctic in 1820 The story ends with the heroic age of Antarctic exploration and the burial of Shackleton in 1922 in South Georgia Truly a story of heroism drama and tragedy Similar to Tom Crean An Unsung Hero Captain Francis Crozier Last Man Standing Everest Calling Ger McDonnell His Life and His Death on K2

The Inuit World Pamela Stern,2021-11-23 The Inuit World is a robust and holistic reference source to contemporary Inuit life from the intimate world of the household to the global stage Organized around the themes of physical worlds moral spiritual and intellectual worlds intimate and everyday worlds and social and political worlds this book includes ethnographically rich contributions from a range of scholars including Inuit and other Indigenous authors The book considers regional social and cultural differences as well as the shared histories and common cultural practices that allow us to recognize Inuit as a single distinct Indigenous people The chapters demonstrate both the historical continuity of Inuit culture and the dynamic ways that Inuit people have responded to changing social environmental political and economic conditions Chapter topics include ancestral landscapes tourism and archaeology resource extraction and climate change environmental activism and women s leadership This book is an invaluable resource for students and researchers in anthropology Indigenous studies and Arctic studies and those in related fields including geography history sociology political science and education

[The Limits of Medicine](#) Andrew Stark,2006-01-16 What are the final limits of medicine What should we not try to cure medically even if we had the necessary financial resources and technology This book philosophically addresses these questions by examining two mirror image debates in tandem Members of certain groups who are deemed by traditional standards to have a medical condition such as deafness obesity or anorexia argue that they have created their own cultures and ways of life Curing their conditions would be a form of genocide Members of other

groups are seeking to provide medical treatment to what would conventionally be deemed cultural conditions Mild neurotics who take anti depressants to elevate their mood runners who use steroids or men and women seeking cosmetic surgery are asking for medical treatment for problems that might be solved culturally by changing norms pressures or expectations in the broader culture Each of these two debates endeavors to locate medicine s final frontier and to articulate what it is that we should not treat medically even if we could This volume analyzes what these two contemporary debates have to say to each other and thus offers a new way of determining medicine s final limits

Nonlinear Ordinary Differential Equations R. Grimshaw, 2017-10-19 Ordinary differential equations have long been an important area of study because of their wide application in physics engineering biology chemistry ecology and economics Based on a series of lectures given at the Universities of Melbourne and New South Wales in Australia *Nonlinear Ordinary Differential Equations* takes the reader from basic elementary notions to the point where the exciting and fascinating developments in the theory of nonlinear differential equations can be understood and appreciated Each chapter is self contained and includes a selection of problems together with some detailed workings within the main text *Nonlinear Ordinary Differential Equations* helps develop an understanding of the subtle and sometimes unexpected properties of nonlinear systems and simultaneously introduces practical analytical techniques to analyze nonlinear phenomena This excellent book gives a structured systematic and rigorous development of the basic theory from elementary concepts to a point where readers can utilize ideas in nonlinear differential equations
