Seeking The Center Politics And Policymaking At The New Century:

Seeking the Center Martin A. Levin, Marc K. Landy, Martin Shapiro, 2001-08-03 During the past decade Democrats and Republicans each have received about fifty percent of the votes and controlled about half of the government but this has not resulted in policy deadlock Despite highly partisan political posturing the policy regime has been largely moderate Incremental yet substantial policy innovations such as welfare reform deficit reduction the North American Free Trade Agreement and the deregulation of telecommunications banking and agriculture have been accompanied by such continuities as Social Security and Medicare the maintenance of earlier immigration reforms and the persistence of many rights based policies including federal affirmative action In *Seeking the Center* twenty one contributors analyze policy outcomes in light of the frequent alternation in power among evenly divided parties They show how the triumph of policy moderation and the defeat of more ambitious efforts such as health care reform can be explained by mutually supporting economic intellectual and political forces Demonstrating that the determinants of public policy become clear by probing specific issues rather than in abstract theorizing they restore the politics of policymaking to the forefront of the political science agenda A successor to Martin A Levin and Marc K Landy s influential *The New Politics of Public Policy* Johns Hopkins University Press 1995 this book will be vital reading for advanced undergraduate and graduate students in political science and public policy as well as a resource for scholars in both fields

Public Policy and the Mass Media Sigrid Koch-Baumgarten, Katrin Voltmer, 2010-02-25 The mass media are playing an increasingly central role in modern political life that expands beyond their traditional function as mediators between the world of politics and the citizens This volume explores the extent and circumstances under which the media affects public policy whether the political

impact of the media is confined to the public representation of politics or whether their influence goes further to also affect the substance of political decisions It provides an in depth understanding of the conditions under which the media might or might not play a role in the policy process and what the nature of their influence is Bringing together conceptual and methodological approaches from both political science and communications studies this book presents an interdisciplinary perspective It presents empirical evidence of the processes involved in the interaction between mass communication and policy and features case studies from Western Europe and the US and across different policy fields The book will be of interest to students of public policy political communication and comparative politics

Building Coalitions, Making Policy Martin A. Levin, Daniel DiSalvo, Martin M. Shapiro, 2012-06-04 Getting past No in an age of partisan noise In an age when partisan politics has reached a deafening and arguably impotent pitch how does the real work of politics get done This book opens the door on backroom politics and gives readers an insider s perspective on the efforts of policymakers from three presidential administrations to get past the naysayers and effect real and lasting policy changes The editors take a comparative approach offering a thorough overview of policymaking during the Clinton and George W Bush administrations with further discussion of President Obama s successful and failed attempts to build coalitions and get past no The contributors a national network of prominent political scientists reveal the sausage making of politics and policy Readers can almost see the political players in the proverbial smoke filled room shirtsleeves rolled up and BlackBerrys in hand developing the strategies and hammering out the compromises designed to hold the party base while winning over independent voters Combining an insider s perspective with actual case studies the volume examines the policymaking behind such programs as No Child Left Behind tax cuts Social Security privatization Medicare prescription drug reform education and immigration reform environmental policy judicial politics national security Covering all major areas of policymaking Building Coalitions Making Policy gives instructors in political science public administration and policy American government and American presidential studies plenty of provocative examples for classroom debate

Governing Uncertainty Christopher Bosso, 2012-06-25 Nanotechnology promises to transform the materials of everyday life leading to smaller and more powerful computers more durable plastics and fabrics cheap and effective water purification systems more efficient solar panels and storage batteries and medical devices capable of tracking down and killing cancer cells or treating neurological diseases Policy analysts predict a radical change in the industrial sector at present the U S government spends nearly 2 billion annually on nanotechnology research and development Yet the nanotechnology revolution is not straightforward Enthusiasm about nanotechnology s future is tempered by recognition of the hurdles to its responsible development including the capacity of government to support technological innovation and economic growth while also addressing potential environmental and public health impacts This is the first volume to engage scholarly perspectives on environmental regulation in light of the challenges posed by nanotechnology Contributors focus on the overarching lessons of decades of

regulatory response while posing a fundamental question How can government regulatory systems satisfy the desire for scientific innovation while also taking into account the direct and indirect effects of 21st century emerging technologies particularly in the face of scientific uncertainties With perspectives from economics history philosophy and public policy this new resource illuminates the various challenges inherent in the development of nanotechnology and works towards a reconceptualization of government regulatory approaches Greenhouse Governance Barry George Rabe,2010-01-01 Examines national and international laws and institutions governing human mediated climate change Issues examined include public perceptions and economic effects of climate change and policies to mitigate it renewable electricity standards vehicle fuel economy standards cap and trade regimes carbon taxes and the adaptation versus mitigation debate Provided by publisher *Age of Fracture* Daniel T. Rodgers,2012-09-03 In the last quarter of the twentieth century the ideas that most Americans lived by started to fragment Mid century concepts of national consensus managed markets gender and racial identities citizen obligation and historical memory became more fluid Flexible markets pushed aside Keynesian macroeconomic structures Racial and gender solidarity divided into multiple identities community responsibility shrank to smaller circles In this wide ranging narrative Daniel Rodgers shows how the collective purposes and meanings that had framed social debate became unhinged and uncertain *Age of Fracture* offers a powerful reinterpretation of the ways in which the decades surrounding the 1980s changed America Through a contagion of visions and metaphors on both the intellectual right and the intellectual left earlier notions of history and society that stressed solidity collective institutions and social circumstances gave way to a more individualized human nature that emphasized choice agency performance and desire On a broad canvas that includes Michel Foucault Ronald Reagan Judith Butler Charles Murray Jeffrey Sachs and many more Rodgers explains how structures of power came to seem less important than market choice and fluid selves Cutting across the social and political arenas of late twentieth century life and thought from economic theory and the culture wars to disputes over poverty color blindness and sisterhood Rodgers reveals how our categories of social reality have been fractured and destabilized As we survey the intellectual wreckage of this war of ideas we better understand the emergence of our present age of uncertainty **Redefining European Economic Integration** Dariusz Adamski,2018-04-19 European economic integration has relied on policies intended to make the European Union strong and resilient economically socially and politically The Eurozone crisis and Brexit have demonstrated however how fragile this hope was and how contested reforms to the major European economic policies have become Dariusz Adamski explains the evolution of these policies from the Economic and Monetary Union to the internal market international trade the EU s climate policy as well as its redistributive policies and demonstrates how this evolution has made European economic integration increasingly frail He shows how erroneous economic and political assumptions regarding the direction of the European integration project have interplayed with the EU s constitutional context Arguing that flaws in individual policies contributing to European economic

integration can be remedied in compliance with the existing constitutional setup he explains why such solutions would be economically beneficial and politically feasible

The Hollow Parties Daniel Schlozman, Sam Rosenfeld, 2025-10-28 A major history from the Founding to our embittered present that explains the void Politico at the center of America's political parties Featured on The Ezra Klein Show and The Weekly Show with Jon Stewart America's political parties are hollow shells of what they could be locked in a polarized struggle for power and unrooted as civic organizations The Hollow Parties takes readers from the rise of mass party politics in the Jacksonian era through the years of Barack Obama and Donald Trump Today's parties at once overbearing and ineffectual have emerged from the interplay of multiple party traditions that reach back to the Founding Daniel Schlozman and Sam Rosenfeld paint unforgettable portraits of figures such as Martin Van Buren whose pioneering Democrats invented the machinery of the mass political party and Abraham Lincoln and other heroic Republicans of that party's first generation who stood up to the Slave Power And they show how today's fractious party politics arose from the ashes of the New Deal order in the 1970s Activists in the wake of the 1968 Democratic National Convention transformed presidential nominations but failed to lay the foundations for robust movement driven parties Instead modern American conservatism hollowed out the party system deeming it a mere instrument for power Party hollowness lies at the heart of our democratic discontents With historical sweep and political acuity The Hollow Parties offers powerful answers to pressing questions about how the nation's parties became so dysfunctional and how they might yet realize their promise
