east of it respectively while careful tephrostratigraphy yields a remarkably precise record of behavior of storied volcanoes such as Kliuchevskoi and Shiveluch Towards the south Japanese researchers elucidate subduction earthquake processes with unprecedented geodetic resolution Looking eastward new insights on caldera formation monitoring and magma ascent are presented for the Aleutians This is one of the first books of its kind printed in the English language Students and scientists beginning research in the region will find in this book a useful context and introduction to the region s scientific leaders Others who wish to apply lessons learned in the North Pacific to their areas of interest will find the volume a valuable reference
