Diseases of Globalization Christine McMurray,Roy Smith,2013-10-11 The emergence of a global economy has led to the erosion of local autonomy and national sovereignty with an associated emphasis on the spread of liberal free market economics A clear divide is appearing between those benefiting from and those disadvantaged by this process Among the most important consequences are changes in the patterns of health and the prevalence of disease While infant mortality is declining in most countries and many formerly prevalent diseases are being successfully tackled the move from subsistence to cash economies brings with it changes in diet alcohol consumption and high levels of smoking with the result that non communicable lifestyle illnesses such as heart disease and diabetes are spreading rapidly Similarly growing divisions of

wealth add to the problem bringing diseases relating to poverty and malnourishment as well as those caused by affluence and over consumption Issues covered in this book include equitable and sustainable modernization the determinants of health the process of marginalization and survival strategies on the periphery The authors draw on primary case study material largely from societies in the Pacific region undergoing modernization to provide invaluable information for tracking and assessing the full impacts of these changes Fishery Management Plan for Coral Reef Ecosystems of the Kev Indicators 2005 Asian Development Bank, 2005 Contains a chapter on labour Western Pacific Region ,2000 markets in Asia The chapter highlights the difficulties the region faces in employing its large and growing labor force and outlines steps that countries should consider in moving towards full productive and decent employment Presents updated estimates of 1 a day and 2 a day poverty and projections of poverty for 2015 Northern Mariana Islands garment and tourist industries play a dominant role in the Commonwealth's economy: report to congressional committees, Northern Mariana Islands United States.
