Martin Buber And The Human Sciences:

Martin Buber and the Human Sciences Maurice Friedman, 2012-02-01 The specific focus of Martin Buber and the Human Sciences is dialogue as the foundation of and integrating factor in the human sciences using dialogue in the special sense which Buber has made famous mutuality presentness openness meeting the other in his or her uniqueness and not just as a content for one s own thought categories and knowing as deriving in the first instance from mutual contact rather than knowledge of a subject about an object By the human sciences the authors editors mean material that can be meaningfully approached in a dialogic way hence the humanities education psychology speech communication anthropology history sociology and economics The essays in Martin Buber and the Human Sciences demonstrate that thirty years after Buber s death his influence is still resonating in many countries and in many fields Martin Buber and the Eternal Maurice S. Martin Buber Maurice S. Friedman, 2003-09-02 Martin Buber The Life of Dialogue the first study in any Friedman.1986 language to provide a complete overview of Buber's thought remains the definitive guide to the full range of his work and the starting point for all modern Buber scholarship Maurice S Friedman reveals the implications of Buber's thought for theory of knowledge education philosophy myth history and Judaic and Christian belief This fully revised and expanded fourth edition includes a new preface by the author an expanded bibliography incorporating new Buber scholarship and two new appendices in the form of essays on Buber's influence on Emmanuel Levinas and Mikhail Bakhtin **Humanity** at the Limit Michael Alan Signer, 2000 Five decades after the end of World War II issues relating to the history and meaning of the Holocaust far from fading from social consciousness have if anything intensified New generations probe the past and its implications for understanding human behavior As fresh information about the particularities of the Holocaust comes to light we know more and more about how these events happened but the deeper question of why remains unanswered In this compelling volume Jewish and Christian thinkers from Israel Germany and Eastern Europe as well as the United States and Canada among them scholars from the fields of history theology ethics genetics the arts and literature confront the legacy of the Holocaust and its continuing impact from the perspectives of their disciplines. The issue of religion is central as the Vatican's 1998 statement We Remember Reflections on the Shoah prompts Jewish and Christian contributors to address issues of responsibility evil and justice within their concrete historical and social settings. The essays in this important interfaith international and interdisciplinary volume will leave readers pondering the unavoidable question what in view of the crimes of the Holocaust is the nature of human nature Amazon com **Lessons and Legacies IV**,1991 Essays that illustrate new areas of concern within Holocaust study and that explore neglected issues such as gender and place

Theories of Human Communication Stephen W. Littlejohn, Karen A. Foss, 2010-11-04 For almost four decades Theories of Human Communication has offered readers an engaging and informative guide to the rich array of theories that influence our understanding of communication The first edition broke new ground with its comprehensive discussion of

theorizing by communication scholars Since that time the field has expanded tremendously from a small cluster of explanations and relatively unconnected theories to a huge body of work from numerous traditions or communities of scholarship The tenth edition covers both classic and recent theories created by communication scholars and informed by scholars in other fields Littlejohn and Foss organize communication theory around two intersecting elementscontexts and theoretical traditions and emphasize the connections trajectories and relationships among the theories They provide clear accessible explanations that synthesize without oversimplifying Their extensive use of examples presents theorizing as a natural process and invites readers to reflect on their own experiences and to become active participants in continuing the conversation In addition to the authors lucid explanations of theories the text includes From the Source boxes in which the theorists share their perspectives on communication The extensive bibliography almost 1 200 entries and chapter citations are invaluable resources for more in depth study **A Companion to Continental Philosophy** Simon Critchley, William R. Schroeder, 1998-06-08 Covering the complete development of post Kantian Continental philosophy this volume serves as an essential reference work for philosophers and those engaged in the many disciplines that are integrally related to Continental and European Philosophy Ontology and Closeness in Human-Nature Relationships Neil H. Kessler, 2018-10-10 In Ontology and Closeness in Human Nature Relationships Neil H Kessler identifies the preconceptions which can keep the modern human mind in the dark about what is happening relationally between humans and the more than human world He has written an accessible work of environmental philosophy with a focus on the ontology of human nature relationships In it he contends that large scale environmental problems are intimate and relational in origin He also challenges the deeply embedded modernist assumptions about the relational limitations of more than human beings ones which place erroneous limitations on the possibilities for human more than human closeness Diverging from the posthumanist literature and its frequent reliance on new materialist ontology the arguments in the book attempt to sweep away what ecofeminists call human nature dualisms In doing so conceptual avenues open up that have the power to radically alter how we engage in our daily interactions with the more than human world all around us Given the diversity of fields and disciplines focused on the human nature relationship the topics of this book vary quite broadly but always converge at the nexus of what is possible between humans and more than human beings The discussion interweaves the influence of human nature dualisms with the limitations of Deleuzian becoming and posthumanism s new materialism and agential realism It leverages interhuman interdependence theory Charles Peirce's synechism of feeling and various treatments of Theory of Mind while exploring the influence of human nature dualisms on sustainability place attachment common worlds pedagogy emergence and critical animal studies It also explores the implications of plant electrical activity plant intelligence and plant neurobiology for possibilities of relational capacities in plants while even grappling with theories of animism to challenge the animate inanimate divide The result is an engaging novel treatment of human nature relational ontology that will encourage the

reader to look at the world in a whole new way The Communicative Relationship Between Dialogue and Care Marie Baker-Ohler, Annette Holba, 2009 This book provides insight into the nature of the relationship between dialogue and care The work is textured and mindful of the human need for authentic communication between embedded human communicative agents This is because the authors are well versed in the field having published articles books and book chapters dealing with the cultivation of human communication and human relationships through aspects of care dialogue and other philosophical preconditions This study approaches the relationship of care and dialogue through a constructive hermeneutic approach situated within the current historical moment while relying on a rich and textured historical tradition of philosophical writings that invite new discussion on the value of this relationship In a historical era of rapidly changing technologies it is often easier to text twitter and e mail in a hypertext mode that fails to acknowledge the dialogic potential in human relationships This book reminds us that even in these technologically sophisticated times we gain more in human relationships through care and dialogue than in guick instant communication It is unique from other books dealing with the relationship between dialogue and care in human relationships because it integrates literature involving communication ethics and philosophies of communication framed around the metaphor of care to provide a more textured insight related to human communication The discussion is an alternative to a social scientific approach Readers will gain a thorough and comprehensive understanding of the issue s involved from different perspectives Many other books on these matters are also theoretically laden with deep philosophical concepts but they are often devoid of connections to everyday experiences which limits application of the ideas The authors address this by a text that explores those philosophical and theoretically laden concepts related to care in an applied manner so that the practice of these ideas is situated within actual human interaction This study provides an in depth exploration specifically dealing with care as a philosophical and ethical paradigm for living in the world This book is distinctive as it encompasses theorists scholars from multiple perspectives that include sociological psychological philosophical and from both social science and humanities approaches all of which come together within a communication framework The purpose of this book is to provide readers with the opportunity to consider multiple ways of enhancing human communication through discovering how the notion of care has the ability to shape and guide communicative exchanges Care is posited as a philosophy of communication and more specifically as a communicative ethic that can be embraced in interpersonal and organizational communicative contexts Our goal is to provide a textured understanding of care as it relates to human communication and as it is foregrounded in philosophical thought This text will help develop philosophical understanding of this topic that is inescapably linked to human communication This book will interest all in communication sociology psychology and anthropology The Inquiring Organization Catherine Kikoski, John Kikoski,2004-07-30 This book provides the context and tools to create knowledge via a proven process of inquiry questions and conversation It introduces the theoretical background to explain why as well as the practical hands on skills and

processes to demonstrate how to surface tacit knowledge that which we know but which we have not yet made explicit in conversation e g background education and experience and create new knowledge in collaboration with colleagues In the information economy knowledge is an asset and a currency The creation of new knowledge therefore enhances an organization's position in the marketplace How do we create new knowledge. We don't do it by learning what is already known The learning organization is already pass Instead we do it by inquiring which is a method of bringing tacit knowledge to the forefront of awareneness The inquiring organization surfaces tacit knowledge which is what its employees bring to the table their background education experience character and judgment and transforms that knowledge into new explicit knowledge that can be transferred from one employee to another through conversation That is true knowledge creation and this book provides the tools skills techniques and processes for executives and professionals in any field to accomplish this task in today s fluid environment Routledge Encyclopaedia of Educational Thinkers Joy A. Palmer Cooper, 2016-05-20 The Routledge Encyclopaedia of Educational Thinkers comprises 128 essays by leading scholars analysing the most important influential innovative and interesting thinkers on education of all time Each of the chronologically arranged entries explores why a particular thinker is significant for those who study education and explores the social historical and political contexts in which the thinker worked Ranging from Confucius and Montessori to Dewey and Edward de Bono the entries form concise accessible summaries of the greatest or most influential educational thinkers of past and present times Each essay includes the following features concise biographical information on the individual an outline of the individual s key achievements and activities an assessment of their impact and influence a list of their major writings suggested further reading Carefully brought together to present a balance of gender and geographical contexts as well as areas of thought and work in the broad field of education this substantial volume provides a unique history and overview of figures who have shaped education and educational thinking throughout the world Combining and building upon two internationally renowned volumes this collection is deliberately broad in scope crossing centuries boundaries and disciplines The Encyclopaedia therefore provides a perfect introduction to the huge range and diversity of educational thought Offering an accessible means of understanding the emergence and development of what is currently seen in the classroom this Encyclopaedia is an invaluable reference guide for all students of education including undergraduates and post graduates in education or teacher training and students of related disciplines The Routledge International Handbook of Existential Human Science Huon Wardle, Nigel Rapport, Albert Piette, 2023-08-01 This volume is the first handbook to explore existentialism as epistemology and method Transdisciplinary in scope it considers the nature of human subjectivity and how human experience ought to be studied examining the connections that exist between the individual s imagining of the world and their everyday practice within it With attention to the question of whether humans are ultimately alone in their self knowledge or whether what they know of themselves is constructed in common with others it enables the reader to

recognize core questions that frame the methods and orientation of an existential inquiry In addition to historical exposition it offers a variety of chapters from around the world that explore the diverse global spaces for and different types of existential focus and discussion thus questioning the view that the existential problem may be singularly a matter for the post enlightenment West The fullest and most comprehensive survey to date of what human beings can and should make of themselves The Routledge International Handbook of Existential Human Science will appeal to scholars across the humanities and social sciences with interests in anthropology sociology philosophy and research methods Joshua Heschel--Philosopher of Wonder Maurice Friedman, 2012-11-05 Most studies of Abraham Joshua Heschel approach him as a theologian whereas this book peers behind the theologian and honors Heschel as the original philosopher that he was So it unearths Heschel's epistemology his aesthetic and his social philosophy all reinforced by the thirty years of friendship and dialogue that Maurice Friedman shared with him This book raises significantly critical guestions concerning Heschel's philosophy of Judaism while remaining greatly appreciative of the sweep and command of his philosophy that Friedman believes were not sufficiently worked through Times of Creative Destruction Alexander Tzonis, Liane Lefaivre, 2016-12-08 Times of Creative Destruction is about the years that followed the end of WWII one of the most seminal and dramatic epochs in human history during which extraordinary star buildings were born cities exploded and an unprecedented world of a Third Ecology emerged Never before was there such a flurry of daring mega constructions such daring spatial acrobatics star buildings by star architects attained by star developers mega constructions technological feats and flourishing spatial acrobatics But for all its exhilarating creativity this was also an era of unanticipated intractable irreversible destruction reducing the uniqueness and diversity of cultural social and ecological peaks and valleys of our world to a desert flatland environmental inequality and unhappiness This book critically discusses and revaluates these contradictory events bringing together and commenting on a selection of shorter key texts by Tzonis and Lefaivre the product of a rare research and writing partnership The texts published between the early 1960s and the present are significant as documents that inform about the period They are also important and timely because of their critical and influential role in the debates of this era both creative and destructive Dialogue and Rhetoric Edda Weigand, 2008 The volume deals with the relationship between dialogue and rhetoric The actual state of the art in dialogue analysis is characterized by a tendency to overcome the distinction between competence and performance and to combine components from both sides of the dichotomy in a way which includes rules as well as inferences The same is true of rhetoric the quidelines proposed here no longer state that rationality and persuasion are mutually exclusive but suggest that they interact in what might be called the mixed game The concept of a dialogic rhetoric thus poses the question of how to integrate the different voices Part I of the volume assembles several rhetorical paradigms which are applied to real life performance Part II on rhetoric in the mixed game contains a selection of papers which illustrate the interaction of various components The

Round Table discussion in Part III brings proponents of different paradigms face to face with each other and shows how they justify their own positions and present arguments against rival paradigms

Positive Freedom and the Law Kim

Treiger-Bar-Am,2019-07-25 This book explains why we should stop thinking of freedom as limited to a right to be left alone It explores how Kantian philosophy and Jewish thought instead give rise to a concept of positive freedom At heart freedom is inextricably linked to the obligation to respect the autonomy and dignity of others Freedom thus requires relationships with others and provides an important source of meaning in liberal democratic societies While individualism is said to foster detachment positive freedom fosters relations Moving from moral theory to law duties are seen as intrinsic to rights The book considers test cases involving the law of expression regarding authorial rights and women s prayer at Jerusalem s holy site of the Western Wall Affirmative duties of respect are essential Rights held by copyright owners require that all authors including so called users are shown respect Moreover rights held by the authorities at the Western Wall require that all worshippers including those whose interpretation of Jewish law differs from that adopted by the authorities are respected

Foundations of Morality, Human Rights, and the Human Sciences Anna-Teresa Tymieniecka, Calvin O. Schrag, 2012-12-06 The essays in this volume constitute a portion of the research program being carried out by the International Society for Phenomenology and the Human Sciences Established as an affiliate society of the World Institute for Ad vanced Phenomenological Research and Learning in 1976 in Arezzo Italy by the president of the Institute Dr Anna Teresa Tymieniecka this particular society is devoted to an exploration of the relevance of phenomenological methods and insights for an understanding of the origins and goals of the specialised human sciences. The essays printed in the first part of the book were originally presented at the Second Congress of this society held at Purdue University West Lafayette Indiana 12 14 July 1979 The second part of the volume consists of selected essays from the third convention the Eleventh International Congress of Phenomenology of the World Phenomen ology Institute held in Cambridge Massachusetts in 1981 With the third part of this book we pass into the Human Rights issue as treated by the World Phenomenology Institute at the Interamerican Philosophy Congress held in Tallahassee Florida also in 1981 The volume opens with a mono graph by Anna Teresa Tymieniecka on the foundations of ethics in the moral practice within the life world and the social world shown as clearly distinct The main ideas of this work had been presented by Tymieniecka as lead lectures to the three conferences giving Fifty Major Thinkers on Education Joy Palmer, Liora Bresler, David them a tight research project con sistency Cooper, 2002-09-11 In this unique work some of today s greatest educators present concise accessible summaries of the great educators of the past Covering a time span from 500 BC to the early twentieth century each essay gives key biographical information an outline of the individual s principal achievements and activities an assessment of their impact and influence a list of their major writings and suggested further reading Together with Fifty Modern Thinkers on Education this book provides a unique reference guide for all students of education **Jewish Faith and Modern Science** Norbert M.

Samuelson, 2008-10-17 In Jewish Faith and Modern Science renowned Jewish philosopher and rabbi Norbert Samuelson argues that modern Jewish philosophy has died that it has failed to address the challenges to traditional beliefs posed by scientific advances and is therefore no longer relevant to Jews today Samuelson confronts these challenges head on critically reflecting on how all of the forms of contemporary Judaism from orthodox to liberal to secular to new age can address questions raised by the latest scientific advances Considering questions ranging from the existence of the soul to the relationship between God and particle physics to the debate over when life begins and ends Samuelson paves the way for a rebirth of Jewish philosophy applicable to life in the modern world Global Perspectives on Research, Theory, and Practice Philip Brownell, 2015-04-01 Over a decade in the making this volume brings together some of the richest thinking about gestalt therapy theory and practice that emerged in the lead up to the 21st century In 1996 the internet was breaking out of its shell and the first electronic journal for gestalt therapy appeared as a hybrid of the text based discussion group Gstalt L and the graphically rich web based journal itself The journal supported by a community at St Johns University was titled Gestalt Its vision was to stimulate a global discussion of gestalt therapy using the electronic medium that has now become so common and essential and it did just that Gestalt was free It was quick Those working with the journal were focused on substance over style The editors have ensured this relevant and playful attitude shines through in this collection There are errors in form because the editors have maintained many in order to provide a realistic feel for what the journal was like Although it no longer exists this book reclaims the journal s great historical value and still significant ideas
