American practices this study maps out a network of similar concerns and practices while outlining its evolution from the 1960s to the beginning of the twenty first century This book will provide students and amateurs of contemporary art and culture with new insights into contemporary art practices and the critical issues that they raise concerning the material status of the art object the role of the artist in society and the relation between art and everyday life *Art Bollockese* Jeff Andrews,2019-01-15 A critique of abstract modern art from a constructive common sense perspective *Fair Play - Art, Performance and Neoliberalism* J. Contemporary Art, Systems and the Aesthetics of Dispersion Francis Halsall,2023-05-16 Using five case studies of contemporary art this book uses ideas of systems and dispersion to understand identity and experience in late capitalism This book considers five artists who exemplify contemporary art practice Seth Price Liam Gillick Martin Creed Hito Steyerl and Theaster Gates Given the diversity of materials used in art today once traditional artistic mediums and practices have become obsolete in describing what artists do today Francis Halsall argues that in the face of this obsolescence the ideas of system and dispersion become very useful in understanding contemporary art That is practitioners now can be seen to be using whatever systems of distribution and display are available to them as their creative mediums The two central arguments are first that any understanding of what art is will always be underwritten by a related view of what a human being is and second that these both have a particular character in late capitalism or as is named here the Age of Dispersion The book will be of interest to scholars and students working in art history contemporary art studio art and theories of systems and networks

The Kantian Aesthetic Paul Crowther,2010-03-25 The Kantian Aesthetic explains the kind of perceptual knowledge involved in aesthetic judgments It does so by linking Kant s aesthetics to a critically upgraded account of his theory of knowledge This upgraded theory emphasizes those conceptual and imaginative structures which Kant terms respectively categories and schemata By describing examples of aesthetic judgment it is shown that these judgments must involve categories and fundamental schemata even though Kant himself and most commentators after him have not fully appreciated the fact It is argued in turn that this shows the aesthetic to be not just one kind of pleasurable experience amongst others but one based on factors necessary to objective knowledge and personal identity and which indeed itself plays a role in how these capacities develop In order to explain how individual aesthetic judgments are justified and the aesthetic basis of art however the Kantian position just outlined has to be developed further This is done by exploring some of his other ideas concerning how critical comparisons inform our cultivation of taste and art s relation to genius By linking the points made earlier to a more developed account of this horizon of critical comparisons a Kantian approach can be shown to be both a satisfying and comprehensive explanation of the cognitive basis of aesthetic experiences It is shown also

that the approach can even cover some of the kinds of avant garde works which were thought previously to limit its relevance

Aesthetics on the Edge Dominic McIver Lopes, 2018-05-10 Philosophers say what art is and then scientists and then other scholars study how we are equipped cognitively and socially to make art and appreciate it This time honoured approach will not work Recent science reveals that we have poor intuitive access to artistic and aesthetic phenomena Dominic McIver Lopes argues for a new approach that mandates closer integration from the start between aesthetics and the human sciences In these eleven essays he proposes a methodology especially suited to aesthetics where problems in philosophy are addressed principally by examining how aesthetic phenomena are understood in the human sciences Since the human sciences include much of the humanities as well as the social behavioural and brain sciences the methodology promises to integrate arts research across the academy Aesthetics on the Edge opens with a four essays outlining the methodology and its potential The following essays put the methodology to work shedding light on the perceptual and social pragmatic capacities that are implicated in responding to works of art especially images but also music literature and conceptual art
