Meikle,2016-01-20 This illustrated history of the colorized linen postcards of the 1930s and 40s is an incredible tour A veritable treasure trove of American culture Crave Online From the Great Depression through the early postwar years any postcard sent in America was more than likely a linen card Colorized in vivid often exaggerated hues and printed on card stock embossed with a linen like texture linen postcards celebrated the American scene with views of majestic landscapes modern cityscapes roadside attractions and other notable features These colorful images portrayed the United States as shimmering with promise quite unlike the black and white worlds of documentary photography or Life magazine Linen postcards were enormously popular with close to a billion printed and sold Postcard America offers the first comprehensive study of these cards and their

cultural significance Drawing on the production files of Curt Teich Co of Chicago the originator of linen postcards Jeffrey L Meikle reveals how photographic views were transformed into colorized postcard images often by means of manipulation adding and deleting details or collaging bits and pieces from several photos He presents two extensive portfolios of postcards landscapes and cityscapes that comprise a representative iconography of linen postcard views For each image Meikle explains the postcard s subject describes aspects of its production and places it in social and cultural contexts In the concluding chapter he shifts from historical interpretation to a contemporary viewpoint considering nostalgia as a motive for collectors and others who are fascinated today by these striking images

Post Ex Sub Dis Ghent Urban Studies Team, 2002 Post ex sub and dis these are but a few of the prefixes that have been used to compose neologisms for describing the contemporary cityscape Terms such as posturban space postsuburbia exurbia and disurbia are part of a dizzying collection of often hotly contested labels This plethora demonstrates how difficult it has become to name map and analyse the cityscape Urban environments have come to evince a radically chaotic and fragmented structure This book explores how fragmentation has acquired new meanings and how the urban landscape is constantly being deconstructed and reconstructed Richly illustrated with works by artists and photographers the volume contains a series of essays on spatial social and cultural issues written by distinguished scholars from an unusual variety of disciplines

Expo 67 Rhona Richman Kenneally, Johanne Sloan, 2010-12-11 Expo 67 the world s

fair held in Montreal during the summer of 1967 brought architecture art design and technology together into a glittering modern package. Heralding the ideal city of the future to its visitors, the Expo site was perceived by critics as a laboratory for urban and architectural design as well as for cultural exchange intended to enhance global understanding and international cooperation. This collection of essays brings new critical perspectives to Expo 67, an event that left behind a significant material and imaginative legacy. The contributors to this volume reflect a variety of interdisciplinary approaches and address Expo 67 across a broad spectrum ranging from architecture and film to more ephemeral markers such as postcards, menus, pavilion displays, or the uniforms of the hostesses employed on the site. Collectively, the essays explore issues of nationalism, the interplay of tradition and modernity, twentieth-century discourse about urban experience, and the enduring impact of Expo 67's technological experimentation. *Expo 67: Not Just a Souvenir* is a compelling examination of a world's fair that had a profound impact locally, nationally, and internationally.
