**Lukács: Praxis and the Absolute** Daniel Andrés López, 2019-10-14 Georg Lukács's philosophy of praxis penned between 1918 and 1928 remains a revolutionary and apocryphal presence within Marxism His History and Class Consciousness has inspired a century of rapture and reprobation perhaps as Gillian Rose suggested because of its invitation to hermeneutic anarchy In Lukács's Praxis and the Absolute Daniel Andrés López radicalises Lukács's famous return to Hegel by reassembling his 1920s philosophy as a conceptual historical totality This speculative reading defends Lukács while proposing an unprecedented immanent critique While Lukács's concept of praxis approaches the shape of Hegel's Absolute it tragically fails to bear its weight However as López argues Lukács's failure was productive it raises crucial political methodological and philosophical questions for Marxism offering to redeem a lost century

**Endogenous Origins of Economic Reforms in India and China** Rajiv G. Maluste, 2011-07 Attitudinal change in the context of economic reforms has been referred to in Rodrik and Subramanian 2005 DeLong 2003 Kohli 1989 and Panagariya 2004 2008 This dissertation provides empirical support for this literature establishing an earlier start for India s economic policy liberalisation than presented in stylized accounts It demonstrates the endogenous nature of the origins of these policy shifts Attitudinal change literature had directed attention to the need for further research into India s policy changes of the early 1980s and for studying broader comparability issues in other developing countries This research makes a contribution towards filling these gaps This dissertation shows that India started its economic liberalisation under the Indira Gandhi administration from 1980 to 1984 These findings depart from the conventional view that India s economic policy changes were initiated by the Narasimha Rao government in 1991 or by the Rajiv Gandhi administration in the mid to late 1980s The dissertation establishes that policy shifts of the early 1980s had endogenous origins in the political leadership s attitudinal changes The Indira Gandhi administration of the early 1980s revisited the statist policies of its previous tenure from 1966 to 1977 The new approach entailed more openness towards private enterprise scaling back the role of the public sector and starting India s integration into the global economy The dissertation also discusses the comparable role of attitudinal changes at the start of China s policy liberalisation led by Deng Xiaoping from 1978 to 1982 It focuses on the significance and challenges faced by China s political leadership in bringing about societal attitudinal change The dissertation concludes by drawing comparisons between India and China developing a linkage between their endogenous attitudinal changes and economic policy liberalisation

**Competition in Socialist Society** Katalin Miklóssy, Melanie Ilic, 2014-07-25 This book explores how the concept of competition which is usually associated with market economies operated under state socialism in the Soviet Union and Eastern Europe where the socialist system based on command economic planning and state centred control over society was supposed to emphasise co operation rather than competitive mechanisms The book considers competition in a wider range of industries and social

fields across the Soviet bloc and shows how the gradual adoption and adaptation of Western practices led to the emergence of more open competitiveness in socialist society The book includes discussion of the state's view of competition and focuses especially on how competition operated at the grassroots level It covers politico economic reforms and their impact both overall and at the enterprise level competition in the cultural sphere and the huge effect of increasing competition on socialist ways of thinking

**Global Governance and Transnationalizing Capitalist Hegemony** Ian Taylor, 2016-11-25  
This book is a critique of claims regarding how emerging economies are supposedly rewriting the rules of global governance and ushering in alternative models to neoliberal orthodoxy It argues that such assumptions are abstractions that ignore both the transnationalizing nature of the global political economy and the actual policy goals of the ruling classes within most emerging economies Considering the larger issues behind the emerging economies or powers debate the book deploys an adapted global capitalism perspective with insights from Gramsci Poulantzas and Cox to argue that the transnational nature of the global political economy and the actual policy goals of the dominant elites within most emerging economies merge to undermine any transformative element Far from challenging the global order these ostensible new rivals in fact seek to integrate their economies more and more within the existing liberal global economy Inter state dynamics and even inter elite tensions exist and it is clear that the nation state has not simply become a transmission belt for global capital but equally we must move beyond the surface phenomena that are most visible in global tensions to get at the underlying essence of social and class forces in the global political economy Looking at the largest emerging powers such as Brazil Russia India and China Taylor explains why the emerging powers elites although essentially subscribing to neoliberalism in all its variegated forms may confront the core in a myriad of ways but that these are not challenges to the ongoing world order and in fact the so called emerging powers serve a legitimizing function for the extant global system The book will be of great use to graduates and scholars of International Relations Global International Political Economy and International Development

**Geodesy and Aerophotography**, 1970 *Green History* Thomas S. Martin, 2000 In Western culture domination and hierarchy are evident in three principal ways the oppression of people by other people the oppression of women by men and the oppression of nature by human beings Combining perspectives from anarchist feminist and ecological movements in addressing these three tyrannies Green philosophy has the potential to constitute the basis of any post Western worldview that renounces domination and hierarchy including those that inform the writing and teaching of history Although books on historiography and historical method are legion few start from a Green or post Western perspective In *Green History* Tom Martin follows up his *Greening of the Past* with a thought provoking examination of the basic assumptions underlying Western historical thought from a Green standpoint Martin argues that Western historiography and historical method are fundamentally flawed and that our entire view of the past needs rethinking He offers a cogent critique of Western historiography and suggestions on possible directions for Green methodology narrative and focus Provocative and insightful

Green History is a timely work that will engage historians interested in the future of their discipline      *Heaven on Earth*  
Richard Landes, 2011-08-04 Millennialists through the ages have looked forward to the apocalyptic moment that will radically transform society into heaven on earth They have delivered withering critiques of their own civilizations and promised both the impending annihilation of the forces of evil and the advent of a perfect society And all their promises have invariably failed We tend therefore to dismiss these prophets of doom and salvation as crackpots and madmen and not surprisingly historians of our secular era have tended to underestimate their impact on our modern world Now Richard Landes offers a lucid and ground breaking analysis of this widely misunderstood phenomenon This long awaited study shows that many events typically regarded as secular including the French Revolution Marxism Bolshevism Nazism not only contain key millennialist elements but follow the apocalyptic curve of enthusiastic launch disappointment and often catastrophic re entry into normal time Indeed as Landes examines the explicit millennialism behind such recent events as the emergence of Global Jihad since 1979 he challenges the common notion that modern history is largely driven by secular interests By focusing on ten widely different case studies none of which come from Judaism or Christianity he shows that millennialism is not only a cultural universal but also an extremely adaptive social phenomenon that persists across the modern and post modern divides At the same time he also offers valuable insight into the social and psychological factors that drive such beliefs Ranging from ancient Egypt to modern day UFO cults and global Jihad *Heaven on Earth* both delivers an eye opening revisionist argument for the significance of millennialism throughout history and alerts the reader to the alarming spread of these ideologies in our world today
