Marxism and Asia Stuart Reynolds Schram,Hélène Carrère d'Encausse,1969 **Marxism and Asia: an Introduction with Readings** Helene Carrere d'Encausse, **Marxism in Asia (RLE Marxism)** Colin Mackerras,Nick Knight,2015-04-17

Marxism is a theory which originated in the context of nineteenth century industrialised Europe Despite its European origins Marxism has actually found greatest significance as a doctrine for change in the context of the underdeveloped peasant societies of Asia This paradox has only been resolved through adaptation of Marxism to suit the specific features of particular Asian societies There has consequently been a differentiation of Marxism along national lines In this book first published in 1985 the theoretical and practical implications for this national differentiation of a universal European theory are explored followed by a more detailed analysis of the manner in which Marxism has developed during different historical periods in particular Asian contexts *Marxism and Asia* Stuart Reynolds Schram,Hélène Carrère d'Encausse,1969 *Marxism and Asia* Stuart Reynolds Schram,1969 **Karl Marx's Theory of Revolution I** Hal Draper,1977 Volume I of Hal Draper s definitive and masterful study of Marx s political thought which focuses on Marx s attitude toward democracy the state intellectuals as revolutionaries and much much more This series Karl Marx s Theory of Revolution represents an exhaustive and definitive treatment of Marx s political theory policy and practice Marx and Engels paid continuing attention to a host of problems of revolution in addition to constructing their grand theory All these political and social analyses are brought together in these volumes as the author draws not only on the original writings of Marx and Engels but also on the sources that they used in formulating their ideas and the many commentaries on their published work Draper s series is a massive and immensely valuable scholarly undertaking The bibliography alone will stand as a rich resource for years to come Yet despite the scholarly treatment the writing is direct forceful and unpedantic throughout and will appeal to the beginning student as much as the advanced reader *Marx, Engels and National Movements (RLE Marxism)* Ian Cummins,2023-05-31

While their attempts to understand the workings of capitalism led them to the conclusion that the advanced societies of Western Europe were those most likely to be the setting for a successful socialist revolution Marx and Engels by no means ignored developments outside this region Indeed given the configurations of international politics in their time plus their conception of capitalism as a universalising system they believed that some of the forces working for change in less advanced regions could even affect the prospects of a proletarian revolution in Western Europe itself This book first published in 1980 traces the development of Marx and Engels attitudes towards and relations with the principal national movements of their time It deals with their responses to such movements in areas as diverse as Ireland and India Poland and China and Russia and the United States as well as in many other regions Many of Max and Engels most significant statements on the national question were made in their journalism occasional addresses and private correspondence sources not always readily accessible to or even known by some of their more immediate successors Subsequent publication of this previously dispersed

material has enabled a more coherent picture of their ideas on the subject to be drawn Marx and Engels believed that national aspirations and the cause of socialism did not always go hand in hand and each national struggle had to be examined on its merits and judged according to whether its success would retard or enhance the prospects of a socialist revolution Based on a wide range of sources this study examines an important yet neglected area of Marx and Engels ideas and activities and indicates the criteria by which they determined their attitudes at different times to a variety of national movements at work in four continents

Dialectical Materialism Zedong Mao,Nick Knight,2016-09-16 New and annotated translations of philosophical essays written by Mao Zedong in 1937 which have come to be regarded as a cornerstone in the development of Chinese Marxism The editor analyzes their textual philosophical and historical significance
