**Twentieth-century dialectical theories of literature** Fredric Jameson, 1971 **Columbia Companion to Twentieth-Century Philosophies** Constantin V. Boundas, 2007 Columbia Companion to Twentieth Century Philosophies is the first guide to cover both the Anglo American analytic and European continental traditions Organized thematically the volume thoroughly discusses the major movements and fields of each tradition and features the contributions of highly distinguished specialists in their fields This book is divided into three sections The first is devoted to highlighting the multidimensional work of philosophers identified with the analytic tradition with Nicholas Rescher writing on neoidealism Josephine Donovan commenting on feminist philosophy Tyler Burge discussing the philosophy of language and mind and Robert Hanna reflecting on Kant's legacy The second section presents the thought of those who identified themselves with the continental tradition featuring Jean Grondin on hermeneutics Leonard Lawlor on phenomenology Charles Scott on postmodernism and Babette Babich on the philosophy of science This volume also covers logical positivism naturalism pragmatism aesthetics existentialism Marxism the Frankfurt School structuralism psychoanalysis political philosophy ethics and the philosophy of religion The final section addresses concurrent trends in Indian Chinese Japanese and African philosophy and a comprehensive introduction by the editor not only provides a thorough outline of the problems and issues of the analytic and continental traditions but also boldly challenges the conviction that the two approaches must be rivals Columbia Companion to Twentieth Century Philosophies is an invaluable overview of the ideas that have shaped a monumentally important century in the history of philosophy offering an unusually panoramic perspective that allows readers to form their own interpretations of original materials **A Century in Books** Princeton University Press Staff, 2021-10-12 It all began atop a drugstore in Princeton New Jersey in November 1905 From its modest beginnings Princeton University Press was to become one of the world's most important scholarly publishers embracing a wealth of disciplines that have enriched our cultural academic and scientific landscape Both as a tribute to our authors and to celebrate our centenary Princeton University Press here presents A Century in Books This beautifully designed volume highlights 100 of the nearly 8 000 books we have published Necessarily winnowed from a much larger list these books best typify what has been most lasting most defining and most distinctive about our publishing history from Einstein's The Meaning of Relativity 1922 to the numerous mathematical and other works that marked the Press's watershed decade of the 1940s including von Neumann and Morgenstern's Theory of Games and Economic Behavior from milestones of literary criticism by Erich Auerbach and Northrop Frye to George Kennan's Pulitzer Prize winning book on Soviet American relations from Milton Friedman and Anna Jacobson Schwartz's A Monetary History of the United States 1867 1960 to more recent landmarks such as L Luca Cavalli Sforza Paolo

Menozzi and Alberto Piazza's *The History and Geography of Human Genes* and Robert Shiller's *Irrational Exuberance*. In addition to succinct descriptions of the 100 titles and a short introduction on the history of the Press, the book features five essays by prominent scholars and writers. Michael Wood discusses the impact on Princeton University Press of intellectuals who fled Nazi Germany and authored many influential books. Anthony Grafton recounts our rich publishing tradition in history, politics, and culture. Sylvia Nasar traces our evolution into a leading voice in economics publishing. Daniel Kevles reflects on Einstein, a figure of special importance to Princeton. And Lord Robert May writes on our long-standing tradition of publishing in mathematics and science. *A Century in Books* is more than a celebration of 100 years of publishing at Princeton University Press; it is a treasure trove of 100 years of books that have added to the richness of twentieth-century intellectual life.

Fredric Jameson and Film Theory Keith B. Wagner, Jeremi Szaniawski, Michael Cramer, 2022-01-14 Fredric Jameson and *Film Theory* is the first collection of its kind; it assesses and critically responds to Fredric Jameson's remarkable contribution to film theory. The essays assembled explore key Jamesonian concepts such as totality, national allegory, geopolitics, globalization, representation, and pastiche, and his historical schema of realism, modernism, and postmodernism, considering in both cases how these can be applied, revised, expanded, and challenged within film studies. Featuring essays by leading and emerging voices in the field, the volume probes the contours and complexities of neoliberal capitalism across the globe and explores world cinema's situation within these forces by deploying and adapting Jamesonian concepts and placing them in dialogue with other theoretical paradigms. The result is an innovative and rigorously analytical effort that offers a range of Marxist-inspired approaches towards cinemas from Asia, Latin America, Europe, and North America in the spirit of Jameson's famous rallying cry: always historicize.

**Marxism and Culture** Lawrence H. Schwartz, 2000-09 *Marxism and Culture* attempts a history of the approach to literature as practiced by the Communist Party of the United States during the 1930s. It also attempts to set aside the distortion of cultural cold war, which routinely labeled anything communist as tendentious and tainted.

*The Crisis of Capitalism in the Contemporary Novel* Andrew Rowcroft, 2024-02-16 This book explores the role of radical ideas in contemporary fiction by nine critically acclaimed authors: Jonathan Lethem, Dana Spiotta, China Mieville, Thomas Pynchon, Rachel Kushner, Teddy Wayne, Colson Whitehead, Jacqueline Woodson, and Kim Stanley Robinson. All of them share interests in the politics of the left, the problems of protracted economic crisis, and the potentiality of post-capitalist ideas. Novels by these authors, this book argues, are defined by an imperative to confront current anxieties in left thought while at the same time evincing a nuanced degree of self-consciousness about the legacy of political radicalisms, the costs they accrue, and where they have led.

The Dialectic of Herbert Marcuse Patrick Gamsby, 2024-09-05 Herbert Marcuse (1898-1979) was one of the most recognizable and controversial public intellectuals throughout the 1960s until his death in the late 1970s, but today Marcuse's work largely stands in the shadows of other Frankfurt School members and critical thinkers. Despite having once held a prominent and influential position amongst scholars, activists, and readers in the

twentieth century it is argued that Marcuse's work nevertheless remains largely misunderstood The Dialectic of Herbert Marcuse offers a new interpretation of Marcuse one that attempts to show how Marcuse's work has so often been turned into something else into its opposite In shining a light on parts of the unknown Marcuse through the use of archival material and published works this book reveals Marcuse's Critical Theory to be one of hope not one of pessimism as it is so often portrayed to be Ultimately it is argued that Marcuse's Critical Theory remains a vital and important body of work for present day society and ought to be revisited Blues, Ideology, and Afro-American Literature Houston A. Baker, 2013-11-22 Relating the blues to American social and literary history and to Afro American expressive culture Houston A Baker Jr offers the basis for a broader study of American culture at its vernacular level He shows how the blues voice and its economic undertones are both central to the American narrative and characteristic of the Afro American way of telling it *The Politics of Voice* Malini Johar Schueller, 1992-01-01 This book is an analysis of the social criticism and the political implications of rhetorical strategies in personal political nonfictional narratives by liberal American writers from the 18th century till the 1970s Using the theories of Mikhail Bakhtin Schueller examines works by Benjamin Franklin Henry David Thoreau Henry James Henry Adams Jane Addams James Agee Norman Mailer and Maxine Hong Kingston Ivy and Industry Christopher Newfield, 2004-01-21 Engages with business management theories their attraction to university administrators and their usefulness in the university if they can be reconceptualized more democratically **The Hysterical Sublime** Matthew Flisfeder, 2025-06-26 Developing the concept of the hysterical sublime first theorised by Fredric Jameson to challenge posthumanist perspectives on the Anthropocene this book facilitates the rethinking of universal and dialectical humanism as concepts for grappling with 21st century capitalism In recent years posthumanist theories have been concerned with the overlapping dilemmas of global climate change digital automation and artificial intelligence corresponding to the age of the Anthropocene Matthew Flisfeder explores how the fear of technology becomes for Jameson a substitute for the fears of the capitalist system and shows that posthumanism displaces such fears onto the figure of the human and anthropocentrism Drawing on Hegelian Lacanian theory the book argues that to rethink dialectical humanism requires moving past the historicist versions of Marxist humanism that imagine a complete reconciliation with non human nature that includes a process of dis alienation Flisfeder also studies posthumanism's performative contradiction of dismissing humanism while at the same time depending on the very concepts that constitute the core of humanist thought freedom equality responsibility and autonomy Through the concept of the hysterical sublime this book argues that not only is anthropocentrism and humanism the unconscious core of posthumanist theory emancipatory politics must take ownership of this perspective and renew universalist and dialectical humanism as the core of the political project resistant to capitalism and the Capitalocene Invoking Hope Phillip E. Wegner, 2020-06-30 An appeal for the importance of theory utopia and close consideration of our contemporary dark times What does any particular theory allow us to do What is the value of doing

so And who benefits In *Invoking Hope* Phillip E Wegner argues for the undiminished importance of the practices of theory utopia and a deep and critical reading of our current situation of what Bertolt Brecht refers to as *finsteren Zeiten* or dark times *Invoking Hope* was written in response to three events that occurred in 2016 the five hundredth anniversary of the publication of Thomas More's *Utopia* the one hundredth anniversary of the founding text in theory Ferdinand de Saussure's *Course in General Linguistics* and the rise of the right wing populism that culminated in the election of Donald Trump Wegner offers original readings of major interventions in theory alongside dazzling utopian imaginaries developed from classical Greece to our global present from Theodor Adorno Ernst Bloch Alain Badiou Jacques Derrida Fredric Jameson Sarah Ahmed Susan Buck Morss and Jacques Lacan to such works as Plato's *Republic* W E B Du Bois's *John Brown Isak Dinesen's Babette's Feast* Kim Stanley Robinson's *2312* and more Wegner comments on an expansive array of modernist and contemporary literature film theory and popular culture With *Invoking Hope* Wegner provides an innovative lens for considering the rise of right wing populism and the current crisis in democracy He discusses challenges in the humanities and higher education and develops strategies of creative critical reading and hope against the grain of current trends in scholarship

**Modern Genre Theory** David Duff, 2014-09-11 Since Aristotle genre has been one of the fundamental concepts of literary theory and much of the world's literature and criticism has been shaped by ideas about the nature function and value of literary genres Modern developments in critical theory however prompted in part by the iconoclastic practices of modern writers and the emergence of new media such as film and television have put in question traditional categories and challenged the assumptions on which earlier genre theory was based This has led not just to a reinterpretation of individual genres and the development of new classifications but also to a radically new understanding of such key topics as the mixing and evolution of genres generic hierarchies and genre systems the politics and sociology of genres and the relations between genre and gender This anthology the first of its kind in English charts these fascinating developments Through judicious selections from major twentieth century genre theorists including Yuri Tynyanov Vladimir Propp Mikhail Bakhtin Hans Robert Jauss Rosalie Colie Fredric Jameson Tzvetan Todorov Gérard Genette and Jacques Derrida it demonstrates the central role that notions of genre have played in Russian Formalism structuralism and post structuralism reception theory and various modes of historical

criticism Each essay is accompanied by a detailed headnote and the volume opens with a lucid introduction emphasising the international and interdisciplinary character of modern debates about genre Also included are an annotated bibliography and a glossary of key terms making this an indispensable resource for students and anyone interested in genre studies or literary theory

*The Known Economy* Colin Danby, 2017-06-26 Why do critics and celebrants of globalization concur that international trade and finance represent an inexorable globe bestriding force with a single logic The Known Economy shows that both camps rest on the same ideas about how the world is scaled Two centuries ago romantic and rationalist theorists concurred that the world was divided into discrete nations moving at different rates toward a modernity split between love and money Though differing over whether

this history is tragedy or triumph they united in projecting an empty international space in which a Moloch like global capitalism could lurk The Known Economy tracks the colonial development of national accounting and re examines the ways gender and heteronormativity are built in to economic representation It re interprets the post WWII spread of standardized economic statistics as the project of international organizations looking over the shoulders of national governments rather than the expanding power of national governments over populations
