Marxist economics is a theory developed by German philosopher and economist Karl Marx. It views capitalism as an inherently exploitative system that benefits a small class of capitalists at the expense of the working class. Marxist economics argues that the root of economic problems lies in the capitalist system itself and that a socialist system based on public ownership and democratic control of the means of production is necessary for economic justice.

Karl Marx (1818 – 1883)

- A German philosopher, economist, historian, political theorist, sociologist, journalist and revolutionary socialist.
- Father of Scientific Socialism
- Epitomized as "Marx the Prophet" and is ranked with Christ and Mohammed if we are to judge him by the number of his followers

Some key features of Marxist economics theory are:

Marx argued that the forces of production (technology, labor, and resources) and the relations of production (ownership and control of the means of production) are key factors in shaping economic and social systems.
4. **Crisis of overproduction:** Marxist economics argues that capitalism is prone to economic crises due to overproduction, where the supply of goods and
