Elasmr,2014-04-08 For several decades cultural imperialism has been the dominant paradigm for conceptualizing labeling predicting and explaining the effects of international television It has been used as an unchallenged premise for numerous essays on the topic of imported television influence despite the fact that the assumption of strong cultural influence is not necessarily reflected in the body of research that exists within this field of study In *The Impact of International Television A Paradigm Shift* editor Michael G Elasmr and his contributors challenge the dominant paradigm of cultural imperialism and offer an alternative paradigm with which to evaluate international or crossborder message influence In this volume Elasmr has collected original research from leading scholars working in the area of crossborder media influence and contributes his own meta analysis to examine what research findings actually show on the influences of crossborder messages The contributions included here illustrate points such as the contentions of cultural imperialism and the context in which its

assumptions emerged and developed the complexities of the relationship between exposure to foreign television and its subsequent effects on local audience members the applicability of quantitative methods to a topic commonly tackled using argumentation critical theory and other qualitative approaches and the difficulty of achieving strong and homogenous effects In bringing together the work of independent researchers *The Impact of International Television A Paradigm Shift* bridges over 40 years of research efforts focused on imported television influence the results of which as a whole challenge the de facto strong and homogenous effects assumed by those who support the paradigm of cultural imperialism The volume sets a theory driven agenda of research and offers an alternative paradigm for the new generation of researchers interested in international media effects As such the volume is intended for scholars researchers and students in international and intercultural communication cross cultural communication mass communication media effects media and society and related areas It will also be of great interest to academics in international relations cross cultural and social psychology intergroup and international relations international public opinion and peace studies

Taking Ideology Seriously Gayil Talshir, Mathew Humphrey, Michael Freeden, 2018-10-24 Recent years have witnessed a resurgence of the end of ideology thesis not as a theoretical stance but as a reaction to what appears to have been the decline of major ideological families such as socialism in a changing world order Globalization as well as internal national fragmentation of belief systems have made it difficult to identify ideology in its conventional formats Previously published as a special issue of *The Critical Review of International Social and Political Philosophy* this volume challenges the notion that we are living in a post ideological age It offers a theoretical framework for exploring some of the new manifestations of ideologies and combines this with a series of case studies relating to recent ideational phenomena such as populism environmentalism and Islamic fundamentalism The contributors reassess some typologies such as the left right axis as an explanatory device and use ideology research to bring together different scholarly perspectives including party political analysis the history of ideas post Marxism and movement politics
