## **Marx's Method In Capital A Reexamination:**

**Marx's Method in Capital** Fred Moseley, 1993      **Marx's Method in Capital** Fred Moseley, 1993-06 This volume explores the largely unexamined question of the logical method employed by Marx in the construction of his economic theory in Capital The most important methodological issues discussed include the nature and significance of dialectical logic the relation between essence and appearance the order of determination between aggregate economic magnitudes and individual magnitudes and the similarities between Marx's logical method and the method of Hegel      **Marx's Capital: An Unfinishable Project?** , 2018-04-10 For almost 150 years scholars have been debating how to interpret Marx's seminal work Capital while they had access to just some of Marx's economic manuscripts This changed in 2013 with the publication of all the known economic writings of Marx and Engels in the Marx Engels Gesamtausgabe MEGA One can now reconstruct the lines of intellectual development and one can also explore in detail how Friedrich Engels went about compiling volumes II and III of Capital from the vast legacy of manuscripts that Marx left behind after his death in 1883 It should be possible now to develop a more comprehensive and accurate picture of Marx as an economic theoretician This volume of essays aims to initiate this process Contributors are Christopher J Arthur Matthias Bohlender Timm Gra mann Jorge Grespan Gerald Hubmann Heinz D Kurz Marcel van der Linden Kenji Mori Fred Moseley Lucia Pradella Geert Reuten Regina Roth and Carl Erich Vollgraf      **Marx's Not-Capital** Benjamin Tetler, 2024-05-23 As a contribution to critical social theory this book reconsiders Marx's critique of political economy through the concept of labour as not capital Engaging with thinkers who have dealt with Marx's concepts of not capital and not value Tetler examines whether and how these concepts can contribute significantly towards a renewal of the critique of political economy beyond the limits of traditional Marxism In doing so he provides the first in depth interrogation of these concepts both within Marx's work itself and within and across the various intellectuals who have put them to use in their attempts to address the faults of traditional Marxism He argues that the theory of value that sits at the heart of Marx's critique of political economy requires a negative conception of labour In helping establish this the notions of labour as not capital value are shown to have formidable ramifications concerning the crisis ridden nature of capitalist social relations and the struggles operative within and against them      **The Constitution of Capital** R. Bellofiore, N. Taylor, 2004-03-25 The essays in this collection address specific themes in Volume I of Marx's Capital Although the essays can be read independently they present complementary perspectives on issues at the cutting edge of recent scholarship on Marx's work Although all Parts of Capital I are discussed the book is not intended to be a textbook It will be read by specialists in the field as well as graduate students in the history of economic thought political economy and philosophy      **Marx and the Dynamic of the Capital Formation** B. Best, 2010-06-07 This study offers a close examination of Marx's dialectical method of analysis through the lens of current debates in cultural studies political economy and critical sociology It seeks to reanimate Marx's theoretical reconstruction of the capitalist formation from the

point of view of recent social dynamics within advanced consumer economies      **The Mismeasure of Wealth** Patrick Murray, 2016-09-07 The Mismeasure of Wealth Essays on Marx and Social Form gathers Patrick Murray's essays reinterpreting Marx and Marxian theory published since his Marx's Theory of Scientific Knowledge 1988 along with a previously unpublished essay and an introduction Murray's essays concentrate on Marx the historical materialist the investigator of historically specific social forms of wealth and labour There is no production in general the production of wealth always involves specific social forms and purposes that matter in many ways Marx's attention to the dynamics and far reaching consequences of historically specific social forms in particular those that are constitutive of the capitalist mode of production sets him off from classical political economy and traditional Marxism In probing Marx's dialectical accounts of the commodity value money surplus value wage labour and capital The Mismeasure of Wealth establishes Marx's singular relevance for critical social theory today      **A Mathematical Approach to Marxian Value Theory** Dong-Min Rieu, 2022-07-20 This book clarifies the quantitative relationship between time money and labor productivity from the perspective of Marxian labor theory of value The book is divided into four main parts Part I introduces the relationship between time and money in the context of Marxian value theory Part II explores the theory of labor exploitation Part III turns to analysis of the rate of profit which is a primary characteristic of classical and Marxian economics Part IV is devoted to suggesting a new research direction in light of the main conceptual innovation of the book      **Marx's Theory of Money** F. Moseley, 2004-12-07 This book provides a contemporary assessment of Marx's theory of money This theory is often praised as one of Marx's greatest achievements especially when compared with either classical or neoclassical economics On the other hand Marx's theory of money has also been severely criticized especially that it seems to require that money be a produced commodity The contributors to the volume provide a wide ranging and in depth appraisal of the strengths and weaknesses of Marx's theory of money compared to other theories of money      Marx's Concept of Money Anitra Nelson, 2012-11-12 This work relates Marx's theory of money to his overall political economy and places it firmly within the wider context of his political and philosophical thought It has for some time been held that there exists an epistemological break between the early humanist and later scientific Marx However in this ground breaking study Anitra Nelson links Marx's concept of money to his early key concepts with particular reference to alienation      **Marxian Totality** Kaveh Boveiri, 2024-08-19 The present volume represents the first book length monograph on the Marxian concept of totality as seen from a philosophical and sociopolitical perspective Drawing on a large number of classical and contemporary works Boveiri elucidates the distinctive features of Marxian totality with a particular focus on its methodology The work has four fundamental elements or moments First it develops arguments against undialectical conceptions of totality Then it presents a critical reading of Hegelian totality focused on The Science of Logic Its penultimate section examines the shortcomings of two well known conceptions of totality one by Georg Lukács another by Karel Kosík before a final section examines in detail the

developmental characteristics of Marxian totality The volume concludes with a chapter dealing with methodological implications

**Marx's Resurrection of Aristotle** Norman Levine, 2021-01-24 This book seeks to show how Karl Marx's vision of communism was a continuation of Aristotle's classical humanist philosophy Challenging the Engelsian distortion of Marx it presents a negation of previous interpretations of Marx which present him in materialist terms Engels proposed a picture of the highest stage of communist society as an economic egalitarianism a vision which became an axiom of Leninist Stalinist Soviet Communism By contrast here it is shown that Marx embraced the Aristotelian concept of distributive justice of proportionate equality Spanning the works of Marx from his university education and doctoral dissertation on the differences between the Democritean and Epicurean philosophy of the atom to the study of his *Rheinische Zeitung* period and the persistence of classical humanism in Marx's defense of the freedom of the press Levine skillfully reveals the gravitational pull between Marx and Aristotle Showing how classical humanism is the dominant ethos in the communism of Marx the book includes chapters on Hegel as a transition point between Aristotle and Marx The links between Marx's theory of labor and Aristotle's idea of the constitutive subject located in *The Politics* How the local methodologies of Aristotle and Hegel provided Marx with the social methodologies by which to interpret the functioning of capitalism Marx's *Resurrection of Aristotle* is the culmination of Norman Levine's life long work to establish the correct placement of Marx and Marx's communism within the classical humanist tradition

**Marx's Discourse with Hegel** N. Levine, 2012-02-21 The end of Stalinist Russia China's change under Deng Xiaoping and the publication of previously unexplored documents of Marx in the MEGA2 opened a new epoch in the analysis of Marx Marx's *Discourse With Hegel* is both a product and contribution to this rebirth of Marxism by its reformulation of the relationship between Hegel and Marx

**The Spectre of Capital: Idea and Reality** Christopher J. Arthur, 2022-07-18 What is money What is capital The *Spectre of Capital* tackles such fundamental questions at a deep philosophical level It argues that the modern world is ruled by a spectre the spectre of capital This insight is rooted in an original combination of the ideas of Marx and Hegel It presents the most sophisticated argument to date for the homology thesis namely that the order of Hegel's logical categories and that of the social forms addressed by Marx's *Capital* share the same architectonic The systematic dialectical presentation shows how capital becomes a self sustaining power

**Karl Marx and Contemporary Philosophy** A. Chitty, M. McIvor, 2009-05-29 This collection brings together the latest work of some of the world's leading Marxist philosophers and new young researchers Based upon work presented at meetings of the Marx and Philosophy Society it offers a unique snapshot of the best current scholarship on the philosophical aspects and implications of Marx's thought

**Value without Fetish** Elena Louisa Lange, 2021-06-22 *Value without Fetish* presents the first in depth English language study of the influential Japanese economist Uno K z's 1897-1977 theory of pure capitalism in the light of the method and object of Marx's *Critique of Political Economy* A close analysis of the theories of value production and reproduction and crisis in Uno's central texts from the 1930s to the 1970s reveals his departure from Marx's central

insights about the fetish character of the capitalist mode of production a departure that Lange shows can be traced back to the failed epistemology of value developed in Uno's earliest writings By disavowing the complex relation between value and fetish that structures Marx's critique Uno adopts the paradigms of neoclassical theories to present an apology rather than a critique of capitalism *Marx, Veblen, and the Foundations of Heterodox Economics* Tae-Hee Jo, Frederic Lee, 2015-07-30

John F Henry is an eminent economist who has made important contributions to heterodox economics drawing on Adam Smith Karl Marx Thorstein Veblen and John Maynard Keynes His historical approach offers radical insights into the evolution of ideas ideologies and theories giving rise to and/or induced by the changes in capitalist society Essays collected in this festschrift not only evaluate John Henry's contributions in connection to Marx's and Veblen's theories but also apply them to the socio-economic issues in the 21st century In Part I leading heterodox economists in the traditions of Marxism Post Keynesianism and Institutionalism critically examine Marx's and Veblen's theoretical frameworks and their connections to each other that have become the foundations of heterodox economics Chapters in Part II showcase alternative theoretical explanations inspired by Marx Veblen and Henry Topics in this Part include financial crisis financialization capital accumulation economics teaching and the historical relationship between money and class society Part III is devoted to John Henry's heterodox economics encapsulated in his farewell lecture interview and bibliography Essays in this book individually and collectively make an important point that the history of economic thought or historical analysis of economic theory and policy is an integral part of developing heterodox economics as an alternative theoretical framework Anyone who is troubled by the recurring failure of capitalism as well as mainstream economics will find this book well worth reading *Handbook of Alternative Theories of Political Economy* Stilwell, Frank, Primrose, David, Thornton, Tim B., 2022-05-13 This Research Handbook advances entrepreneurship theory in new ways by integrating and contributing to contemporary theories of practice Leading theorists and entrepreneurship experts who are part of the growing Entrepreneurship as Practice EaP research community expertly propose methodologies theories and empirical insights into the constitution and consequences of entrepreneuring practices *Marx for the 21st Century* Hiroshi Uchida, 2004-08-02 This book testifies that the economic thinking of Karl Marx is still valid for the 21st century introducing readers to unknown materials buried in archives which portray Marx's attitudes to democracy **Value in Marx** George Henderson, 2013-03-20 Long prone to dogmatic disagreement the question of value in Marx's thought what value is the purpose it serves its application to real world capitalism requires renewal if Marx's work is to remain vibrant In *Value in Marx* George Henderson offers a lucid rereading of Marx that strips value of its turgid theoretical reduction and reframes it as an investigation into the tensions between social relations and forms as they are rather than as what they could otherwise become Drawing on Marx's *Capital* and *Grundrisse* Henderson shows how these volumes do not harbor a single theory of value that equates value to capital Instead these books experimentally compose and recompose value for a world that is more than capitalist At stake is how Marx

conceives of human freedom of balanced social arrangements and of control over the things people produce Henderson finds that the limits on social becoming including the tendency toward alienated existence haunt Marx even as he looks beyond the critique of capital to an emancipated society to come Can these limits be confronted in a creative even joyful way Can they become aspects of what we desire rather than being silenced and denied As long as we persist in interpreting value broadly following it as an active and not a shut down predetermined feature of Marx s texts Henderson ultimately views Marx as responding positively to these challenges and employing value as a powerful tool of the political imaginary
