Reading The Content Fields Practical Arts:

Reading the Content Fields Edward Spargo, Raymond Harris, 1978 **Technical Writing , Job Corps Graded Reading Competencies Course Guide** United States. Employment and Training Administration, 1989 **Teacher's Directory of Reading Skill Aids and Materials** Emerald V. Dechant, 1981 **Subject Guide to Books in Print** , 1993 **The Publishers' Trade List Annual** , 1979 The Field Practice of Laying Out Circular Curves for Railroads John Cresson Trautwine, 1887 **Books in Print** , 1982 Paperbound Books in Print , 1992 **Research in Education** , 1970-12 **Resources in Education** , 1997 **Reading in the High School and College** National Society for the Study of Education. Committee on Reading, 1948 **Arts Education and Literacies** Amy Petersen Jensen, Roni Jo Draper, 2015-06-26 In a struggling global economy education is focused on core subjects such as language arts and mathematics and the development of technological and career readiness skills Arts education has not been a central focus of education reform movements in the United States and none of the current education standards frameworks deeply address the processes texts and literacies that are inherent to arts disciplines This lack of clarity poses a problem for state and district leaders who might be inclined to advocate for the arts in schools and classrooms across the country but cannot find adequate detail in their guiding frameworks This volume acknowledges the challenges that arts educators face and posits that authentic arts instruction and learning can benefit a young person s development both inside and outside of the classroom It presents ways that arts teachers and literacy specialists can work together to help others understand the potential that arts learning has to enhance students 21st century learning skills Diagnosis and Remediation of Reading Disabilities Emerald V. Dechant, 1981 Shaping the College Curriculum Lisa R. Lattuca, Joan S. Stark, 2011-01-11 Shaping the College Curriculum focuses on curriculum development as an important decision making process in colleges and universities The authors define curriculum as an academic plan developed in a historical social and political context They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs By exploring the interaction of these elements in context they use the academic plan model to clarify the processes of course and program planning enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning This revised edition continues to stress research based educational practices The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions All chapters have been updated with recent research findings relevant to curriculum leadership accreditation assessment and the influence of academic fields while two new chapters focus directly on learning research and its implications for instructional practice A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are engaged in extensive program improvements Streamlined yet still comprehensive and detailed this revised volume will continue to serve as an invaluable resource for individuals and groups

whose work includes planning designing delivering evaluating and studying curricula in higher education This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will The book brings coherence and intention to what is typically an unstructured haphazard and only partially rational process guided more by beliefs than by empirically grounded substantive information Lattuca and Stark present their material in ways that are accessible and applicable across planning levels course program department and institution local settings and academic disciplines It s an admirable and informative marriage of scholarship and practice and an insightful guide to both Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book Patrick T Terenzini distinguished professor and senior scientist Center for the Study of Higher Education The Pennsylvania State University
