Readings In Family Planning A Challenge To The Health Professional:

Readings in Family Planning Donald V. McCalister, Margaret McDermott, 1973 **Adolescent Health: Background and the effectiveness of selected prevention and treatment services**, 1991 This three volume work presents the Office of Technology's assessment of the physical emotional and behavioral health status of contemporary American adolescents including those living in poverty racial and ethnic minority groups Native Americans and rural adolescents Specific topics covered are identifying risk and protective factors for adolescent health problems evaluating options in the organization of health services and technologies available to adolescents assessing options in the conduct of national health surveys to improve collection of adolescent health statistics and identifying gaps in research on the health and behavior of adolescents

Adolescent Health, 1991 **Health Aspects of Family Planning** Allison G. Stettner, Anita P. Cowan, 1982

Risking the Future Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Panel on Adolescent Pregnancy and Childbearing, National Research Council, 1987-02-01 More than 1 million teenage girls in the United States become pregnant each year nearly half give birth Why do these young people who are hardly more than children themselves become parents This volume reviews in detail the trends in and consequences of teenage sexual behavior and offers thoughtful insights on the issues of sexual initiation contraception pregnancy abortion adoption and the well being of adolescent families It provides a systematic assessment of the impact of various programmatic approaches both preventive and ameliorative in light of the growing scientific understanding of the topic Poor Women, Powerful Men Martha C Ward, 2019-07-09 Poor Women Powerful Men chronicles the achievements and subsequent failure of the Louisiana Family Health Foundation the most extensive family planning program ever to operate in the United States Martha C Ward's even handed account reveals the mechanisms of politics poverty and public health policies at work in the perpetual controversies surrounding reproductive rights and the delivery of health care services to the poor Ward's book begins in the early 1960s when Louisiana was among the most underdeveloped states and ranked at the bottom of all scales measuring illiteracy illegitimacy and infant mortality Despite the free statewide Charity Hospital system many routine preventive medical and public health services were not available to poor women and their children particularly if they were black But in the mid 1960s a visionary group of doctors and health care practitioners began to clear the hurdles erected by law church and the medical political establishment By 1970 they had set up the first statewide family planning program for poor people in the United States The Louisiana experiment was a spectacular success The Ford Rockefeller and Kellogg Foundations poured millions of dollars into the program The Great Society and War on Poverty programs placed a high priority on the health of poor mothers and infants With the help of the population lobby including Planned Parenthood and the Agency for International Development the Family Health Foundation moved into Latin America and other developing areas But in 1974 the bubble burst Accusations of fiscal mismanagement fraudulent statistics patronage and political payoffs

led to federal indictments and jail sentences for top officials Poor women and powerful men the black and white communities and the liberal and conservative medical factions were pitted against each other With the collapse of the program methods for handling the epidemic of adolescent pregnancies and the high infant mortality rate reverted to the state bureaucracies Poor Women Powerful Men is the first book length account of the Louisiana experiment In a clear and dispassionate voice Ward demonstrates that many of the questions raised by the experiment persist Is family planning an answer to the cycle of poverty teenage pregnancies and infant mortality How can the conflict between private and public delivery of medical care be resolved Where do the reproductive rights of women fit into governmentally supported birth control programs We seem no closer today to answering these questions than the Louisiana Family Health Foundation was more than a decade ago
