Britain's Medieval Castles Lise E. Hull, 2005-12-30 The widespread construction of castles in Britain began as soon as Duke William of Normandy set foot on the shores of southern England in 1066 The castles that were constructed in the ensuing centuries and whose ruins still scatter the British countryside today provide us with an enduring record of the needs and ambitions of the times But the essence of the medieval castle a structure that is equal parts military residential and symbolic reveals itself not only through the grandeur of such architectural masterpieces as the Tower of London and the imposing nature of such royal residences as Windsor but also in the aging masonry carvings enduring battlements and more modest earthen ramparts that have survived alongside them Through a feature by feature account of the architectural elements and techniques used in constructing the medieval castle author Lise Hull allows the multiple functions of these multifarious forms to shine through and in so doing lends a new vitality to the thousand faces that the medieval world assumed to discourage its enemies inspire its friends and control its subjects This compelling investigation takes a unique look at each of the medieval castle s main roles as an offensive presentation and defensive fortification as a residential and administrative building and as a symbolic structure demonstrating the status of its owner Each chapter focuses on one specific role and uses concrete architectural features to demonstrate that aspect of the medieval castle in Britain A wealth of illustrations is also provided as is a glossary explaining the distinct parts of the castle and their functions This book should be of interest to students researching architecture the Middle Ages or military history as well as general readers interested in castles or considering a trip to Britain to observe some of these magnificent sites themselves Castles in Ireland T. E. McNeill, 1997 The story of the nature and development of lordship and power in medieval Ireland as displayed through the majesty and uniqueness of individual castles *Late Medieval Castles* Robert Liddiard, 2016 A collection of the most significant articles in castle studies with contributions from scholars in history archaeology historic buildings and landscape archaeology The castles of the late medieval period represent some of the finest medieval monuments in Britain with an almost infinite capacity to fascinate and draw controversy They are also a source of considerable academic debate The contents of this volume represent key works in castle scholarship Topics discussed include castle warfare fortress customs architectural design and symbolism spatial planning and the depiction of castles in medieval romance The contributions also serve to highlight the diversity of approaches to the medieval castle ranging from the study of documentary and literary sources analysis of fragmentary architectural remains and the recording of field archaeology The result is a survey that offers an in depth analysis of castle building from the thirteenth to the fifteenth centuries and places castles within their broader social architectural and political contexts Robert Liddiard is Professor of History University of East Anglia Contributors Nicola Coldstream Charles Coulson Philip Dixon Graham Fairclough P A Faulkner John Goodall Beryl Lott Charles McKean T
