Psychological Applications in Management Tomi L. Wahlstrom, 1999-04 Today's business environment requires more effective leadership than ever In the constantly changing business environment the leader has the central responsibility of keeping people motivated and productive Many companies have been downsizing and laying off employees and leaving behind employees with a wounded morale To lift this morale the leader needs to possess characteristics and qualities that cannot be learned from courses taken in business schools alone These characteristics and qualities can only be learned from life itself in an individual journey of individuation The leader needs to undergo an initiation process from immature psychology to mature psychology Traditionally this process is what makes men out of boys and women out of girls In analytical psychology this journey is called the hero's journey which is based on the hero myth and includes several different initiations and growing steps This study investigates the different initiations included in the hero's journey and the importance of learning how from them to be a responsible effective charismatic and powerful leader The study also illustrates the archetypes a term developed by Dr Carl Jung 1959 to describe the original patterns that guide our behavior involved in the hero's journey and what is required to get through the journey Heroism is not discussed here in the overall sense in which the public defines heroism As such this study does not investigate what motivates people to risk and or sacrifice their lives by attempting to save people from crashed airplanes Although this aspect of sacrifice is always present in heroism this aspect is just one of the many aspects of heroism Neither a heroic act of saving lives nor being celebrated on the covers of a national newspaper is required to be recognized as a hero Individuals are all heroes in their own way Some individuals manifest their heroism in very silent ways introversion while other individuals seem always to be in the public eye extroversion The essence of heroism always involves taking a journey into the unknown and bringing some sort of knowledge out of the unknown that benefits either society or an organization The hero brings new prosperity to the organizational wasteland Heroism in mass media and movie entertainment is very different from heroism in the psychological sense and in the mythological sense although there are some similar elements The basic elements of the hero the villain and the fair maiden are always present in popular movies but the steps of the hero's journey are often not involved which leaves nothing

more than a meaningless plot good only for entertainment purposes These types of movies can steal an individual's sense of understanding of both the myth and the purpose of the hero's journey This study is neither discussing the heroes of our popular culture nor is this a study of Hollywood's creations or of celebrated athletes or even of famed political and war heroes The focus within this study is a hero's journey in the career of a leader and how the journey can bring the light individuation into the darkness of the organizational wasteland The legacy of Roberto Goizueta who died in October 1997 during the writing of this dissertation is also acknowledged While his death in itself does not change the conclusions of this dissertation his contribution to the Coca Cola Company's success in traveling the hero's journey has been enormous It remains to be seen what the future brings to this great company after losing such a charismatic and heroic leader

Red Teaming Bryce G. Hoffman, 2017-05-16 Red Teaming is a revolutionary new way to make critical and contrarian thinking part of the planning process of any organization allowing companies to stress test their strategies flush out hidden threats and missed opportunities and avoid being sandbagged by competitors Today most if not all established corporations live with the gnawing fear that there is another Uber out there just waiting to disrupt their industry Red Teaming is the cure for this anxiety The term was coined by the U S Army which has developed the most comprehensive and effective approach to Red Teaming in the world today in response to the debacles of its recent wars in Iraq and Afghanistan However the roots of Red Teaming run very deep to the Roman Catholic Church's Office of the Devil's Advocate to the Kriegsspiel of the Prussian General Staff and to the secretive AMAN organization Israel's Directorate of Military Intelligence In this book author Bryce Hoffman shows business how to use the same techniques to better plan for the uncertainties of today's rapidly changing economy Red Teaming is both a set of analytical tools and a mindset It is designed to overcome the mental blind spots and cognitive biases that all of us fall victim to when we try to address complex problems The same heuristics that allow us to successfully navigate life and business also cause us to miss or ignore important information It is a simple and provable fact that we do not know what we do not know The good news is that through Red Teaming we can find out In this book Hoffman shows how the most innovative and disruptive companies such as Google and Toyota already employ some of these techniques organically He also shows how many high profile business failures including those that sparked the Great Recession could easily have been averted by using these approaches Most importantly he teaches leaders how to make Red Teaming part of their own planning process laying the foundation for a movement that will change the way America does business
