Religious Faith Spirituality And Health Communication:

Religious Faith, Spirituality, and Health Communication Roxanne Parrott, 2004-01-01 A primary premise of this special issue is that religious faith and spirituality comprise an integral component of lay discourse and lay theories associated with health. The articles included in this collection begin to fill a void and at the same time illustrate a role health communication fulfills within the behavioral sciences emphasizing how everyday people make sense of health conditions in their daily living. Following the introduction the next paper provides an integrated synthesis of the ways and means that religious faith and spirituality have been assessed primarily through use of quantitative measures. The next two articles utilize instruments discussed in the previous review. The remaining papers utilize qualitative methods to begin to address the absence of specific understanding regarding religious faith and health communication, answering the challenge to health communicators to enrich the field through greater use of such methodological approaches to inquiry. *Health*

Communication for Social Justice Vinita Agarwal, 2023-10-24 This textbook combines whole person and social justice perspectives to educate students on the role of communication in promoting inclusive and person centered healthcare practices. This book explores health inequities experienced by disadvantaged and marginalized populations and outlines the actions students can take to address these challenges. The book demonstrates how physical, mental, and emotional health is connected to equitable understandings of individual, community, and environmental health. It considers how social, interpersonal, and systemic factors such as personal relationships, language, literacy, religion, technology, and the environment affect health equity. To present strategies and invite action to support the goals of the whole person social justice activist approach, the book provides contemporary examples, interviews with communication scholars, and case studies that examine local communities and the everyday contexts of health meaning making. This textbook serves as a core or supplemental text for graduate and upper level undergraduate courses in health communication.
