History and Health Policy in the United States Rosemary A. Stevens, Charles E. Rosenberg, Lawton R. Burns, 2006-06-01 In our rapidly advancing scientific and technological world many take great pride and comfort in believing that we are on the threshold of new ways of thinking living and understanding ourselves But despite dramatic discoveries that appear in every way to herald the future legacies still carry great weight Even in swiftly developing fields such as health and medicine most systems and policies embody a sequence of earlier ideas and preexisting patterns In *History and Health Policy in the United States* seventeen leading scholars of history the history of medicine bioethics law health policy sociology and organizational theory make the case for the usefulness of history in evaluating and formulating health policy today In looking at issues as varied as the consumer economy risk and the plight of the uninsured the contributors uncover the often unstated assumptions that shape the way we think about technology the role of government and contemporary medicine They show how historical perspectives can help policymakers avoid the pitfalls of partisan outdated or merely fashionable approaches as well as how knowledge of previous systems can offer alternatives when policy directions seem unclear Together the essays argue that it is only by knowing where we have been that we can begin to understand health services today or speculate on policies for tomorrow

Competitive Business Strategy for Teaching Hospitals James Langabeer, John Napiewocki, 2000-08-30 Without new ways to think and manage itself strategically academic healthcare faces terminal deterioration Heightened competition and changing dynamics have brought turbulence to teaching hospitals and the main impact has been financial Langabeer and Napiewocki give health care executives the tools and concepts of strategic management they need and ways to strengthen analytic skills all based on up to date empirical research cast in language

they can grasp and relate to and specially tailored to help teaching hospital administrators cope successfully with today's marketplace challenges Board members trustees and others with decision and policy making responsibilities will also find the book essential as well as their teaching colleagues and students on their way up in the hospital industry The authors maintain that if nonprofit teaching hospitals are to compete successfully with private for profit hospital chains not only must they learn the terrain of the playing fields they must also learn how the game itself is played Langabeer and Napiewocki offer that knowledge and in doing so have written the first book of its kind to address comprehensively the entire realm of strategic management aimed clearly at teaching hospitals and major academic medical centers With findings from primary empirical research into a large sample of teaching hospitals and focusing on the statistical relationships to economic performance they provide crucial insights into why certain hospitals are more effective than others Their book will also help healthcare executives relate strategy research on industrial organizations to their own teaching hospital environments In doing so their book fills a void in the literature on business strategy that for too long has caused consternation among healthcare administrators and aspirants alike

The Ethics of Managed Care Mary R. Majumder, 2001-07-27 The Ethics of Managed Care A Pragmatic Approach Mary R Anderlik A breakthrough reappraisal of the managed healthcare debate Discussions of managed care frequently begin and end with an opposition between the Hippocratic ethic of dedication to patient welfare and a business ethic of self interest in the service of efficiency Mary R Anderlik approaches managed care as a problem of organizations Rejecting a simple medicine vs business analysis she directs attention to management as manipulation the neglect of such personal goods as satisfaction in professional accomplishment and organizational moral myopia In this account pragmatic suggests practical idealism not the jettisoning of principle in the interests of expediency In The Ethics of Managed Care Anderlik favors a broad empiricism and a moral vision centered on values of democracy and community She describes how organizations can nourish or destroy openness creativity cooperation and faithfulness and display virtues such as justice integrity responsiveness and efficiency rightly understood She uses community care clinics asthma outreach programs and new contexts for participatory decision making to show the promise of managed care She also explains the complexities of financial arrangements arguing for an end to schemes that reward clinicians for providing less care and profiting from avoiding people who need a lot of it The book concludes with a look at the future of managed

The Nursing Profession , Dyad Leadership in Healthcare Kathleen Sanford, 2015-01-07 Healthcare leaders are facing major change in how healthcare is delivered as we move from fee for service payment models to pay for value Physicians and hospitals are evolving from separate financial entities with relationships varying from customers workshops to competitors to unified systems Government policy maker payers and hordes of consultants advise hospitals to increase physician leadership in all parts of the system However few have proposed how this can be done when the gaps between hospitals and physicians are so wide Physicians do not trust healthcare leaders lack leadership and teamwork skills and have little knowledge of how systems work Some hospital leaders are working to overcome these gaps by setting up dyad leadership teams consisting of a physician and an experienced manager leader The physician member of the team helps with the first gap the nurse or other dyad partner is important to manage the other gaps Until now with the publication of Dyad Clinical Leadership there has not been a source to help clinical dyad partners learn and understand how to work together in this emerging management model Kathleen D Sanford DBA RN CENP FACHE Senior Vice President and Chief Nursing Officer at Catholic Health Initiatives CHI builds on CHI's success with this unique playbook for the model

Adopting the Song of Appearance: An Emotional Symphony within **Remaking Health Care In America Building Organized Delivery Systems**

In a world used by monitors and the ceaseless chatter of quick connection, the melodic splendor and mental symphony created by the published term usually fade in to the background, eclipsed by the constant noise and disruptions that permeate our lives. Nevertheless, situated within the pages of **Remaking Health Care In America Building Organized Delivery Systems** an enchanting fictional prize full of fresh feelings, lies an immersive symphony waiting to be embraced. Crafted by an elegant composer of language, this interesting masterpiece conducts readers on a mental trip, skillfully unraveling the concealed songs and profound impact resonating within each cautiously constructed phrase. Within the depths of this poignant assessment, we will examine the book's main harmonies, analyze its enthralling writing type, and submit ourselves to the profound resonance that echoes in the depths of readers' souls.
