Pascual-Fernández,Cristina Pita,Maarten Bavinck,2020-04-28 This book offers a comprehensive account of the status and dynamics of people participating in the small scale fisheries SSF of Europe It covers the situation of SSF in 25 coastal countries thereby providing a portrait of almost every coastal country on the continent and analyzing the recent evolution of the sector Small scale fisheries are argued to be extremely important in Europe as they provide employment and welfare while increasing food sovereignty and maintaining communities in coastal areas The recent worldwide focus on SSF derives from their environmental sustainability which distinguishes many of their activities from those of large scale fisheries This book analyses the diversity of SSF and shows how fishing communities have sometimes developed successful governing models demonstrating social and economic resilience While the book emphasizes the strengths of SSF and the synergies that occur with other marine sectors it also presents cases of failure in which collective action and policy have actually contributed to a weakening of the sector In this context the book shows how governmental policies toward SSF vary considerably from country to country in a way that is not entirely consistent with European policies **Big Oil Playground, Russian Bear Preserve Or European Periphery?** Bjørn Brunstad,2004 Barents Russia is the far northwestern corner of the Russian Federation bordering on the Barents Sea and the affluent Nordic countries It is a region full of natural resources petroleum fish minerals etc much of which is yet to be exploited The region is heavily influenced by the Cold War and 70 years of Soviet central planning with heavy industry concentrated in company towns and with a strong military presence The region also houses some serious threats to a vulnerable Arctic environment The ten past years have brought historic changes in Barents Russia and in the relations between this region and the world around it Yet the next couple of decades may bring even more profound changes the direction of which is hard to predict Much hangs in the balance ranging from the supply of oil and gas to the world market to broader political issues such as the future for democracy and the rule of law the protection of the environment the integration into world trade and the old favourite topic of the high north the strategic balance This book presents three plausible but provoking scenarios for the future of Barents Russia Big Oil Playground Russian Bear Preserve or European Periphery and will hopefully contribute to increased attention and deeper understanding of the forces and actors that will shape the region The aim is for the scenarios to provoke new insights about change dynamics

opportunities and challenges and to serve as a backdrop for public planning corporate strategy making and more Book jacket
