Owning Russia Andrew S. Barnes,2018-07-05 During and after the breakdown of the Soviet Union a wide range of competitors fought to build new political and economic empires by wresting control over resources from the state and from each other In the only book to examine the evolution of Russian property ownership in both industry and agriculture Andrew Barnes uses interviews archival research and firsthand observation to document how a new generation of capitalists gained control over key pieces of the Russian economy by acquiring debt ridden factories and farms once owned by the state He argues that although the Russian government made policies that affected how actors battled one another it could never rein in the most destructive aspects of the struggle for property Barnes shows that dividing the spoils of the Soviet economy involved far more than the experiment with voucher privatization or the scandalous behavior of a few Moscow based oligarchs In Russia the control of property yielded benefits beyond mere profits and these high stakes fueled an intense enduring and profound conflict over real assets This fierce competition empowered the Russian executive branch at the expense of the legislature dramatically strengthened managers in relation to workers created a broad array of business conglomerates and fundamentally shaped regional politics not only blurring the line between government and business but often erasing it

Lavelle Professor,2004-09-24 Emerging market stock issuance relative to GDP rose in the late twentieth century to levels that roughly matched that of advanced industrial markets Nonetheless the connection between owning shares of emerging market stock and the ability to influence the management of these firms remains fundamentally different from the analogous institutional connection that has evolved in industrial markets The reasons for the differences in emerging markets are both historical and political in nature That is local equity markets have had the objective of providing for some degree of local ownership and control of large economic entities since the late nineteenth century However local markets have operated under different global political structures since that time ranging from imperialism to world wars to sovereign developmental states to neo liberal states Shares issued under these different structures have been reconfigured over time resulting in a lack of convergence along either the Anglo American or Continental models of corporate governance The author uses a political science paradigm to explain the growth of emerging equity markets She departs from conventional economic

explanations and examines politics at the micro level of large issues of emerging market stock The second half of the book presents case studies dealing with emerging market countries in Latin America Asia Russia and Eastern Europe Africa and the Middle East The case studies connect the regional state and firm levels to detail the multiple ownership and control arrangements and to dispel the notion that mere quantitative growth of these markets will lead to a convergence in financial institutional structures along the lines of the industrial core of the world economy

The Totalitarian Paradigm After the End of Communism Achim Siegel, 1998 Concepts of totalitarianism have undergone an academic revival in recent years particularly since the breakdown of communist systems in Europe in 1989 91 the totalitarian paradigm so it seems to many scholars today had been discarded prematurely in the heat of the Cold War The demise of communism as a social system is however not only an important cause of the recurring attractiveness of the totalitarian paradigm but provides at the same time new evidence and correspondingly new problems of explanation for all approaches in communist studies and totalitarianism theory in particular This book contains articles by philosophers social scientists and historians who reassess the validity of the totalitarian approach in the light of the recent historical developments in Eastern Europe A first group of authors focus on the analytical usefulness and explanatory power of classic concepts of totalitarianism after having observed the failed reforms of the Gorbachev era and the collapse of Europe's communist systems in 1989 91 In these contributions the totalitarian paradigm is contrasted with other approaches with respect to cognitive power as well as normative implications In the second group of contributions the focus is on the reassessment of methodological and theoretical problems of the classic concepts of totalitarianism The authors attempt to reinterpret the classic concepts so as to meet the objections which have been put forward against those concepts during the last decades The study thereby traces some of the intellectual roots of the totalitarian paradigm that precede the outbreak of the Cold War such as the work of Sigmund Neumann and Franz Borkenau It also focuses on the most famous authors in the field Hannah Arendt and Carl Joachim Friedrich In addition it discusses theorists of totalitarianism like Juan Linz whose contributions to totalitarianism theory have too often been overlooked
