Spellman, Joan Price-Bayer, 2010-12-16 Today only a few people outside of the scientific community are conversant with the tradition of science and its many breakthroughs The rest are scientifically illiterate So say Frank R Spellman and Joni Price Bayer authors of In Defense of Science Why Scientific Literacy Matters This book explains why ordinary citizens need to have an understanding of science its methods and its groundbreaking discoveries The authors introduce the most basic scientific concepts in accessible and straightforward language Along the way they debunk several misconceptions of science and scientists and arrive at a view of science as an integral part of society policy and everyday life The book begins with an introduction to science and its basic concepts including a brief and entertaining history of science and scientific discoveries before taking on current views of science in society It surveys the many sources of our ideas of science including pop culture classics of literature news media and political discourse Much of the information from these sources tends to mislead and the only way to guard against such misinformation is to become scientifically literate and promote scientific literacy in society The book therefore delves into the reasons that so many people do not understand basic scientific principles and do not keep up with scientific breakthroughs and finishes by examining the current state of science education It includes many resources for further reading and is presented in an engaging and entertaining way It offers much food for thought for anyone concerned with science in today s world *The Anime Encyclopedia, 3rd Revised Edition* Jonathan Clements, Helen McCarthy, 2015-02-09 Impressive

Mahmoud, 2020-03-20 Multiagent systems MAS are one of the most exciting and the fastest growing domains in the intelligent resource management and agent oriented technology which deals with modeling of autonomous decisions making entities Recent developments have produced very encouraging results in the novel approach of handling multiplayer interactive systems In particular the multiagent system approach is adapted to model control manage or test the operations and management of several system applications including multi vehicles microgrids multi robots where agents represent individual entities in the network Each participant is modeled as an autonomous participant with independent strategies and responses to outcomes They are able to operate autonomously and interact pro actively with their environment In recent works the problem of information consensus is addressed where a team of vehicles communicate with each other to agree on key pieces of information that enable them to work together in a coordinated fashion The problem is challenging because communication channels have limited range and there are possibilities of fading and dropout The book comprises chapters on synchronization and consensus in multiagent systems It shows that the joint presentation of synchronization and consensus enables readers to learn about similarities and differences of both concepts It reviews the cooperative control of multi agent dynamical systems interconnected by a communication network topology Using the terminology of cooperative control each system is endowed with its own state variable and dynamics A fundamental problem in multi agent dynamical systems on networks is the design of distributed protocols that guarantee consensus or synchronization in the sense that the states of all the systems reach the same value It is evident from the results that research in multiagent systems offer opportunities for further developments in theoretical simulation and implementations This book attempts to fill this gap and aims at presenting a comprehensive volume that documents theoretical aspects and practical applications *Children's Books in Print*, 2007, 2006 *Catalog of Copyright Entries, Third Series*, 1967 The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim the name of the copyright claimant as given in the application for
