Sacred Space:

Defining the Holy Sarah Hamilton, 2016-12-05 Holy sites both public churches monasteries shrines and more private domestic chapels oratories populated the landscape of medieval and early modern Europe providing contemporaries with access to the divine These sacred spaces thus defined religious experience and were fundamental to both the geography and social history of Europe over the course of 1 000 years But how were these sacred spaces both public and private defined How were they created used recognised and transformed And to what extent did these definitions change over the course of time and in particular as a result of the changes wrought in the sixteenth and seventeenth centuries Taking a strongly interdisciplinary approach this volume tackles these questions from the point of view of archaeology architectural and art history liturgy and history to consider the fundamental interaction between the sacred and the profane Exploring the establishment of sacred space within both the public and domestic spheres as well as the role of the secular within the sacred sphere each chapter provides fascinating insights into how these concepts helped shape and were shaped by wider society By highlighting these issues on a European basis from the medieval period through the age of the reformations these essays demonstrate the significance of continuity as much as change in definitions of sacred space and thus identify long term trends which have hitherto been absent in more limited studies As such this volume provides essential reading for anyone with an interest in the ecclesiastical development of western Europe from the thirteenth to the eighteenth centuries

Sacred Power, Sacred Space Jeanne Halgren Kilde, 2008-07-21 Jeanne Halgren Kilde's survey of church architecture is unlike any other Her main concern is not the buildings themselves but rather the dynamic character of Christianity and how church buildings shape and influence the religion Kilde argues that a primary function of church buildings is to represent and reify three different types of power divine power or ideas about God personal empowerment as manifested in the individual's perceived relationship to the divine and social power meaning the relationships between groups such as clergy and laity Each type intersects with notions of Christian creed cult and code and is represented spatially and materially in church buildings Kilde explores these categories chronologically from the early church to the twentieth century She considers the form organization and use of worship rooms the location of churches and the interaction between churches and the wider culture Church buildings have been integral to Christianity and Kilde's important study sheds new light on the way they impact all aspects of the religion Neither mere witnesses to transformations of religious thought or nor simple backgrounds for religious practice church buildings are in Kilde's view dynamic participants in religious change and goldmines of information on Christianity itself
